

# H12-841\_V1.5 Reliable Test Pattern | Interactive H12-841\_V1.5 Questions

Three versions are available for H12-841\_V1.5 study materials, and you can choose the most suitable one according to your own needs. H12-841\_V1.5 PDF version is printable, and you can print them and take some notes on them if you want. H12-841\_V1.5 Soft test engine can be used in more than 200 personal computers, and they support MS operating system. H12-841\_V1.5 Online Test engine is convenient and easy to learn, and it supports all web browsers. You can have a general review of what you have learned. Just have a try, and there is always a version for you.

Thousands of people will crowd into our website to choose the H12-841\_V1.5 study materials. So people are different from the past. Learning has become popular among different age groups. Our H12-841\_V1.5 guide questions truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our H12-841\_V1.5 Practice Engine a chance? Our products will live up to your expectations.

## Interactive H12-841\_V1.5 Questions | Valid Exam H12-841\_V1.5 Book

Fantasy can make people to come up with many good ideas, but it can not do anything. So when you thinking how to pass the Huawei H12-841\_V1.5 Exam, It's better open your computer, and click the website of VCETorrent, then you will see the things you want. VCETorrent's products have favorable prices, and have quality assurance, but also to ensure you to 100% pass the exam.

## Huawei HCIP-Datacom-Campus Network Planning and Deployment V1.5 Sample Questions (Q175-Q180):

### NEW QUESTION # 175

In a WAN BGP protocol deployment, if it is necessary to "remove a specific AS number from the AS\_PATH attribute of an EBGP neighbor when receiving routes", which of the following policies should be configured?

- A. Apply a prefix list to the outbound direction of BGP neighbors to restrict route advertising.
- B. Apply as-path-filter to the inbound direction of BGP neighbors to filter specific AS numbers.
- C. Enable BGP route aggregation to merge routes containing specific ASs.
- D. Configure BGP neighbor MD5 authentication

**Answer: B**

**NEW QUESTION # 176**

In Huawei's WAN solution, regarding the issue of "blurry and stuttering video conferencing across regions," which of the following troubleshooting steps should be performed first?

- A. Check if the memory usage of the branch equipment is too high.
- **B. Check if the video conferencing traffic is configured with the DSCP EF flag (high priority).**
- C. Check if the DNS configuration of the CE device is correct.
- D. Check if public internet services are consuming excessive bandwidth.

**Answer: B**

**NEW QUESTION # 177**

In Huawei's SD-WAN solution, which of the following technologies can achieve "intelligent routing between branches and headquarters/cloud" to ensure the experience of critical business operations? (Multiple choice)

- **A. Application-based priority scheduling (e.g., prioritizing VoIP services)**
- B. Static routing uses a fixed route (not adjusted based on link status).
- **C. Multi-link quality detection (real-time monitoring of bandwidth, latency, and packet loss rate)**
- D. Relies on only a single internet link, with no redundancy .
- **E. Dynamic path switching based on link state (automatic switching to backup links when a link fails)**

**Answer: A,C,E**

**NEW QUESTION # 178**

In Huawei's SD-WAN solution, for the scenario of "branch multi-link (MPLS + Internet + 5G) hybrid access", which of the following technologies can "automatically select the optimal link for different services, such as VoIP using 5G and file transfer using the Internet"?

- A. Manually configure a fixed link for each service, without automatic adjustment.
- B. All services use MPLS links, while other links remain idle.
- C. Randomly assign links to services without any strategy optimization.
- **D. Intelligent routing based on service SLA (matching links according to latency and bandwidth requirements)**

**Answer: D**

**NEW QUESTION # 179**

In Huawei's SD-WAN solution, which of the following technologies can "achieve network resource isolation between different tenants and ensure that tenant data is not interconnected"?

- **A. Create a separate SD-WAN instance for each tenant.**
- B. Tenant traffic is transmitted in plaintext without isolation.
- C. All tenants share bandwidth resources.
- D. Shared network instance, isolated only through ACLs

**Answer: A**

**NEW QUESTION # 180**
