Microsoft GH-300 Exam Syllabus Topics:

Topic	Details
Topic 1	• Domain 6: Testing with GitHub Copilot: This section measures abilities of QA Engineers and Test Automation Specialists to use Copilot for test generation, including unit and integration tests. It explains how Copilot can identify edge cases and assist in writing assertions. The domain also covers different Copilot subscription SKUs, privacy considerations, organizational code suggestion settings, and configuration files related to Copilot.
Topic 2	• GitHub Copilot Plans and Feature: This domain targets Product Managers and DevOps Engineers and focuses on understanding the various GitHub Copilot subscription plans like Individual, Business, and Enterprise, including distinctions and management features. It covers how Copilot is integrated into IDEs, different triggering methods for code suggestions, organizational policy management, subscription administration via API, and effective use of Copilot Chat and Knowledge Bases. Candidates also learn about CLI usage and configuration.
Topic 3	• How GitHub Copilot Works and Handles Data: Designed for Machine Learning Engineers and Data Privacy Specialists, this section covers the data lifecycle and processing behind Copilot's code suggestions. It explains how context is gathered, prompts constructed, responses generated, and post-processed through proxy services. Candidates understand Copilot's data policies, handling of inputs, and limitations such as context window size and data age influencing suggestion relevance.
Topic 4	• Developer Use Cases for AI: Targeting Software Engineers and Technical Leads, this domain elaborates on how AI improves developer productivity across common tasks like learning new languages, translation, documentation, debugging, data science, and refactoring. It discusses Copilot's support in software development lifecycle management and highlights its limitations. Use of the productivity API to track Copilot's impact is also included.

2025 GH-300 Valid Test Blueprint | Accurate 100% Free New Guide GH-300 Files

Up to now, we have successfully issued three packages for you to choose. They are PDF version, online test engines and windows software of the GH-300 study materials. The three packages can guarantee you to pass the exam for the first time. Also, they have respect advantages. Modern people are busy with their work and life. You cannot always stay in one place. So the three versions of the GH-300 study materials are suitable for different situations. For instance, you can begin your practice of the GH-300 Study Materials when you are waiting for a bus or you are in subway with the PDF version. When you are at home, you can use the windows software and the online test engine of the GH-300 study materials. When you find it hard for you to learn on computers, you can learn the printed materials of the GH-300 study materials. What is more, you absolutely can afford fort the three packages. The price is set reasonably.

Microsoft GitHub Copilot Sample Questions (Q70-Q75):

NEW QUESTION # 70
What practices enhance the quality of suggestions provided by GitHub Copilot? (Select three.)

- A. Use a .gitignore file to exclude irrelevant files
- B. Clearly defining the problem or task
- C. Using meaningful variable names
- D. Including personal information in the code comments
- E. Providing examples of desired output

Answer: B,C,E

Explanation:
The quality of Copilot's suggestions is enhanced by clearly defining the task, using meaningful variable names, and providing examples of the desired output.

NEW QUESTION # 71
How can you improve the context used by GitHub Copilot? (Each correct answer presents part of the solution.
Choose two.)

- A. By opening the relevant tabs in your IDE
- B. By adding the important files to your .gitconfig
- C. By adding relevant code snippets to your prompt
- D. By adding the full file paths to your prompt of important files

Answer: A,C

Explanation:
Improving the context for GitHub Copilot involves opening relevant files in your IDE to provide immediate context and adding relevant code snippets directly to your prompts to give Copilot specific examples and information.
Reference: GitHub Copilot prompt engineering and context management.

NEW QUESTION # 72
How does GitHub Copilot Chat help in understanding the existing codebase?

- A. By providing visual diagrams of the code structure.
- B. By answering questions about the code and generating explanations.
- C. By running code linters and formatters.
- D. By automatically refactoring code to improve readability.

Answer: B

Explanation:
GitHub Copilot Chat helps in understanding existing codebases by answering questions about the code and generating explanations.
This allows developers to quickly grasp the functionality and structure of unfamiliar code.
Reference: GitHub Copilot Chat documentation on code understanding.

NEW QUESTION # 73
What is a benefit of using custom models in GitHub Copilot?

- A. Responses use the organization's LLM engine
- B. Responses are guaranteed to be correct
- C. Responses use practices and patterns in your repositories
- D. Responses are faster to produce and appear sooner

Answer: C

Explanation:
Custom models in GitHub Copilot allow the tool to learn from the specific code patterns and practices within your repositories. This results in suggestions that are more aligned with your organization's coding standards and conventions, improving the relevance and accuracy of the generated code.
Reference: GitHub Copilot Enterprise documentation on custom models.

NEW QUESTION # 74
How does GitHub Copilot assist developers in reducing the amount of manual boilerplate code they write?

- A. By refactoring the entire codebase to eliminate boilerplate code without developer input.
- B. By engaging in real-time collaboration with multiple developers to write boilerplate code.
- C. By predicting future coding requirements and pre-emptively generating boilerplate code.
- D. By suggesting code snippets that can be reused across different parts of the project.

Answer: D

Explanation:
"Copilot helps reduce boilerplate by suggesting reusable code snippets for repetitive structures across your project." This proves that Copilot saves time by generating reusable snippets, not by preemptively or automatically refactoring entire codebases.
References: GitHub Copilot productivity documentation.

NEW QUESTION # 75
......

To make sure your possibility of passing the certificate, we hired first-rank experts to make our GH-300 practice materials. So the proficiency of our team is unquestionable. They help you to review and stay on track without wasting your precious time on useless things. By handpicking what the GH-300 practice exam usually tested in exam and compile them into our GH-300 practice materials, they win wide acceptance with first-rank praise. To go with the changing neighborhood, we need to improve our efficiency of solving problems as well as the new contents accordingly, so all points are highly fresh about in compliance with the syllabus of the exam.
