Adobe AD0-E117 (Adobe Experience Manager Architect Master) Exam is a certification exam designed for professionals who want to validate their skills and knowledge in Adobe Experience Manager (AEM) architecture. AEM is a powerful content management system that allows businesses to create, manage, and deliver digital experiences across multiple channels. The AD0-E117 exam measures the candidate's ability to design and architect AEM solutions that meet the needs of their organization.

Adobe AD0-E117 Exam is a challenging certification exam that requires a significant amount of preparation and study. However, passing AD0-E117 exam can be a valuable asset for AEM professionals looking to advance their careers. By demonstrating their mastery of AEM, certified professionals can stand out to potential employers and clients as experts in the field.

Adobe Experience Manager Architect Master Sample Questions (Q40-Q45):

NEW QUESTION # 40

A client is using AEM and wants to make sure they are managing their configurations correctly. Refer to the following requirements: The client has multiple brands that they will be hosting on a single AEM implementation The client wants to reuse as much between brands as possible Each brand needs to be able to override the default values for items like contact us information The client plans to support multiple languages in multiple regions for each brand Each brand/language/region combination will have its own set of content approvers used as part of a custom workflow Which approach should an Architect recommend to manage the client's configurations for AEM?

- A. Use Context-aware configurations to manage configuration overrides and approval group by brand/language/region combination.

- B. Use OSGi to manage approval group and provide default contact us information by runmode.
- C. Use the OOTB Configuration Browser to set configuration defaults and approval group by brand/language/region combination.
- D. Use OSGi Configuration to handle configuration overrides by brand. Create a new workflow for each brand/language/region combination for content approval.

Answer: A

Explanation:

"using Context-aware configurations can allow managing configuration overrides and approval group by brand/language/region combination using content policies".

NEW QUESTION # 41

A client wants to change how they publish their content. Refer to the following client business requirements:

- * The client has a seasonal business that has significant content changes across their site that need to be rolled out at once based on the season change over date.
 - * The content authors need to be able to work one season in advance of publish dates to ensure that all changes can be completed on time.
 - * The content authors need a way to indicate that all the seasonal changes are ready. If the content changes are not completed, then the pages should not get published.
 - * The content authors need the ability to modify the current live pages without rolling back changes for a future content rollout.
- What approach should the Architect recommend?

- A. Use Launches inside of AEM for each new season and use the production ready flag to show changes are completed.
- B. Create a Project inside of AEM for each new season and create a task for notifying that changes are completed.
- C. Use the Manage Publication with scheduling value set to the season change over date when changes are completed.
- D. Use the Versioning feature when editing a page to toggle and publish changes when ready.

Answer: C

NEW QUESTION # 42

An Architect is performing infrastructure and capacity planning for Author servers for a customer using AEM 6.5. Which two factors would lead the Architect to pick a multi-author instance architecture setup? (Choose two.)

- A. Cache Efficiency on the dispatcher
- B. Number of Parallel Authors
- C. Fail safeness of the servers
- D. Website Traffic handled by servers
- E. Types of actions performed by Authors

Answer: B,C

Explanation:

"a multi-author instance architecture setup provides failover and load balancing for author servers. It also allows for scaling up the number of parallel authors who can work on the same content without affecting performance".

NEW QUESTION # 43

A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:

- * The client currently has a dozen static templates that they want to move to editable templates.
- * The existing pages use the parsys paragraph system for storing components.
- * Each page based on one of the static templates has its own custom properties tab that is unique for that template type.
- * The client wants template authors to be able to create the editable templates.

Which approach should an Architect use to meet these requirements?

- A. 1. Use the same page components for editable templates
2. Use a new template type for each static template
- B. 1. Use a new page component for editable templates based on the core components page component

- Answer: D**

- [illegible]
