

# Actual 2V0-13.25 VMware Cloud Foundation 9.0 Architect Questions 2025

P.S. Free & New 2V0-13.25 dumps are available on Google Drive shared by TorrentValid: <https://drive.google.com/open?id=1m6fez7xWwLVKttE6hafYM8h50DHRV09F>

One year free update for VMware 2V0-13.25 is available for all of you after your purchase. TorrentValid 2V0-13.25 pdf download dumps have helped most IT candidates get their 2V0-13.25 certification. The high quality and best valid 2V0-13.25 dumps we have been the best choice for your preparation. You just need to take 20-30 hours to study and prepare, then you can attend your 2V0-13.25 Actual Test with ease. 100% success is the guarantee of 2V0-13.25 pdf study material.

## VMware 2V0-13.25 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> <li>Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.</li> </ul> |
| Topic 2 | <ul style="list-style-type: none"> <li>VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Topic 3 | <ul style="list-style-type: none"> <li>Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Topic 4 | <ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.</li> </ul>                                                                                                                                                                                                                                                      |

|         |                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 5 | <ul style="list-style-type: none"> <li>• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.</li> </ul> |

## Valid 2V0-13.25 Exam Question - Valid Braindumps 2V0-13.25 Book

Our specialists check daily to find whether there is an update on the 2V0-13.25 study tool. If there is an update system, we will automatically send it to you. Therefore, we can guarantee that our 2V0-13.25 test torrent has the latest knowledge and keep up with the pace of change. Many people are worried about electronic viruses of online shopping. But you don't have to worry about our products. Our 2V0-13.25 Exam Materials are absolutely safe and virus-free. If you encounter installation problems, we have professional IT staff to provide you with remote online guidance. We always put your needs in the first place.

## VMware Cloud Foundation 9.0 Architect Sample Questions (Q53-Q58):

### NEW QUESTION # 53

Which VMware Cloud Foundation components are essential for hybrid cloud integration?

- A. VMware NSX
- B. VMware vSAN
- C. VMware vSphere
- D. VMware HCX

**Answer: C,D**

Explanation:

VMware HCX and vSphere are essential for hybrid cloud integration in VMware Cloud Foundation.

### NEW QUESTION # 54

An architect is responsible for designing a VMware Cloud Foundation (VCF)-based private cloud for a customer. During the customer requirements gathering workshop, the customer has stated the following:

- \* All Platinum applications/services must have an availability SLA of 99.99%.
- \* All Gold applications/services must have an availability SLA of 99.9%.
- \* All Silver applications/services must have an availability SLA of 99%.
- \* The private cloud must have an availability SLA of 99.9%.

What should the architect recommend to meet the stated requirements?

- A. The Platinum service availability requirements must be met by configuring Proactive High Availability (HA) on the workload domain.
- B. The private cloud must only be used to host Silver and Gold services.
- C. The private cloud SLA can only be met using multiple VMware Cloud Foundation instances configured as a single VCF Fleet.
- D. The Platinum service availability requirements must be met by the application.

**Answer: D**

Explanation:

The overall private cloud SLA is 99.9%, but Platinum applications require 99.99%, which exceeds the infrastructure SLA. VMware design methodology states:

- \* If an application's SLA is higher than the infrastructure SLA, then the application itself must provide the additional resilience (e.g., clustering, active-active deployment, or application-level HA).
- \* Options A and B reduce flexibility or impose unnecessary complexity.
- \* Option D (Proactive HA) improves resiliency but cannot guarantee 99.99%, since Proactive HA still depends on underlying infrastructure SLA.

Therefore, the only valid recommendation is that Platinum workloads must implement resilience at the application layer.

Reference:VMware Cloud Foundation 9.0 - Availability and SLA Design Guide.

#### NEW QUESTION # 55

For high-performance storage in VMware environments, which Broadcom components are essential?

- A. Fibre Channel HBA
- B. Broadcom RAID Controller
- C. Broadcom NVMe SSD
- D. vSAN

**Answer: B,C,D**

Explanation:

Broadcom NVMe SSDs, RAID controllers, and vSAN are essential for high-performance storage in VMware environments.

#### NEW QUESTION # 56

Discovery: Multiple business units (some from acquisitions) with separate AD instances. Each unit operates independently and requires dedicated development environments.

Requirement: Provide self-service provisioning through VCF Automation.

Which two design decisions should be included? (Choose two.)

- A. All tenants will be configured to use their dedicated AD instance for authentication.
- B. A VCF Automation project will be created for each business unit.
- C. All projects will be configured to use their dedicated AD instance for authentication.
- D. All tenants will be configured to use the corporate AD instance for authentication.
- E. A VCF Automation tenant will be created for each business unit.

**Answer: A,E**

Explanation:

VCF Automation (Aria Automation) supports multi-tenancy with separate AD integration:

\* B: Each tenant must use their own AD instance, aligning with independence across business units.

\* C: Create a tenant per business unit, ensuring isolation and dedicated resource allocation.

D (projects per business unit) could work in a single-tenant scenario but doesn't address multi-AD separation.

A/E force consolidation into corporate AD or single projects, violating independence requirements.

Reference:VMware Cloud Foundation 9.0 - VCF Automation Multi-Tenancy and Identity Integration.

#### NEW QUESTION # 57

Which vSphere feature allows fault tolerance by running a duplicate VM on another host?

- A. DRS
- B. HA
- C. vSphere Fault Tolerance (FT)
- D. vMotion

**Answer: C**

Explanation:

FT ensures fault tolerance by maintaining a secondary VM on another host.

#### NEW QUESTION # 58

.....

If you are nervous on your 2V0-13.25 exam for you always have the problem on the time-schedule or feeling lack of confidence on the condition that you go to the real exam room. Our Software version of 2V0-13.25 study materials will be your best assistant. With the advantage of simulating the real exam environment, you can get a wonderful study experience with our 2V0-13.25 Exam

Prep as well as gain the best pass percentage.
