Pass Guaranteed 2025 Adobe AD0-E117: First-grade Adobe Experience Manager Architect Master Latest Dumps Free

Similarly, the TopExamCollection Adobe AD0-E117 practice test creates an actual exam scenario on each and every step so that you may be well prepared before your actual Adobe Experience Manager Architect Master examination time. Hence, it saves you time and money. TopExamCollection provides three months of free updates if you purchase the Adobe AD0-E117 Questions and the content of the examination changes after that.

Earning the Adobe AD0-E117 certification is an excellent way to demonstrate your expertise in AEM to your clients and colleagues. It is a valuable credential that can help you stand out in a crowded marketplace and increase your earning potential. Adobe certification exams are recognized worldwide, and Adobe is a trusted name in the digital marketing industry. By passing the AD0-E117 exam, you can prove to your clients and colleagues that you have the skills and expertise needed to design and architect AEM solutions that meet their business needs.

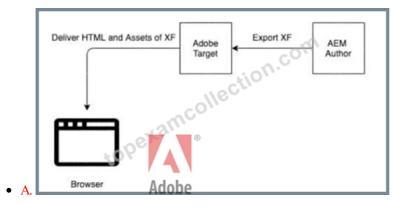

To become an Adobe AD0-E117 Certified professional, you need to have a deep understanding of AEM architecture, including its deployment models, architecture patterns, and best practices. You also need to have hands-on experience in designing and implementing AEM solutions. Adobe recommends that you have at least 5 years of experience in AEM architecture before taking the AD0-E117 certification exam.

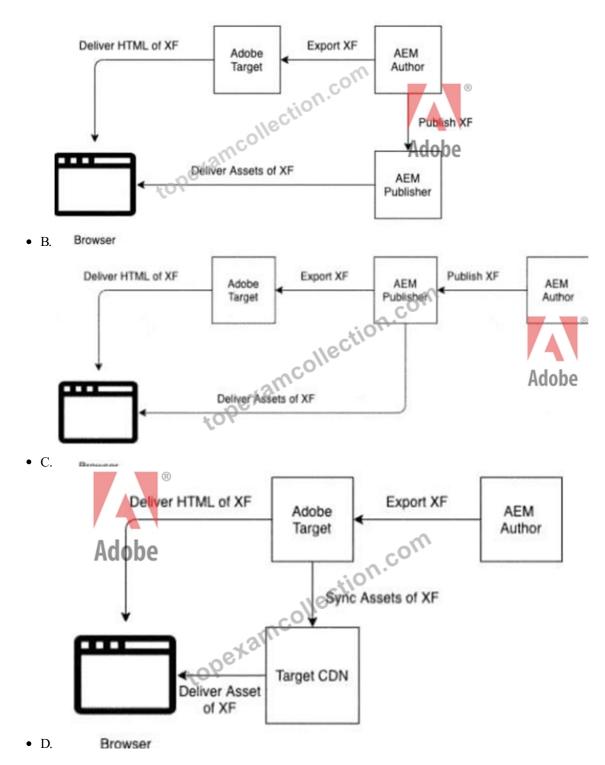

Adobe Experience Manager Architect Master Sample Questions (Q15-Q20):

NEW QUESTION #15

A financial sector client is using AEM 6.5 on premise. The creative team needs to create the content for the various marketing campaigns that are scheduled. The client wants to use Experience Fragments (XF) to accelerate content creation for marketing purposes.

Which Data flow diagram should an Architect use to communicate requirements to the client network team?

Answer: A

Explanation:

A data flow diagram (DFD) is a graphical representation of the flow of data through a system. It shows how data is input, processed, stored, and output in a system. A DFD can be used to communicate requirements to the client network team by showing them how data flows between different components and entities in the system.

NEW QUESTION #16

A customer wants to migrate their AEM environment from an on-premise infrastructure to a public cloud to improve performance. The customer currently hosts many assets (images, videos, documents) in the DAM. Approximately 10 business users frequently upload new assets and update existing assets. Editors then use these assets on the sites.

What should an Architect do as part of this migration?

- A. Set up a horizontally scalable AEM environment on MongoDB
- B. Move to a shared datastore and enable binary less replication
- C. Set up Connected Assets to share the DAM assets in the sites
- D. Run online revision cleanup before moving to the new storage format

Answer: D

Explanation:

"running online revision cleanup before moving to the new storage format can reduce the size of the repository and improve performance".

NEW QUESTION #17

A client requires the ability to create multiple microsites with the same set of components but with different visual variations. The client needs to make sure that an author of a specific microsite is following a specific microsite Style Guide. What approach would the architect take?

- A. Create a set of core components with the required functionalities
 Extend these components and create different versions of them for each one of the microsites Configure the authors' permissions to only be able to access the proper set of components based on which microsite they are authoring
- B. Create a set of core components with the required functionalities
 Create a set of CSS classes that correspond to each visual variation as well as the corresponding CSS code Configure the
 Style System policies in the editable templates that render the required styles based on each microsite
- C. Create a set of core components with the required functionalities

 Create a set of CSS classes that correspond to each visual variation as well as the corresponding CSS code Configure the

 Clientlibs policies in the editable templates that render the required styles based on each microsite
- D. Create a set of core components with the required functionalities

 Extend these components and create different versions of them for each one of the microsites Configure the static templates for each microsite to use the specific set of extended components based on the required design

Answer: D

NEW QUESTION #18

AEM Site users report that the web content pages render very slowly. An Architect notices that the CPU usages of the AEM Publish instances are spiking and reviews the following entry in the log:

[Frt Nov 27 23:11:00 2019] [I] [pid 16004 (tid 140134145820416)] Current cache hit ratio: 47.94 % What should the Architect do to increase the dispatcher cache ratio and prevent the AEM Publish CPU usage spikes?

- A. Review and optimize the Dispatcher cache configuration
- B. Create a cron job that will delete the dispatcher cache on a regular basis
- C. Add additional AEM instances to the Publish Farm
- D. Add additional dispatcher servers

Answer: A

Explanation:

According to Adobe Experience Manager documentation5, dispatcher is a caching and load balancing tool that can be used to improve performance and security of AEM sites. Dispatcher cache configuration can be adjusted using various properties in the dispatcher.any file6. Creating a cron job that will delete the dispatcher cache on a regular basis is not a good idea as it will reduce the cache hit ratio and increase the load on AEM servers.

NEW QUESTION #19

A client is currently using Assets on AEM as a Cloud Service (AEMaaCS). They are also using BrandPortal to share assets with external vendors. A new vendor was added to the Adobe Identity Management System (IMS) and was assigned the BrandPortal Profile. The client created a Contribution Folder in Assets but was unable to find the new user that was added in IMS to give them permission to the folder.

Why is the user not listed in the list of users to share the folder with?

· A. The user needs to be given Support Administrator rights on BrandPortal to be able to get a Contribution Folder assigned

to them.

- B. The BrandPortal Cloud Configuration is not configured properly and needs to be reconfigured in order for BrandPortal to sync with AEMaaCS.
- C. A list of BrandPortal users needs to be created as a CSV and uploaded manually on AEMaaCS including the new user.
- D. After the user is added in the Adobe Identity Management System (IMS), it takes some time for IMS to push the users to AEMaaCS.

Answer: D
