It can't be denied that professional certification is an efficient way for employees to show their personal 312-39 abilities. In order to get more chances, more and more people tend to add shining points, for example a certification to their resumes. What you need to do first is to choose a right 312-39 Exam Material, which will save your time and money in the preparation of the 312-39 exam. Our 312-39 latest questions is one of the most wonderful reviewing 312-39 study training materials in our industry, so choose us, and together we will make a brighter future.

EC-COUNCIL is a leading organization that provides cybersecurity training and certification programs worldwide. One of the most popular certifications offered by EC-COUNCIL is the Certified SOC Analyst (CSA) certification. The CSA certification exam, also known as the 312-39 exam, is designed to test the knowledge and skills of candidates in the field of security operations center (SOC) analysis.

The Certified SOC Analyst (CSA) certification exam is based on the EC-Council's CSA course, which covers a wide range of topics related to SOC operations. 312-39 course is designed to provide candidates with a comprehensive understanding of the tools, techniques, and processes used in SOC operations. Candidates who successfully pass the exam will be able to demonstrate their ability to identify security incidents, analyze security logs, and respond to security incidents in a timely and effective manner.

EC-COUNCIL 312-39 (Certified SOC Analyst (CSA)) Exam is a certification program designed for individuals who want to establish themselves as experts in the field of security operations center (SOC) analysis. Certified SOC Analyst (CSA) certification program is aimed at IT professionals, security analysts, security engineers, and anyone interested in improving their knowledge and skills in SOC analysis. Certified SOC Analyst (CSA) certification validates the individual's ability to effectively analyze security events, identify potential threats, and respond to security incidents.

## EC-COUNCIL 312-39 Valid Test Sims | Valid Test 312-39 Format

There are quite a few candidates of 312-39 certification exam have already started his career, and there are many examinees facing other challenges in life, so we provide candidates with the most efficient review method of 312-39 exam. In order to let you be rest assured to purchase our products, we offer a variety of versions of the samples of 312-39 Study Materials for your trial. We've helped countless examinees pass 312-39 exam, so we hope you can realize the benefits of our software that bring to you.

## EC-COUNCIL Certified SOC Analyst (CSA) Sample Questions (Q63-Q68):

### NEW QUESTION # 63

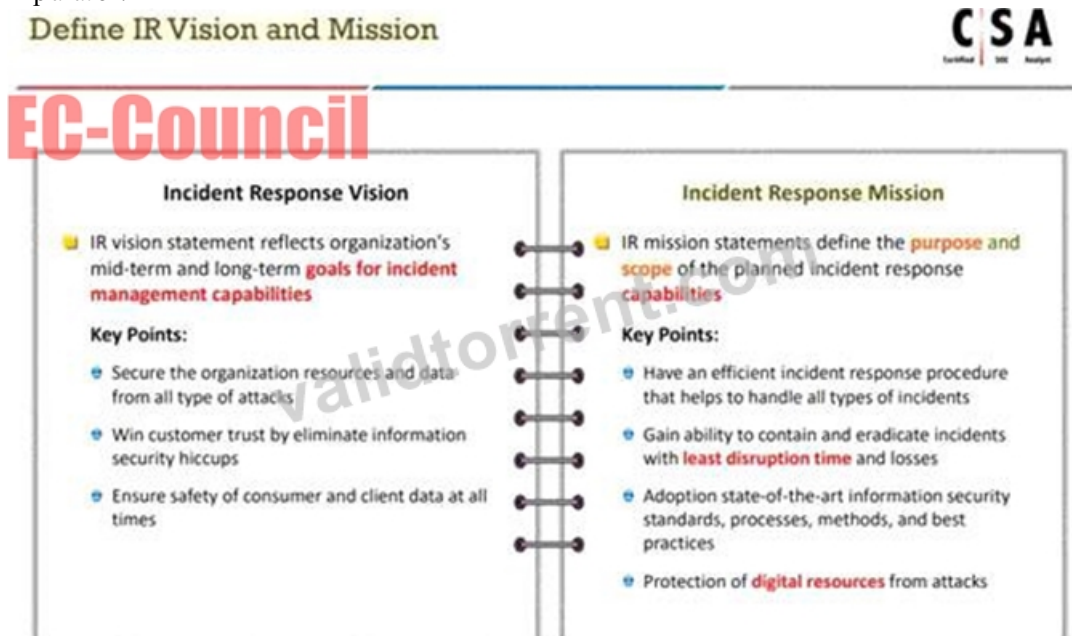

Daniel is a member of an IRT, which was started recently in a company named Mesh Tech. He wanted to find the purpose and

scope of the planned incident response capabilities.  
What is he looking for?

- A. Incident Response Intelligence
- **B. Incident Response Mission**
- C. Incident Response Resources
- D. Incident Response Vision

**Answer: B**

Explanation:

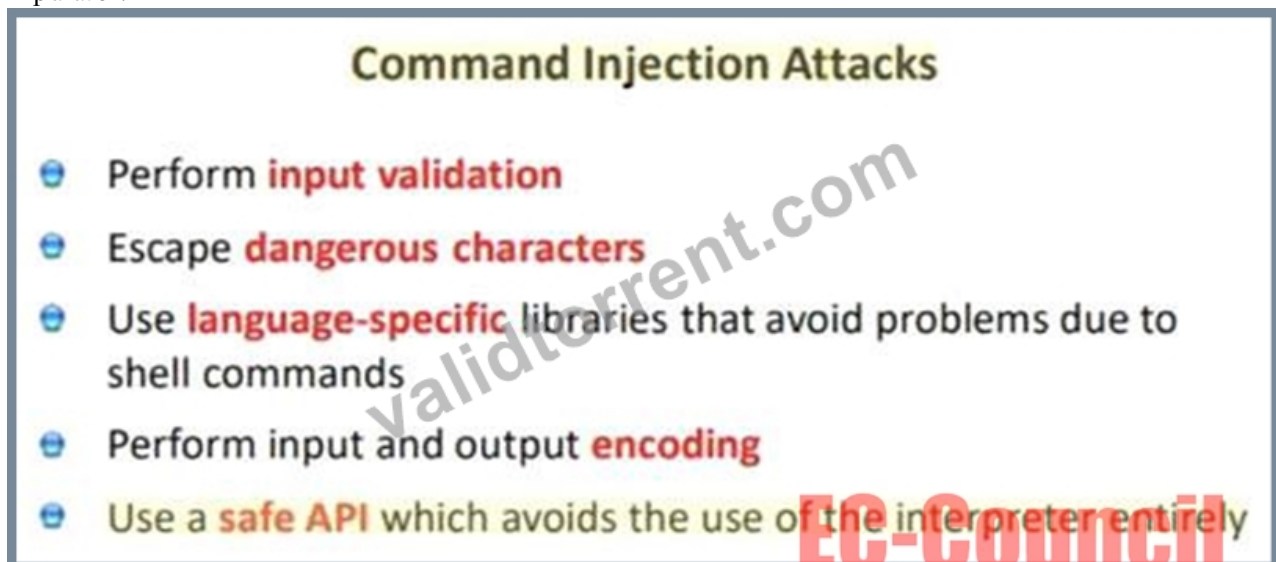

#### NEW QUESTION # 64

Which of the following attack can be eradicated by using a safe API to avoid the use of the interpreter entirely?

- A. SQL Injection Attacks
- **B. Command Injection Attacks**
- C. LDAP Injection Attacks
- D. File Injection Attacks

**Answer: B**

Explanation:

### NEW QUESTION # 65

What does HTTPS Status code 403 represent?

- A. Not Found Error
- B. Unauthorized Error
- C. Internal Server Error
- **D. Forbidden Error**

**Answer: D**

Explanation:

The HTTPS status code 403 represents a Forbidden Error. This error occurs when the server understands the request but refuses to authorize it. Unlike the Unauthorized Error (401), which suggests that the request might be authorized if the client re-authenticates, the Forbidden Error indicates that re-authenticating will make no difference and access is denied regardless of authentication status. The Forbidden Error is tied to the application logic, such as insufficient rights to a resource or the server being programmed to deny access to a particular resource to the client. It is not related to the client's credentials but rather to the permissions set by the server for the requested resource.

References: The EC-Council SOC Analyst course materials and study guides discuss various HTTP status codes as part of understanding web application security and interpreting web logs within a Security Operations Center (SOC) context. The materials explain the meaning of the 403 Forbidden Error and its implications for cybersecurity analysis<sup>123</sup>.

### NEW QUESTION # 66

According to the Risk Matrix table, what will be the risk level when the probability of an attack is very high, and the impact of that attack is major?

NOTE: It is mandatory to answer the question before proceeding to the next one.

- A. Medium
- B. Extreme
- C. Low
- **D. High**

**Answer: D**

### NEW QUESTION # 67

Which of the following is a Threat Intelligence Platform?

- **A. TC Complete**
- B. Keepnote
- C. SolarWinds MS
- D. Apility.io

**Answer: A**

Explanation:

ThreatConnect Complete (TC Complete) is a Threat Intelligence Platform (TIP) designed to aggregate, analyze, and disseminate threat intelligence data. TIPs like TC Complete enable organizations to understand and act upon threats by providing a comprehensive view of the threat landscape, integrating with other security tools, and facilitating collaboration among security teams. Unlike general management systems like SolarWinds MS, note-taking applications like Keepnote, or threat intelligence APIs like Apility.io, TC Complete is specifically built to handle the lifecycle of threat intelligence, from collection and analysis to sharing and applying intelligence. This makes it a pivotal tool for organizations looking to enhance their security posture through informed decision-making based on timely and relevant threat intelligence.
