Google Cloud Certified - Professional Google Workspace Administrator is an advanced-level certification that validates the skills and knowledge required to manage and administer Google Workspace services for an organization. It is intended for professionals who want to demonstrate their expertise in the deployment, configuration, and management of Google Workspace services.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q30-Q35):

NEW QUESTION # 30

Several users in your organization reported an issue with receiving emails from one particular external sender. You want to troubleshoot the issue and determine whether Google received these emails. What should you do?

- A. Search for missing email messages by using email Log Search (ELS), and determine why messages weren't delivered.
- B. Update your MX records to make sure they point to Google mail servers.
- C. Check if your Google Workspace domain registration expired.
- D. Open a support ticket with Google Workspace Support.

Answer: A

Explanation:

NEW QUESTION # 31

Recently, your organization has had an increase in messages marked as spam. You need to quickly and efficiently obtain detailed information regarding each message. What should you do?

- A. Create an investigation by using a SQL query to search for all spam audit logs exported to BigQuery.
- B. Send an alert to all users to mark all suspicious Gmail messages as spam and review the Alert center messages.
- C. Use Google Vault to put all messages marked as spam in a legal hold and review the messages.
- D. Use the spam filter report in the security dashboard to see messages Google's spam filter marked as spam during a specific time period.

Answer: D

Explanation:

The spam filter report in the security dashboard provides a comprehensive overview of messages that Google's spam filter has marked as spam. This allows you to quickly access detailed information about these messages and identify patterns or specific issues contributing to the increase in spam.

NEW QUESTION # 32

Security and Compliance has identified secure third-party applications that should have access to Google Workspace data. You need to restrict third-party access to only approved applications. What two actions should you take? (Choose two.)

- A. Whitelist Google Workspace Marketplace apps
- B. Whitelist Trusted Apps
- C. Disable the Drive SDK
- D. Restrict API scopes
- E. Disable add-ons for Gmail

Answer: A,B

Explanation:

* Whitelist Trusted Apps:

* In the Google Workspace Admin console, go to "Security" > "API controls".

* Under "App access control," select "Manage third-party app access".

* Add the approved applications to the whitelist, allowing only these apps to access Google Workspace data.

* Whitelist Google Workspace Marketplace Apps:

* In the Admin console, navigate to "Apps" > "Google Workspace Marketplace apps".

* Browse and select the trusted apps that need access to Google Workspace data.

* Approve and whitelist these apps to ensure only verified applications can access the data.

NEW QUESTION # 33

Your organization has enabled spoofing protection against unauthenticated domains. You are receiving complaints that email from

multiple partners is not being received. While investigating this issue, you find that emails are all being sent to quarantine due to the configured safety setting. What should be the next step to allow users to review these emails and reduce the internal complaints while keeping your environment secure?

- A. Add your partner domains IPs to the Inbound Gateway setting.
- **B. Change the spoofing protection to deliver the emails to spam instead of quarantining them.**
- C. Add your partner sending IP addresses to an allowlist.
- D. Change the spoofing protection to deliver the emails to inboxes with a custom warning instead of quarantining them.

Answer: B

Explanation:

NEW QUESTION # 34

Your organization is about to expand by acquiring two companies, both of which are using Google Workspace. The CISO has mandated that strict 'No external content sharing' policies must be in place and followed. How should you securely configure sharing policies to satisfy both the CISO's mandate while allowing external sharing with the newly acquired companies?

- A. Use shared drives to store the content, and share only individual files externally.
- B. Create a Drive DLP policy that will allow sharing to only domains on an allowlist.
- C. Allow external sharing of Drive content for the IT group only.
- **D. Let users share files between the two companies by using the 'Trusted Domains' feature. Create an allowlist of the trusted domains, and choose sharing settings for the users.**

Answer: D
