

Actualtests4sure Microsoft PL-300 Web-based Practice Exam

P.S. Free 2025 Microsoft PL-300 dumps are available on Google Drive shared by Actualtests4sure: <https://drive.google.com/open?id=1g9BU1LE4h-dXPH74mPhDRKFmDW9iM40n>

Our PL-300 practice materials from our company are invulnerable. And we are consigned as the most responsible company in this area. So many competitors concede our superior position in the market. Besides, we offer some promotional benefits for you. The more times you choose our PL-300 Training Materials, the more benefits you can get, such as free demos of our PL-300 exam dumps, three-version options, rights of updates and so on. So customer orientation is the beliefs we honor.

Is Microsoft Power BI Data Analyst Certification Exam Worth It

There are many IT certifications available in the market today, but if you are looking for a job as a data analyst then you should give this certification a chance. This certification will help you to stand out from the crowd and get hired easily by many companies. Microsoft Power BI Data Analyst Certification Exam is the most valuable certification program for IT professionals in their respective fields. Microsoft **PL-300 Dumps** is a must-have certificate for all IT professionals who want to pursue their career in the field of data analytics.

The Microsoft Power BI Data Analyst Certification Exam is a certification exam that will help you to demonstrate your expertise in using the Microsoft Power BI platform. This exam tests the candidate's ability to analyze data with Power BI and create reports that are accurate, insightful and easy to read. Once you pass this exam, you will receive a certificate that shows your competence in performing these tasks. The certificate is valid for three years, so if you want to keep your skills up-to-date then you should take additional training during this time period.

Fast Download PL-300 Actual Test Answers | Easy To Study and Pass Exam at first attempt & Excellent Microsoft Microsoft Power BI Data Analyst

Our company has been engaged in compiling professional PL-300 exam quiz in this field for more than ten years. Our large amount of investment for annual research and development fuels the invention of the latest PL-300 study materials, solutions and new technologies so we can better serve our customers and enter new markets. We invent, engineer and deliver the best PL-300 Guide questions that drive business value, create social value and improve the lives of our customers.

Microsoft PL-300 exam is a certification test designed for individuals who want to validate their skills and knowledge in using Microsoft Power BI. PL-300 exam is also known as the Microsoft Power BI Data Analyst certification, and it covers a wide range of topics related to data analytics, business intelligence, and data visualization.

The Microsoft Power BI Data Analyst certification exam is intended for data analysts, business analysts, and other professionals who work with data to make informed business decisions. PL-300 Exam is focused on testing the candidate's ability to design, develop, and manage Power BI solutions, including data modeling, data preparation, and report creation. PL-300 exam also covers advanced topics such as DAX formulas, data governance, and collaboration.

Microsoft Power BI Data Analyst Sample Questions (Q398-Q403):

NEW QUESTION # 398

You are enhancing a Power BI model that has DAX calculations.

You need to create a measure that returns the year-to-date total sales from the same date of the previous calendar year.

Which DAX functions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
Sales PYTD =
```

```
VAR startyear =
```

```
    STARTOFYEAR ( PREVIOUSYEAR ( 'Date' [Date] ) )
```

```
VAR enddate =
```

```
    LASTDATE ( Sales[Date] ) - 365
```

```
RETURN
```

	▼
CALCULATE (	
DATESBETWEEN (	
SAMEPERIODLASTYEAR (	
SLIM (	

```
    ( Sales[Sales] ),
```

	▼
CALCULATE	
DATESBETWEEN	
SAMEPERIODLASTYEAR	
SLIM	

```
    ( 'Calendar' [Date], startyear, enddate )
```

```
)
```

Answer:

Explanation:

Sales PYTD =

VAR startyear =

STARTOFYEAR (PREVIOUSYEAR ('Date' [Date]))

VAR enddate =

LASTDATE (Sales[Date]) - 365

RETURN

(Sales[Sales]),

CALCULATE (|
DATESBETWEEN (|
SAMEPERIODLASTYEAR (|
SLIM (|

('Calendar'[Date], startyear, enddate)

CALCULATE
DATESBETWEEN |
SAMEPERIODLASTYEAR
SLIM

Explanation:

sales PYTD =

VAR startyear =

STARTOFYEAR (PREVIOUSYEAR ('Date' [Date]))

VAR enddate =

LASTDATE (Sales[Date]) - 365

RETURN

(Sales[Sales]),

CALCULATE (|
DATESBETWEEN (|
SAMEPERIODLASTYEAR (|
SLIM (|

('Calendar'[Date], startyear, enddate

CALCULATE
DATESBETWEEN
SAMEPERIODLASTYEAR
SLIM

NEW QUESTION # 399

Case Study 4 - Contoso Ltd 2

Overview

Contoso, Ltd. is a manufacturing company that produces sports equipment. Contoso holds quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including balance sheets and profit and loss statements for each of the company's four business units.

Existing Environment

Data and Sources

Data for the reports comes from the sources shown in the following table.

Data type	Description
Azure SQL database	Detailed revenue, cost, and expense data Uses a public endpoint
Microsoft Dynamics 365 Business Central	Summary balance sheet data and product catalog data

The balance sheet data is unrelated to the profit and loss results other than they both relate to dates.

Balance Sheet Data

The balance sheet data is imported and includes the final monthly balances of each account in the format shown in the following table.

AccountCategory	Account	Month	Year	BalanceAmount
Current assets	Cash and cash equivalents	3	2020	20,289
Current assets	Inventories	3	2020	4,855
Long-term liabilities	Long-term debt	3	2020	50,207
Current assets	Cash and cash equivalents	2	2020	28,209
Current assets	Inventories	2	2020	5,845
Long-term liabilities	Long-term debt	2	2020	49,887
Current assets	Cash and cash equivalents	1	2020	25,567
Current assets	Inventories	1	2020	65,998
Long-term liabilities	Long-term debt	1	2020	46,124

The balance sheet data always includes a row for each account for each month.

Product Catalog Data

The product catalog shows how products roll up to product categories, which roll up to the business units. The product list is provided in the format shown in the following table.

Product ID	Product name	Product description	Product category	Business unit
HL-U509-R	Sport-100 Helmet, Red	Universal fit, well-vented, lightweight, snap-on visor	Accessories	Unit A
RA-H123	Hitch Rack - 4-Bike	Carries four bikes securely, steel construction, fits a 2-inch receiver hitch	Accessories	Unit A
BK-M18S-40	Mountain-500 Silver, 40	Suitable for any type of riding, on- or off-road, fits any budget, smooth-shifting with a comfortable ride	Bikes	Unit B
FD-2342	Front Derailleur	Wide-link design	Components	Unit A

Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

Business Issues

Historically, it has taken two analysts a week to prepare the reports for the quarterly board meetings. Also, there is usually at least

one issue each quarter where a value in a report is wrong because of a bad cell reference in an Excel formula. On occasion, there are conflicting results in the reports because the products and departments that roll up to each business unit are not defined consistently.

Requirements

Planned Changes

Contoso plans to automate and standardize the quarterly reporting process by using Power BI.

The company wants to reduce how long it takes to populate the reports to less than two days.

The company wants to create common logic for the business units, products, and departments.

The logic will be used across all reports, including but not limited to the quarterly reporting for the board.

Technical Requirements

Contoso wants the reports and datasets refreshed with minimum manual effort.

The company wants to provide the board with a single package of reports that will contain custom navigation and links to supplementary information.

Maintenance, including manually updating data and access, must be minimized as much as possible.

Security Requirements

The reports must be made available to the board from powerbi.com. An Azure Active Directory (Azure AD) group will be used to share information with the board.

Contoso identifies the following security requirements for analyst access:

- Analysts must be able to access all balance sheet and product catalog data.
- Analysts must be able to access only the profit and loss data of their respective business unit.
- Analysts must be able to create new reports from the dataset that contains the profit and loss data, but the reports built by the analysts must NOT be included in the quarterly reports for the board.
- Analysts must NOT be able to share the quarterly reports with anyone.
- Analysts must NOT be able to make new reports by using the balance sheet data.

Report Requirements

You plan to relate the balance sheet table to a date table in Power BI in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

The date table will contain the columns shown in the following table.

Column name	Data type	Sample value
Date	Date	4-Apr-2020
Month	Integer	202004
Month Name	Text	February
Quarter	Integer	20202
Year	Integer	2020

The definitions and attributes for the products, departments, and business units must be consistent across all the reports.

The board must be able to get the following information from the quarterly reports:

- Revenue trends over time
- The ending balances of each account
- Changes in long-term liabilities from the previous quarter
- The percent of total revenue contributed by each product category
- A comparison of quarterly revenue versus the same quarter from the previous year
- The reports must be updated with the latest data by 5 AM each day.

What is the minimum number of Power BI datasets needed to support the reports?

- A. a single DirectQuery dataset
- **B. a single imported dataset**
- C. two imported datasets
- D. two DirectQuery datasets

Answer: B

NEW QUESTION # 400

You have a report in Power BI Desktop as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

Note: Each correct selection is worth one point.

The goal is set by using [answer choice].

▼
a calculated measure
a DAX formula
the Format settings

To configure the visualization to display TotalPrice for the Territory of Canada always, you must add the Territory column to [answer choice].

▼
the Tooltips field
the Values field
the Visual level filters field

Answer:

Explanation:

The goal is set by using [answer choice].

▼
a calculated measure
a DAX formula
the Format settings

To configure the visualization to display TotalPrice for the Territory of Canada always, you must add the Territory column to [answer choice].

▼
the Tooltips field
the Values field
the Visual level filters field

You attempt to publish a Microsoft Excel file to Power BI, and you receive the error message shown in the exhibit. (Click the Exhibit button.)

The file is in c:\data\.

You need to ensure that you can publish the file to Power BI.

What should you do first?

- A. Decrypt the workbook.
- B. Set the file attributes to read-only.
- C. Add a digital signature to the workbook.
- D. Save the file in a Microsoft SharePoint document library.

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/power-bi/service-publish-from-excel>

NEW QUESTION # 402

You have the CSV file shown in the following table.

Month	2021	2022
January	1000	2500
February	4000	5000
March	2800	3400

You use Power Query Editor to preview the data in the file.

You need to transform the data to meet the following requirements:

- * The first column must contain the month.
- * The second column must contain the year.
- * The third column must contain the order amount for the month and year.

Which transformation should you use first?

- A. transpose
- B. remove
- C. unpivot
- D. pivot

Answer: C
