## Valid Professional Scrum Master I test answers, valid PSM-I exam dumps

Users are buying something online (such as PSM-I learning materials), always want vendors to provide a fast and convenient sourcing channel to better ensure the user's use. Because without a quick purchase process, users of our PSM-I learning materials will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our PSM-I Learning Materials. All users can implement fast purchase and use our learning materials.

The PSM-I exam is a rigorous and challenging test that requires a deep understanding of Scrum principles and practices. PSM-I exam consists of 80 multiple-choice questions that cover a wide range of topics, including Scrum theory, Scrum roles, Scrum events, and Scrum artifacts. PSM-I Exam is timed, and candidates have 60 minutes to complete it. To pass the exam, candidates must score at least 85% or 68 out of 80 questions.

## Scrum Professional Scrum Master I Sample Questions (Q183-Q188):

### NEW QUESTION # 183

Where are two good ways for the Development Team to make non-functional requirements visible?  
(Choose two.)

- A. Run the integration and regression tests before the end of the Sprint, and capture the open work for the Sprint Backlog of the next Sprint.
- B. Put them on a separate list on the Scrum board, available for all to see.
- C. Add them to the definition of "Done" so the work is taken care of every Sprint.
- D. Add them to the Product Backlog and keep the Product Owner posted on the expected effort.
- E. Run the integration and regression tests before the end of the Sprint, and capture the open work for the Sprint Backlog of the next Sprint.

Answer: C,D

#### NEW QUESTION # 184

Which are characteristics of the Daily Scrum?  
(choose the best two answers)

- A. It is held first thing in the morning.
- B. It is free form and designed to promote conversation.
- C. Its location and time remain constant.
- D. It consists of the Scrum Master asking the team for status.
- E. It is facilitated by the team lead.
- F. Its purpose is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog.

**Answer: C,F**

Explanation:

According to the Scrum Guide, two characteristics of the Daily Scrum are its location and time remain constant and its purpose is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog. These characteristics promote consistency, transparency, and adaptation within the Development Team. The other options are not valid characteristics of the Daily Scrum, as they are either irrelevant (such as being held first thing in the morning) or inappropriate (such as being free form, facilitated by the team lead, or consisting of the Scrum Master asking for status).

#### NEW QUESTION # 185

You are the Scrum Master of a new, to be developed product. Development is going to require 45 people. What is a good first question for you to suggest the group thinks about when forming into teams? (Choose the best answer.)

- A. How will we make sure all teams have the right amount of expertise?
- B. Who are the subject matter experts on each team?
- C. Who are going to be the team leads?
- D. What is the right mixture of senior and junior people on each team?

**Answer: A**

#### NEW QUESTION # 186

Which approach is best for Scrum Teams in order to produce valuable Increments? (Choose the best answer.)

- A. Each Developer works on the component where they feel that they can contribute.
- B. Each Scrum Team works on an independent set of components.
- C. Each Scrum Member works only as an independent layer of the system.
- D. Each Scrum Team is accountable for developing functionality from beginning to end.

**Answer: A**

#### NEW QUESTION # 187

What factor should be considered when establishing the Sprint length?  
(choose the best answer)

- A. The organization's release schedule.
- B. The need for the team to learn based on doing work and measuring results.
- C. The frequency at which team formation can be changed.
- D. The organization has mandated similar length sprints.

**Answer: B**

Explanation:

The best answer is B. The need for the team to learn based on doing work and measuring results.

The Sprint length should be chosen based on the complexity and volatility of the product and the environment, as well as the team's capability and Definition of Done. The Sprint length should enable the team to deliver a usable Increment of value that meets the

feedback needs of the stakeholders and the business. The Sprint length should also allow the team to inspect and adapt their work processes and practices based on the outcomes of the Sprint.

The other options are not valid reasons for choosing the Sprint length. The organization's mandate, team formation, and release schedule should not dictate the Sprint length, but rather be aligned with it. The Scrum Team should have the autonomy to choose the Sprint length that best suits their product and context.

You can learn more about how to choose the right Sprint length from these sources: How Long A Sprint Should Be?, How to Choose the Right Sprint Length in Scrum, What is a Sprint?, Determining the Sprint Length, and Sprint Length: What's the Right Length?.
