# Pass Guaranteed Quiz Oracle - High Hit-Rate 1Z0-1111-25 - Oracle Cloud Infrastructure 2025 Observability Professional New Dumps Free

2026 Latest Exams-boost 1Z0-1111-25 PDF Dumps and 1Z0-1111-25 Exam Engine Free Share: https://drive.google.com/open?id=1ksg0CKEUreBp9LlcUhQKI6UUYhWKQqsT

Users are buying something online (such as 1Z0-1111-25 prepare questions), always want vendors to provide a fast and convenient sourcing channel to better ensure the user's use. Because without a quick purchase process, users of our 1Z0-1111-25 quiz guide will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our 1Z0-1111-25 Exam Prep. All users can implement fast purchase and use our learning materials. We have specialized software to optimize the user's purchase channels, if you decide to purchase our 1Z0-1111-25 prepare questions, you can achieve the product content even if the update service and efficient and convenient user experience.

We understand the difficulty of finding the latest and accurate 1Z0-1111-25 questions. In today's competitive world, it is essential to prepare with the most probable Oracle in 1Z0-1111-25 exam dumps to stay ahead of the competition. That's why we have created our updated Oracle 1Z0-1111-25 Questions, which will help you to clear the Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) exam in one go.

>> 1Z0-1111-25 New Dumps Free <<

2026 The Best 1Z0-1111-25 New Dumps Free | 1Z0-1111-25 100% Free Pass Guarantee

Our 1Z0-1111-25 vce dumps constantly get updated according to the changes of exam requirement from the certification center. Our experts created 1Z0-1111-25 practice exam to help our candidates get used to the formal test and face the challenge with great confidence. One-year free updating of 1Z0-1111-25 Test Answers will be allowed after payment and one or two days' preparation before test will be recommend.

Oracle 1Z0-1111-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Distinguish the Key Concepts of Logging Analytics: This section evaluates the expertise of Data Analysts and Troubleshooting Specialists in using OCI Logging Analytics. It covers log ingestion methods, searching and filtering logs, performing advanced analytics, and leveraging machine learning-powered insights for proactive issue resolution.

Topic 2	• Centrally Manage and Visualize Log Data: This section assesses the abilities of Logging Analysts and Security Engineers in managing logs across an entire IT environment. It includes enabling log collection, creating connectors for log transitions, identifying log patterns, and visualizing logs for advanced analytics using OCI Logging Service.
Topic 3	• Define the Pillars of Observability: This section of the exam measures the skills of Cloud Architects and Site Reliability Engineers (SREs) in understanding the three pillars of observability: logs, metrics, and traces. It explains how these components provide insights into system health and performance, enabling effective monitoring and troubleshooting in distributed cloud environments.
Topic 4	• Monitor Cloud Environments with Metrics and Alarms: This section tests Oracle Cloud Operators' knowledge of configuring OCI Monitoring Service. It includes enabling metrics for resource monitoring, setting up alarms based on best practices, and responding to real-time changes in cloud environments to ensure system reliability.
Topic 5	• Respond to Cloud Resource Changes in Real-Time: This domain measures the skills of Event Managers and Integration Specialists in using OCI Events Service. It covers event structures, types, rules, and integration with other OCI services to respond effectively to resource changes and automate workflows.
Topic 6	• Monitor Distributed Components of an Application Stack: This section measures the skills of Stack Monitoring Specialists and Cloud Administrators in using OCI Stack Monitoring. It covers discovering resources within application stacks, monitoring metrics across distributed components, and ensuring optimal performance through effective resource management.
Topic 7	• Summarize OCI Observability and Management Services: This section evaluates the expertise of DevOps Engineers and IT Operations Managers in utilizing Oracle Cloud Infrastructure (OCI) Observability and Management services. It covers tools for monitoring, auditing, and managing cloud resources, emphasizing automation and machine learning-driven insights to optimize IT operations.

Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q42-Q47):

NEW QUESTION # 42

What is the correct logging CLI syntax for the log search with a query for REST call responses having status code 400, within the web Log Group and the application Log?

- A. oci logging-search search-logs --search-query 'search "ocid1.compartment.oc1..aaaaaaaawqegmjifhni77bqm625cxioavoq775jckfn2syxqtmglabcccdxyz/web/application" --time-start 2022-02-06T00:00:00Z --time-end 2022-02-07T00:00:00Z
- B. oci log search search-logs --loggroup "web" --log "application" --search-query 'search "ocid1.compartment.oc1..aaaaaaaawqegmjifhni77bqm625cxioavoq775jckfn2syxqtmglabcccdxyz" where data.statusCode = 400' --time-start 2022-02-06T00:00:00Z --time-end 2022-02-07T00:00:00Z
- C. oci logging-search search-logs --search-query 'search "ocid1.compartment.oc1..aaaaaaaawqegmjifhni77bqm625cxioavoq775jckfn2syxqtmglabcccdxyz" | where data.statusCode 400' --time-start 2022-02-06T00:00:00Z --time-end 2022-02-07T00:00:00Z
- D. oci logging-search search-logs --search-query 'search "ocid1.compartment.oc1..aaaaaaaawqegmjifhni77bqm625cxioavoq775jckfn2syxqtmglabcccdxyz/web/application" | where data.statusCode = 400' --time-start 2022-02-06T00:00:00Z --time-end 2022-02-07T00:00:00Z

Answer: D

Explanation:
The correct OCI CLI syntax for searching logs must include the compartment, log group, log, and query:
B: oci logging-search search-logs --search-query 'search "ocid1.compartment.oc1..aaaaaaaawqegmjifhni77bqm625cxioavoq775jckfn2syxqtmglabcccdxyz/web/application" | where data.statusCode = 400' --time-start 2022-02-06T00:00:00Z --time-end 2022-02-07T00:00:00Z Specifies the compartment OCID, web Log Group, and application Log in the scope path.
Filters for data.statusCode = 400 using proper syntax (= instead of space).

Includes valid UTC time range.

Why not A, C, or D?

A: Missing log group/log; incorrect filter syntax (400 without =).

C: No filter for status code 400.

D: Incorrect command (oci log instead of oci logging-search); redundant parameters.

B aligns with OCI Logging's search syntax.

NEW QUESTION # 43

Which Management Agent group allows the agent to upload data to the discovery service?

- A. Mgmt_agent_dynamic_group
- B. AgentUsersGrp
- C. StackMonitoringViewerGrp
- D. StackMonitoringAdminGrp

Answer: B

Explanation:

Management Agents require group membership and policies to interact with OCI services:

AgentUsersGrp (A): A predefined dynamic group for all Management Agents in a tenancy. With an attached policy granting upload permissions (e.g., allow dynamic-group AgentUsersGrp to use discovery-service-family in tenancy), agents can send data to the discovery service for resource detection.

Why not B, C, or D?

B and C: Specific to Stack Monitoring roles, not general agent uploads.

D: A generic name, not a predefined OCI group.

AgentUsersGrp is the standard for this purpose.

NEW QUESTION # 44

How does Application Performance Monitoring track all related spans for a single user request?

- A. Using Trace ID
- B. Using User ID
- C. Using Application Name

Answer: A

Explanation:

APM tracks request flows using:

Using Trace ID (A): A unique identifier assigned to a trace (collection of spans) for a single user request. Propagated via HTTP headers, it links all spans across services.

Why not B or C?

User ID (B): Identifies users, not request flows.

Application Name (C): Too broad; doesn't correlate specific requests.

Trace ID ensures end-to-end visibility in distributed systems.

NEW QUESTION # 45

Which TWO items describe the capabilities of the Oracle Cloud Infrastructure (OCI) Database Management Service? (Choose two.)

- A. View database log entries
- B. Analyze SQL response time across a group of databases
- C. Monitor database performance
- D. Perform management tasks across a group of databases

Answer: C,D

Explanation:

The Database Management Service enhances database oversight:

Monitor database performance (B): Provides tools like Performance Hub to track real-time and historical metrics (e.g., CPU, I/O).
Perform management tasks across a group of databases (C): Database Fleet Management enables bulk operations (e.g., configuration checks, SQL execution) across multiple databases.
Why not A or D?
A: Log viewing is via Logging Service, not a core DM feature.
D: SQL analysis is in Operations Insights, not DM directly.
These capabilities streamline database administration.

NEW QUESTION # 46
Which is the recommended method to continuously monitor and ingest logs from Object Storage buckets?

- A. ObjectCollection Rule
- B. Object Storage
- C. Object Store Bucket
- D. Object Store

Answer: A

Explanation:
For continuous log ingestion from Object Storage:
ObjectCollection Rule (A): A Logging Analytics feature that monitors Object Storage buckets and ingests logs based on defined patterns (e.g., bucket name, object prefix). It's designed for this purpose.
Why not B, C, or D?
Object Store (B), Object Storage (C), Object Store Bucket (D): These refer to the storage service or its components, not a method for log ingestion.
ObjectCollection Rule ensures automated, ongoing log collection.
