Who Is the Target Audience of Cisco ENARSI 300-410?

Anyone interested in climbing the ladder quickly in their networking career should complete this exam as part of the requirements to get the CCNP Enterprise certification. Generally, there are no strict requirements for the 300-410 applicants. However, there is a recommendation that individuals should have at least three years of experience related to the implementation of enterprise networking solutions. Also, solid knowledge in computer networking fundamentals is suggested.

High Pass-Rate Cisco 300-410 Actual Test Answers & Trustable Exam4Free - Leading Provider in Qualification Exams

With the scarcity of development, competitors have high demands for IT-related questions, how do applicants stand out over to many competitors? Cisco 300-410 latest exam dump make you stand out. Our exam dump materials help thousands of candidates pass exam and get certifications. Many companies cooperate with us to get exam to provide valid 300-410 latest exam dump for their engineers and managers since they find our materials are the best provider.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q181-Q186):

NEW QUESTION # 181
Drag and Drop the IPv6 First Hop Security features from the left onto the definitions on the right.

IPv6 ND Guard	Blocks unwanted IPv6 traffic from the network edge
IPv6 RA Guard	Blocks unwanted IPv6 Router Advertisements from the network edge
IPv6 Storm Control	Prevents a network interface from being overwhelmed by a flood of IPv6 traffic
IPv6 DHCP Snooping	Prevents unwanted IPv6 traffic from being sent to the network edge
IPv6 MACsec	Provides confidentiality and integrity for IPv6 traffic
IPv6 ACL	Filters IPv6 traffic based on source and destination addresses

Our service tenet is to let the clients get the best user experiences and be satisfied. From the research, compiling, production to the sales, after-sale service, we try our best to provide the conveniences to the clients and make full use of our 300-410 guide materials. We organize the expert team to compile the 300-410 Practice Guide elaborately and constantly update them. To let the clients have a fundamental understanding of our 300-410 training materials, we provide the free trials of our 300-410 exam questions before their purchasing.

What's Involved in the Certification Path

300-410 is not the only test one has to ace to become the Cisco CCNP Enterprise certified, There is also a core exam, 350-401 ENCOR that validates the candidate's proficiency in basic networking principles. Still, 350-401 is a mandatory step while 300-410 can be replaced with any of the other concentration tests chosen from the five more alternatives available.

Apart from being a prerequisite for the CCNP Enterprise certificate, 300-410 Exam also earns an individual the Cisco Certified Specialist – Enterprise Advanced Infrastructure Implementation certification.

First-Grade Practical 300-410 Information | Easy To Study and Pass Exam at first attempt & Top Cisco Implementing Cisco Enterprise Advanced Routing and Services

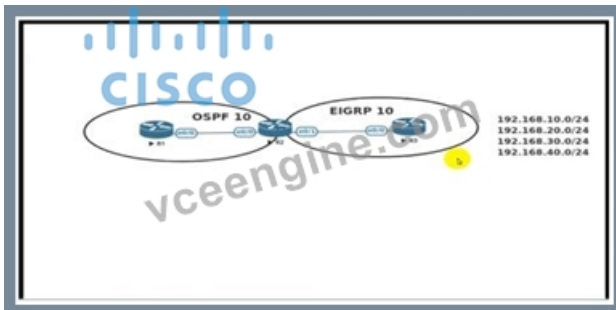

In order to let you understand our products in detail, our 300-410 test torrent has a free trial service for all customers. You can download the trial version of our 300-410 study torrent before you buy our products, you will develop a better understanding of our products by the trial version. In addition, the buying process of our 300-410 Exam Prep is very convenient and significant. You will receive the email from our company in 5 to 10 minutes after you pay successfully; you just need to click on the link and log in, then you can start to use our 300-410 study torrent for studying.

To prepare for the Cisco 300-410 Exam, candidates should have a strong understanding of networking fundamentals and experience working with Cisco routers and switches. It is also recommended that candidates have experience with advanced routing and services technologies, such as VPNs, QoS, and network services.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q110-Q115):

NEW QUESTION # 110

Refer to the exhibit.

An engineer must redistribute networks 192.168.10.0/24 and 192.168.20.0/24 into OSPF from EIGRP, where the metric must be added when traversing through multiple hops to start an external route of 20. The engineer notices that the external metric is fixed and does not add at each hop. Which configuration resolves the issue?

```
R2(config)#access-list 10 permit 192.168.10.0 0.0.0.255
R2(config)#access-list 10 permit 192.168.20.0 0.0.0.255
!
R2(config)#route-map RD permit 10
R2(config-route-map)#match ip address 10
R2(config-route-map)#set metric 20
R2(config-route-map)#set metric-type type-2
!
R2(config)#router ospf 10
R2(config-router)#redistribute eigrp 10 subnets route-map RD

R2(config)#access-list 10 permit 192.168.10.0 0.0.0.255
R2(config)#access-list 10 permit 192.168.20.0 0.0.0.255
!
R2(config)#route-map RD permit 10
R2(config-route-map)#match ip address 10
R2(config-route-map)#set metric 20
R2(config-route-map)#set metric-type type-1
!
R2(config)#router ospf 10
R2(config-router)#redistribute eigrp 10 subnets route-map RD
```

```

R1(config)#access-list 10 permit 192.168.10.0 0.0.0.255
R1(config)#access-list 10 permit 192.168.20.0 0.0.0.255
!
R1(config)#route-map RD permit 10
R1(config-route-map)#match ip address 10
R1(config-route-map)#set metric 20
R1(config-route-map)#set metric-type type-1
!
R1(config)#router ospf 10
R1(config-router)#redistribute eigrp 10 subnets route-map RD

R1(config)#access-list 10 permit 192.168.10.0 0.0.0.255
R1(config)#access-list 10 permit 192.168.20.0 0.0.0.255
!
R1(config)#route-map RD permit 10
R1(config-route-map)#match ip address 10
R1(config-route-map)#set metric 20
R1(config-route-map)#set metric-type type-2
!
R1(config)#router ospf 10
R1(config-router)#redistribute eigrp 10 subnets route-map RD

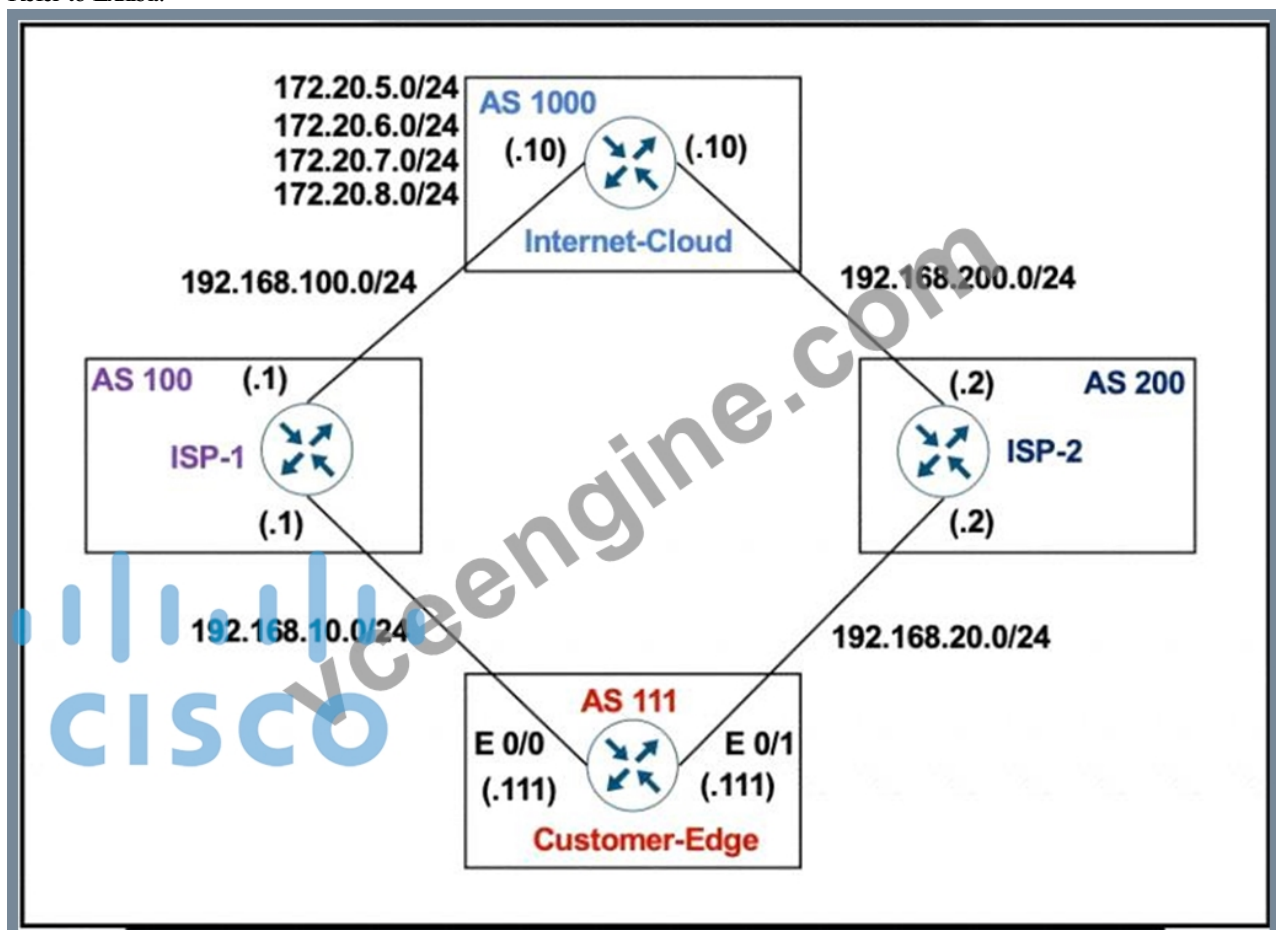

```

- A. Option C
- **B. Option B**
- C. Option D
- D. Option A

Answer: B

NEW QUESTION # 111

Refer to Exhibit:

Customer-Edge

```
ip prefix-list PLIST1 permit 172.20.5.0/24
!
route-map SETLP permit 10
  match ip address prefix-list PLIST1
  set local-preference 90
!
router bgp 111
  neighbor 192.168.10.1 remote-as 100
  neighbor 192.168.10.1 route-map SETLP in
  neighbor 192.168.20.2 remote-as 200
```

AS 111 wanted to use AS 200 as the preferred path for 172.20.5.0/24 and AS 100 as the backup. After the configuration, AS 100 is not used for any other routes. Which configuration resolves the issue?

- A. router bgp 111
no neighbor 192.168.10.1 route-map SETLP in
neighbor 192.168.20.2 route-map SETLP in
- B. router bgp 111
no neighbor 192.168.10.1 route-map SETLP in
neighbor 192.168.10.1 route-map SETLP out
- C. route-map SETLP permit 10
match ip address prefix-list PLIST1
set local-preference 110
route-map SETLP permit 20
- D. route-map SETLP permit 10
match ip address prefix-list PLIST1
set local-preference 99
route-map SETLP permit 20

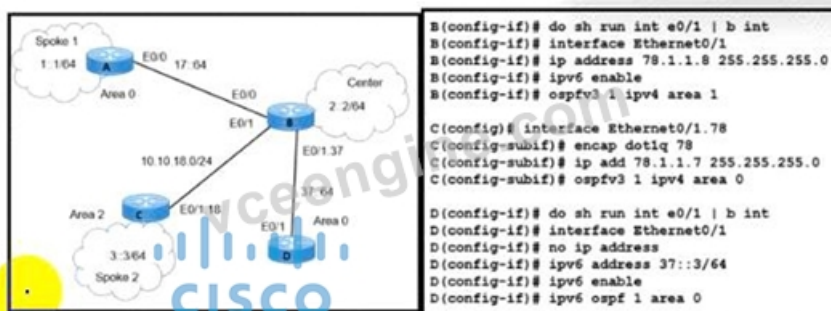

Answer: D

Explanation:

There is an implicit deny all at the end of any route-map so all other traffic that does not match 172.20.5.0/24 would be dropped. Therefore we have to add a permit sequence at the end of the route-map to allow other traffic.

The default value of Local Preference is 100 and higher value is preferred so we have to set the local preference of AS100 lower than that of AS200.

NEW QUESTION # 112

Refer to the exhibit. A network engineer receives a report that Spoke 1 users can perform bank transactions with the server located at the Center site, but Spoke 2 users cannot. Which action resolves the issue?

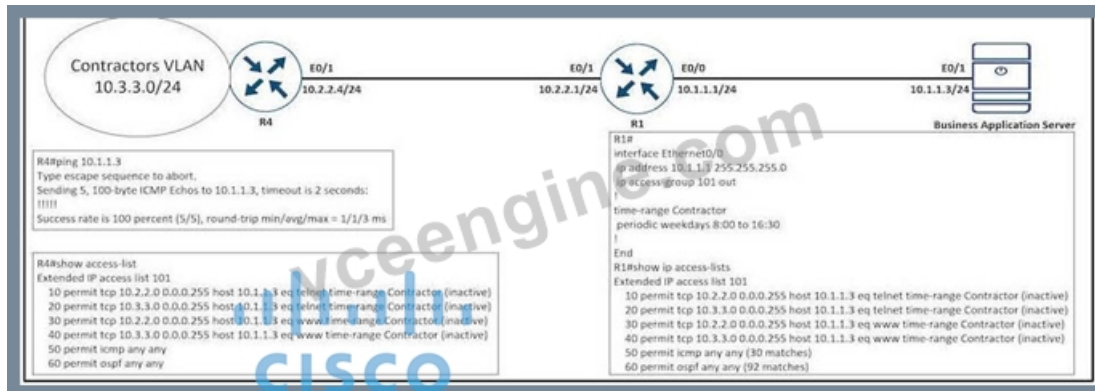

- A. Configure OSPFv2 on the routers B and C interfaces

- B. Configure IPv6 on the routers B and C interfaces
- C. Configure the Spoke 2 users IP on the router B OSPF domain
- D. Configure encapsulation dot1q 78 on the router C interface.

Answer: B

NEW QUESTION # 113

Refer to the exhibit.

An engineer is troubleshooting failed access by contractors to the business application server via Telnet or HTTP during the weekend. Which configuration resolves the issue?

A)

```
R1
time-range Contractor
no periodic weekdays 8:00 to 16:30
periodic daily 8:00 to 16:30
```

B)

```
R4
time-range Contractor
no periodic weekdays 17:00 to 23:59
periodic daily 8:00 to 16:30
```

C)

```
R4
no access-list 101 permit tcp 10.3.3.0 0.0.0.255 host 10.1.1.3 eq telnet time-range Contractor
```

D)

```
R1
no access-list 101 permit tcp 10.3.3.0 0.0.0.255 host 10.1.1.3 eq telnet time-range Contractor
```

- A. Option
- B. Option
- C. Option
- D. Option

Answer: D

NEW QUESTION # 114

Refer to the exhibit. An IT staff member comes into the office during normal office hours and cannot access devices through SSH. Which action should be taken to resolve this issue?

```

interface Ethernet0/0
ip address 10.1.1.1 255.255.255.0
ip access-group 101 in
!
time-range Office-hour
periodic weekdays 08:00 to 17:00
!
access-list 101 permit tcp 10.0.0.0 0.0.0.0 172.16.1.0 0.0.0.255 eq ssh time-range Office-hour

```

- A. Configure the access list in the outbound direction.
- B. Configure the correct time range.
- C. Modify the access list to use the correct IP address.
- D. Modify the access list to correct the subnet mask.

Answer: C
