The former customers who bought Adobe AD0-E725 training materials in our company all are impressed by the help as well as our after-sales services. That is true. We offer the most considerate after-sales services on our Adobe AD0-E725 Exam Questions for you 24/7 with the help of patient staff and employees. They are all professional and enthusiastic to offer help.

Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details
Topic 1	Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.
Topic 2	Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.

Topic 3	Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.
Topic 4	- External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I - O events and webhooks to create automated and connected business processes.

AD0-E725 Free Sample Questions | AD0-E725 New Braindumps Questions

It is known to us that having a good job has been increasingly important for everyone in the rapidly developing world; it is known to us that getting a AD0-E725 certification is becoming more and more difficult for us. If you are worried about your job, your wage, and a AD0-E725 certification, if you are going to change this, we are going to help you solve your problem by our AD0-E725 Exam Torrent with high quality, now allow us to introduce you our AD0-E725 guide torrent. I promise you will have no regrets about reading our introduction.

Adobe Commerce Developer Expert Sample Questions (Q30-Q35):

NEW QUESTION # 30

An Adobe Commerce Developer creates a before plugin for the save() method from the Magento\Framework\App\Cache\Proxy class to manipulate with cache identifiers and data before it is saved to the cache storage. An example of the code is shown below:

```
namespace Magento\Framework\App\Cache;
use Magento\Framework\App\Cache\CacheInterface;
use Magento\Framework\ObjectManager\NoninterceptableInterface;
class Proxy implements
CacheInterface,
NoninterceptableInterface
{
...
public function save($data, $identifier, $tags = [], $lifeTime = null)
{
return $this->getCache()->save($data, $identifier, $tags, $lifeTime);
}
...
}
```

Why is the plugin not working as expected?

- A. An around plugin defined for the same function prevents the execution.
- B. An after plugin defined for the same function affects the results.
- C. The plugin cannot be created for this class.

Answer: C

NEW QUESTION # 31

A Developer applies multiple quality patches to an Adobe Commerce Cloud store. After deployment, the Developer discovers that one of the patches is causing issues.

What is the correct procedure to safely remove or revert the problematic quality patch?

- A. Delete the quality patch from the file magento.app.yaml.
- B. Delete the quality patch from the file magento.env.yaml.
- C. Execute command in magento-cloud.php /vendor/bin/ecc-patches:revert <patch-id>.

Answer: C

NEW QUESTION # 32

A customer asks for a new functionality which will allow them to see the total lifetime sales statistic of a product. This new data is to be made available for the API and traditional product exports. The technical architect of the company servicing the client decides that for this to be achieved, the first step is for an Extension Attribute to be created.

What are the next two steps that need to be taken? (Choose two.)

- A. Declare the extension attribute in `etc/webapi_rest/extension_attributes.xml`.
- **B. Declare the extension attribute in `etc/extension_attributes.xml`.**
- **C. Implement an after plugin on the Product Repository.**
- D. Implement an around plugin on the Product Repository.

Answer: B,C

Explanation:

To expose a new field via an Extension Attribute:

C # Declare the extension attribute in `etc/extension_attributes.xml`.

D # Implement an after plugin on the Product Repository to populate the new attribute with custom logic (in this case, lifetime sales).

A is incorrect: `etc/webapi_rest/extension_attributes.xml` does not exist (only `extension_attributes.xml` is valid).

B is incorrect: around plugins are discouraged here and unnecessarily complicate service contract extensions.

NEW QUESTION # 33

A client receives an alert stating that storage on their production environment is nearly full. They are using Pro architecture and are concerned about storage capacity. A Developer is asked to increase the disk size.

How should this problem be solved?

- A. Extend their Adobe license.
- B. Modify the `magento.app.yaml` file.
- **C. Open a ticket with Adobe support.**

Answer: C

NEW QUESTION # 34

A client receives an alert stating that storage on their production environment is nearly full. They are using Pro architecture and are concerned about storage capacity. A Developer is asked to increase the disk size.

How should this problem be solved?

- A. Extend their Adobe license.
- B. Modify the `magento.app.yaml` file.
- **C. Open a ticket with Adobe support.**

Answer: C

Explanation:

In Adobe Commerce Cloud Pro environments, disk allocation is provisioned at the infrastructure level and cannot be changed directly by developers. Increasing disk size requires assistance from Adobe's Cloud Ops team via a support ticket.

A (license extension) is unrelated to storage.

B (`magento.app.yaml`) configures services and resources but cannot increase allocated disk space.

C is correct: Adobe support ticket is required.
