BTW, DOWNLOAD part of DumpExam DP-300 dumps from Cloud Storage: <https://drive.google.com/open?id=13pEbe88nQQCw9JQyfiODkH1SBGVLvp6Y>

Just like the old saying goes, there is no royal road to success, and only those who do not dread the fatiguing climb of gaining its numinous summits. In a similar way, there is no smoothly paved road to the DP-300 Certification. You have to work on it and get started from now. If you want to gain the related certification, it is very necessary that you are bound to spend some time on carefully preparing for the Microsoft exam, including choosing the convenient and practical study materials, sticking to study and keep an optimistic attitude and so on.

The DP-300 certification exam is ideal for IT professionals who are looking to advance their career in database administration and gain recognition for their expertise in the field. As more and more organizations adopt cloud-based solutions, the demand for skilled database administrators who can manage and maintain databases on Azure is rapidly increasing. By earning this certification, candidates can demonstrate their proficiency in using Azure technologies and gain a competitive edge in the job market. Moreover, the DP-300 certification is a prerequisite for the Microsoft Certified: Azure Database Administrator Associate certification, which further validates the candidate's skills in managing and maintaining Azure databases.

The DP-300 Certification Exam covers a wide range of topics related to database administration, including designing and implementing database solutions on Azure, managing and monitoring databases, ensuring database security, and performing backups and restores. It also covers advanced topics such as designing for high availability and disaster recovery, implementing Azure SQL Database features, and managing Azure Synapse Analytics.

Exam DP-300 Certification Cost - DP-300 Test Questions

The experts in our company have been focusing on the DP-300 examination for a long time and they never overlook any new knowledge. The content of our study materials has always been kept up to date. Don't worry if any new information comes out after your purchase of our DP-300 study guide. We will inform you by E-mail when we have a new version. With our great efforts, our study materials have been narrowed down and targeted to the DP-300 examination. So you don't need to worry about wasting your time on useless DP-300 exam materials information.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q18-Q23):

NEW QUESTION # 18

You need to provide an implementation plan to configure data retention for ResearchDB1. The solution must meet the security and compliance requirements.

What should you include in the plan?

- A. Configure the Deleted databases settings for ResearchSrvOL
- B. Configure the Advanced Data Security settings for ResearchDBL
- C. Deploy and configure an Azure Backup server.

- D. Configure the Manage Backups settings for ResearchSrvOL

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/long-term-backup-retention-configure>

NEW QUESTION # 19

You configure backups for an Azure SQL database as shown in the following exhibit.

Point-in-time-restore
Specify how long you want to keep your point-in-time backups. [Learn more](#)

How many days would you like PITR backups to be kept? ⓘ

14

Long-term retention
Specify how long you want to keep your long-term retention backups. You may choose to keep yearly backups for up to 10 years. [Learn more](#)

Weekly LTR Backups
Keep weekly backups for:

52 Week(s)

Monthly LTR Backups
Keep the first backup of each month for:

60 Week(s)

Yearly LTR Backups
Keep an annual backup for:

10 Year(s)

Which weekly backup of the year would you like to keep?

Week 52

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

To restore from a failure that occurred two days ago and caused minimal data loss, you must use a [answer choice]

After the 52nd weekly backup runs, there will be [answer choice] in long term retention.

point-time restore (PITR) backup.
point-time restore (PITR) backup.
yearly long-term retention (LTR) backup.
weekly long-term retention (LTR) backup.
monthly long-term retention (LTR) backup.

65 backup copies
1 backup copy
52 backup copies
64 backup copies
65 backup copies

Answer:

Explanation:

Answer Area

To restore from a failure that occurred two days ago and caused minimal data loss, you must use a [answer choice]

After the 52nd weekly backup runs, there will be [answer choice] in long term retention.

point-time restore (PITR) backup.
 point-time restore (PITR) backup.
 yearly long-term retention (LTR) backup.
 weekly long-term retention (LTR) backup.
 monthly long-term retention (LTR) backup.

65 backup copies
 1 backup copy
 52 backup copies
 64 backup copies
 65 backup copies

Explanation:

Answer Area

To restore from a failure that occurred two days ago and caused minimal data loss, you must use a [answer choice]

After the 52nd weekly backup runs, there will be [answer choice] in long term retention.

point-time restore (PITR) backup.

65 backup copies

NEW QUESTION # 20

Hotspot Question

You have an Azure subscription that is linked to a hybrid Azure Active Directory (Azure AD) tenant. The subscription contains an Azure Synapse Analytics SQL pool named Pool1.

You need to recommend an authentication solution for Pool1. The solution must support multi- factor authentication (MFA) and database-level authentication.

Which authentication solution or solutions should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

MFA:

Azure AD authentication
 Microsoft SQL Server authentication
 Passwordless authentication
 Windows authentication

Database-level authentication:

Application roles
 Contained database users
 Database roles
 Microsoft SQL Server logins

Answer:

Explanation:

Answer Area

MFA:

	▼
Azure AD authentication	
Microsoft SQL Server authentication	
Passwordless authentication	
Windows authentication	

Database-level authentication:

	▼
Application roles	
Contained database users	
Database roles	
Microsoft SQL Server logins	

Explanation:

Box 1: Azure AD authentication

Azure Active Directory authentication supports Multi-Factor authentication through Active Directory Universal Authentication.

Box 2: Contained database users

Azure Active Directory Uses contained database users to authenticate identities at the database level.

Incorrect:

SQL authentication: To connect to dedicated SQL pool (formerly SQL DW), you must provide the following information:

- Fully qualified servername
- Specify SQL authentication
- Username
- Password
- Default database (optional)

Reference:

<https://docs.microsoft.com/en-us/azure/synapse-analytics/sql-data-warehouse/sql-data-warehouse-authentication>

NEW QUESTION # 21

You have an Azure subscription.

You need to deploy an Azure SQL resource that will support cross database queries by using an Azure Resource Manager (ARM) template.

How should you complete the ARM template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
"resources": [
  ...
  "type": [
    Microsoft.Sql/servers
    Microsoft.Sql/servers/databases
    Microsoft.Sql/managedInstances
  ],
  "name": "[parameters('targetName')]",
  "location": "[parameters('location')]",
  "sku": {
    "name": "[parameters('skuName')]"
  },
  ...
  "dependsOn": [
    "[parameters('targetName')]",
    "[parameters('virtualNetworkName')]",
    "[variables('networkSecurityGroupName')]",
  ],
  "properties": {
    "administratorLogin": "[parameters('administratorLogin')]",
    "administratorLoginPassword": "[parameters('administratorLoginPassword')]",
    "subnetId": "[resourceId('Microsoft.Network/virtualNetworks/subnets', parameters('virtualNetworkName'), parameters('virtualNetworkName'), parameters('subnetName'))]",
    "storageSizeInGB": "[parameters('storageSizeInGB')]",
    "vCores": "[parameters('vCores')]",
    "licenseType": "[parameters('licenseType')]"
  },
  ...
]
```

Answer:

Explanation:

Answer Area

```
"resources": [
  ...
  "type": [
    Microsoft.Sql/servers
    Microsoft.Sql/servers/databases
    Microsoft.Sql/managedInstances
  ],
  "name": "[parameters('targetName')]",
  "location": "[parameters('location')]",
  "sku": {
    "name": "[parameters('skuName')]"
  },
  ...
  "dependsOn": [
    "[parameters('targetName')]",
    "[parameters('virtualNetworkName')]",
    "[variables('networkSecurityGroupName')]",
  ],
  "properties": {
    "administratorLogin": "[parameters('administratorLogin')]",
    "administratorLoginPassword": "[parameters('administratorLoginPassword')]",
    "subnetId": "[resourceId('Microsoft.Network/virtualNetworks/subnets', parameters('virtualNetworkName'), parameters('virtualNetworkName'), parameters('subnetName'))]",
    "storageSizeInGB": "[parameters('storageSizeInGB')]",
    "vCores": "[parameters('vCores')]",
    "licenseType": "[parameters('licenseType')]"
  },
  ...
]
```

NEW QUESTION # 22

You have an Azure SQL database that contains a table named Employees. Employees contains a column named Salary. You need to encrypt the Salary column. The solution must prevent database administrators from reading the data in the Salary column and must provide the most secure encryption.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Encrypt the Salary column by using the randomized encryption type.	
Create a column encryption key.	
Enable Transparent Data Encryption (TDE).	
Encrypt the Salary column by using the deterministic encryption type.	
Apply a dynamic data mask to the Salary column.	
Create a column master key.	

Answer:

Explanation:

Answer Area
Create a column master key
Create a column encryption key.
Encrypt the Salary column by using the randomized encryption type.

- 1 - Create a column master key
- 2 - Create a column encryption key.
- 3 - Encrypt the Salary column by using the randomized encryption type.
