FC0-U71 Exam Outline & FC0-U71 Exam Materials

People from all walks of life all work hard for the future. You must work hard to upgrade your IT skills. Then, do you have obtained CompTIA FC0-U71 certificate which is very popular? How much do you know about FC0-U71 test? If you want to pass FC0-U71 exam without enough exam related knowledge, how should you do? But don't you worry: ExamCost will give assistance to you.

CompTIA Tech+ Certification Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

A user finds a USB device and plugs it into a laptop. The laptop does not detect the USB device. Which of the following is the most likely cause of this issue?

- A. Account permissions
- **B. Disabled port**
- C. Anti-malware
- D. Insufficient memory

Answer: B

Explanation:

If the USB device is not detected, the most likely cause is that the USB port is disabled in the system settings or BIOS, preventing the hardware from being recognized.

Other options:

*Anti-malware usually does not block hardware detection,

*Insufficient memory affects system performance, not USB detection,

*Account permissions generally don't prevent USB detection but may restrict usage.

NEW QUESTION # 23

Which of the following is commonly used to measure the RAM capacity of a smartphone?

- A. MB
- **B. GB**
- C. TB
- D. KB

Answer: B

Explanation:

Gigabytes (GB) are the standard unit for measuring RAM capacity in modern smartphones, typically ranging from 2GB to 16GB. KB and MB are too small, TB is used for large storage, not RAM.

NEW QUESTION # 24

A user has concerns about device theft because they are working on a laptop at a local coffee shop. Which of the following physical devices would be best to protect the laptop?

- **A. Cable lock**
- B. USB lock
- C. Privacy shield
- D. Firewall

Answer: A

Explanation:

A cable lock physically secures a laptop to a stationary object, helping to prevent theft in public spaces like coffee shops.

Other options:

*Firewall protects against network threats,

*Privacy shield prevents screen snooping,

*USB lock restricts port access but doesn't prevent theft.

NEW QUESTION # 25

Which of the following is reset when a workstation is turned off?

- A. NIC
- **B. BIOS**

- C. CPU
- **D. RAM**

Answer: D

Explanation:

RAM (Random Access Memory) is volatile memory, meaning its contents are erased when power is removed. According to the CompTIA ITF+ FC0-U71 Official Study Guide:

"RAM is volatile storage, which means that it requires constant power to maintain the stored information. When power is turned off, all data in RAM is lost." BIOS (firmware), NIC (hardware interface), and CPU (hardware processor) remain unaffected by shutdowns regarding stored information.

NEW QUESTION # 26

A user wants to use virtualization on a local workstation. Which of the following best describes the technology that will be used?

- A. SaaS
- **B. Hypervisor**
- C. Cloud
- D. Guest OS

Answer: B

Explanation:

A hypervisor is the software or hardware platform that enables virtualization. It allows multiple operating systems (guest OSes) to run on a single physical machine.

"A hypervisor manages virtual machines on a single physical system. It enables the creation and management of guest OS environments." - CompTIA ITF+ Correct answer: D

NEW QUESTION # 27

.....

If you want to prepare for your exam in a paper version, our FC0-U71 test materials can do that for you. FC0-U71 PDF version is printable and you can print them into hard one, and take some notes on them.
