

ActualTestsIT CWNP CWAP-405 PDF Questions and Practice Test Software

Career grooming with CWAP-405 exams are your right. Rather, it has become necessary in the most challenging scenario of enterprises. Like most of the professionals, you might find it tough and beyond your limits. Here comes the role of ActualTestsIT CWAP-405 Dumps to encourage you and make it possible for you to step ahead with confidence. The growing network of our clientele proves that our dumps work wonders and help you gain a definite success in your CWAP-405 certification exams.

CWAP-405 questions & answers are valid, covering the whole chapter in the actual test and the key points. You can take CWAP-405 pdf torrent as your study reference. After you get the CWAP-405 exam dumps, do not worry about the update, because one year free update is provided to you. Please pay attention to your payment email and check if there is any CWAP-405 Updated Dumps. Dear, if you have any questions about CWAP-405 study torrent, you can contact us by email or online chat as you like. In addition, we have money back guarantee, in case of failure, we will give you full refund.

CWAP-405 New Braindumps Files - CWAP-405 Dumps Free Download

Our company has forged a group of professional experts with the excelsior craftsmanship and a mature service system. The quality of our CWAP-405 latest question is high because our expert team organizes and compiles them according to the real exam's needs and has extracted the essence of all of the information about the test. So our CWAP-405 Certification tool is the boutique among the same kinds of the study materials. Our assiduous pursuit for high quality of our CWAP-405 exam prep creates our top-ranking CWAP-405 test guide and constantly increasing sales volume.

CWNP Certified Wireless Analysis Professional Sample Questions (Q69-Q74):

NEW QUESTION # 69

You have been recently hired as the wireless network administrator for an organization spread across seven locations. They have deployed more than 100 APs, but they have not been managed in either an automated or manual process for more than 18 months. Given this length of time, what is one of the first things you should evaluate from a support perspective?

- A. The data rates allowed
- B. The VLANs in use
- C. The firmware revision
- D. The channels in use

Answer: C

NEW QUESTION # 70

What is the function of the PHY layer?

- A. Convert PSDUs to PPDU for transmissions and PPDU to PSDUs for receptions
- B. Convert MSDUs to PPDU for transmissions and PPDU to MSDUs for receptions
- C. Convert PPDU to MSDUs for transmissions and MSDUs to PPDU for receptions
- D. Convert PPDU to PSDUs for transmissions and PSDUs to PPDU for receptions

Answer: A

Explanation:

The function of the PHY layer is to convert PSDUs to PPDU for transmissions and PPDU to PSDUs for receptions. A PSDU (PHY Service Data Unit) is the data unit that is passed from the MAC layer to the PHY layer for transmission, or from the PHY layer to the MAC layer for reception. A PPDU (PHY Protocol Data Unit) is the data unit that is transmitted or received over the wireless medium by the PHY layer. A PPDU consists of a PSDU and a PHY header, which contains information such as modulation, coding, and data rate.

The PHY layer adds or removes the PHY header to or from the PSDU during the conversion process. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 4: 802.11 Physical Layer, page 97-98

NEW QUESTION # 71

Given a protocol analyzer can decrypt WPA2-PSK data packets providing the PSK and SSID are configured in the analyzer software. When performing packet capture (in a non-FT environment) which frames are required in order for PSK frame decryption to be possible?

- A. 4-Way Handshake
- B. Reassociation
- C. Authentication
- D. Probe Response

Answer: A

Explanation:

The 4-way handshake is the process that establishes the pairwise transient key (PTK) between the client and the AP in WPA2-PSK. The PTK is derived from the PSK, the SSID, and some random numbers exchanged in the handshake frames. The PTK is used to encrypt and decrypt the data frames between the client and the AP. Therefore, in order to decrypt WPA2-PSK data packets, a protocol analyzer needs to capture the 4-way handshake frames and have the PSK and SSID configured in the analyzer software. References:

NEW QUESTION # 72

What is an AIFS?

- A. A variable Interframe Space introduced by 802.11e to help prioritize medium access for different Access Categories
- B. The shortest period of time a STA can sleep
- C. A form of aggregation performed at the PHY layer based on 802.11e UP values interpreted from DSCP values
- D. A medium access method introduced by 802.11n, but never implemented

Answer: A

Explanation:

An AIFS is a variable interframe space introduced by 802.11e to help prioritize medium access for different Access Categories (ACs). An interframe space is a period of time that a STA (station) has to wait before attempting to access the medium. An AIFS is a type of interframe space that varies depending on the AC of the traffic. An AC is a logical queue that corresponds to a QoS (Quality of Service) level for different types of traffic. There are four ACs defined by 802.11e: AC_VO (Voice), AC_VI (Video), AC_BE (Best Effort), and AC_BK (Background). Each AC has a different AIFSN (Arbitration Interframe Space Number) value, which determines how long it has to wait before attempting to access the medium. A lower AIFSN value means a higher priority and a shorter waiting time. The other options are not correct, as they do not describe what an AIFS is. An AIFS is not a medium access method introduced by 802.11n, but never implemented, as it is part of the 802.11e standard and widely used in QoS-enabled WLANs. An AIFS is not a form of aggregation performed at the PHY layer based on 802.11e UP values interpreted from DSCP values, as aggregation is a technique that combines multiple frames into one larger frame to improve efficiency and throughput, not prioritization or medium access. An AIFS is not the shortest period of time a STA can sleep, as sleeping is a power saving mode that allows a STA to conserve battery power by periodically turning off its radio, not accessing the medium. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 7: QoS Analysis, page 194-195

NEW QUESTION # 73

You are concerned about attackers gaining access to your WLAN from outside the facility.

Why does reducing the output power on the APs not provide sufficient certainty that an attacker outside the facility cannot gain access?

- A. Because the attacker will simply use a lower gain antenna and a radio with higher receive sensitivity
- **B. Because the attacker can simply use high gain antennas**
- C. Because RF signals can be received even when weak if using a Mac OS X computer
- D. Because the attacker can increase the output power of the radio on the client

Answer: B

NEW QUESTION # 74

.....

As long as you free download the demos of our CWAP-405 exam braindumps, you will be surprised by the high quality. It is all about the superior concrete and precision of our CWAP-405 learning quiz that help. Every page and every points of knowledge have been written from professional experts who are proficient in this line who are being accounting for this line over ten years. Come and buy our CWAP-405 Study Guide, you will be benefited from it.
