VCEngine regularly updates its PDF file to ensure that its readers have access to the updated questions.

Salesforce Certified Heroku Architect Sample Questions (Q69-Q74):

NEW QUESTION # 69

A client has data in a Heroku Postgres table. They want to generate analytics based on the table and make the results available in their Salesforce org. Their Salesforce administrator wants to minimize the amount of data that is written to Salesforce to accomplish this. Which strategy should an Architect recommend on this scenario?

- A. Use the Heroku application to generate analytics and write them to a separate Heroku Postgres table. Sync that table to the

Salesforce org with Heroku Connect.

- B. Use the Heroku application to generate analytics, and write the results to a separate Heroku Postgres table-Expose that table to the Salesforce org with Heroku External Objects.
- C. Use Heroku Connect to sync the Heroku Postgres table to the Salesforce org, and generate analytics from the Salesforce org.
- D. Use the Heroku application to generate analytics, and write the results to the Salesforce org with the Salesforce Bulk API.

Answer: B

NEW QUESTION # 70

Which technology do Salesforce REST APIs use for authentication?

- A. SAML
- B. Pre-shared keys
- C. OAuth
- D. Basic usernames and passwords

Answer: D

NEW QUESTION # 71

Canvas apps can authenticate a user with:

- A. Signed request
- B. Either OAuth or signed request
- C. Username and password
- D. OAuth

Answer: B

NEW QUESTION # 72

Universal Containers is developing a new application that has a lightweight Node.js front end. They will also be using a Java-based API, which combines data with Salesforce customer data. All of the data, and the API, is highly confidential.

What should an Architect suggest to enforce security?

- A. Deploy the apps into either Heroku runtime. Force the Java app to use a CDN, and point the Node.js app to its appname.herokuapp.com domain.
- B. Deploy all of the apps to a Heroku Private Space. Deploy the Java app with Internal Routing enabled. Deploy the Node.js app without Internal Routing enabled.
- C. Deploy all of the apps to the Common Runtime. Force the Java app to use SSI/TLS sessions, and point the Node.js app to its appname.herokuapp.com domain.
- D. Deploy all of the apps to a Heroku Private Space. Force the Java app to use SSI/TLS sessions, and point the Node.js app to its appname.herokuapp.com domain.

Answer: B

NEW QUESTION # 73

Which of the following is NOT an advantage of Salesforce Connect over ETL?

- A. If the origin is offline, the data is still available via Salesforce Connect.
- B. Data security can be enforced using per-user or per-application authentication.
- C. Standard protocols like OData can easily proxy external data into Salesforce.
- D. The data is always fetched on demand
