

# Valid 300-425 Exam Syllabus | 300-425 Exam Question

P.S. Free 2026 Cisco 300-425 dumps are available on Google Drive shared by PDFDumps: <https://drive.google.com/open?id=1RnWLKbAmlQqQo3Jqn9GSQLzDCjb0UOsM>

Cisco 300-425 practice test software can be used on devices that range from mobile devices to desktop computers. We provide the Cisco 300-425 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. PDFDumps provides proprietary preparation guides for the certification exam offered by the Cisco 300-425 Exam Dumps. In addition to containing numerous questions similar to the Cisco 300-425 exam, the Cisco 300-425 exam questions are a great way to prepare for the Cisco 300-425 exam dumps.

## Registration procedure of Cisco 300-425 Certification Exam

There are two options available for the registration of the Cisco 300-425 exam.

1. The first option is to register online through Pearson VUE. When registering on this website through VUE, you will be uploading your documents and taking your exam at a Pearson VUE Testing Center in your city or region. You have to register online at least 7 days before the exam date.
2. The second option is to register for the exam by calling a Pearson VUE Testing Center. You can call them directly and provide all of the required documentation or you can also communicate with them using Cisco's Certification Online Services.

## High Pass-Rate Valid 300-425 Exam Syllabus | Amazing Pass Rate For 300-425: Designing Cisco Enterprise Wireless Networks | Professional 300-425 Exam Question

if you want to have a better experience on the real exam before you go to attend it, you can choose to use the software version of our 300-425 learning guide which can simulate the real exam, and you can download our 300-425 exam prep on more than one computer. We strongly believe that the software version of our 300-425 Study Materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success.

## Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q153-Q158):

### NEW QUESTION # 153

Refer to the exhibit.

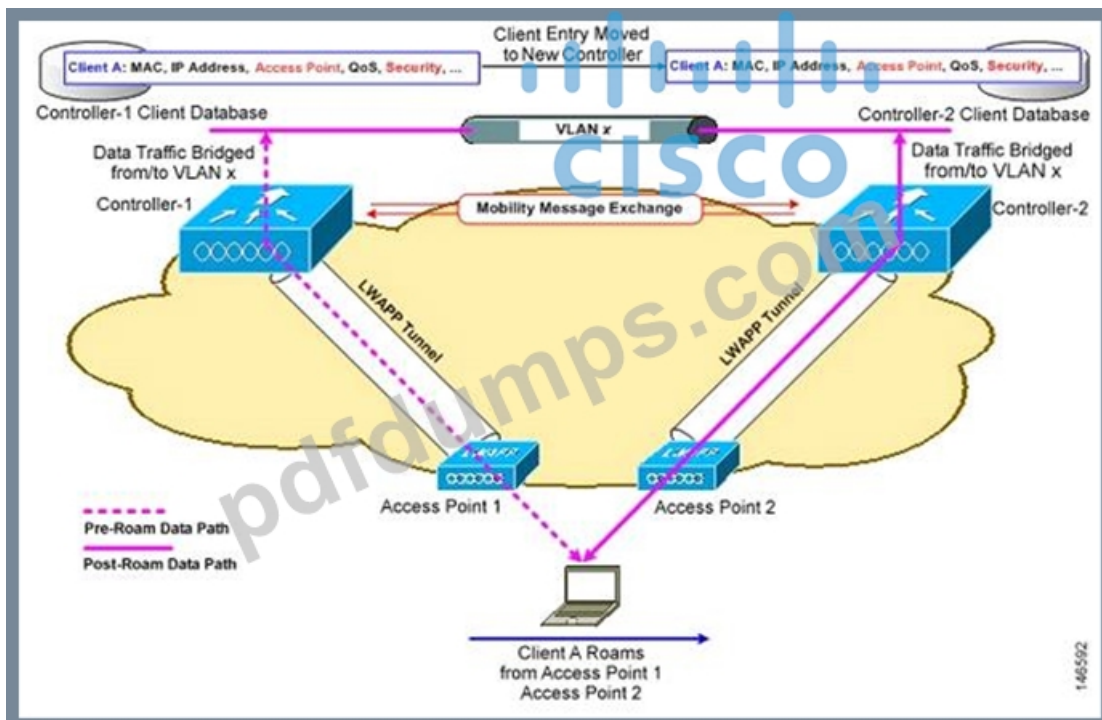

A client roams between two APs that are registered to two different controllers, where each controller has an interface in the client subnet. Both controllers are running AireOS. Which scenario explains the client roaming behavior?

- A. Controllers exchange mobility control messages (over UDP port 16666) and the client database entry is moved from the original controller to the new controller.
- B. Controllers do not exchange mobility control messages (over UDP port 16666) and the client database, entry is not moved from the original controller to the new controller.
- C. Controllers exchange mobility control messages (over UDP port 16666) and a new client session is started with the new controller.
- D. Controllers exchange mobility control messages (over UDP port 16666) and the client database entry is tunneled from the original controller to the new controller.

**Answer: A**

Explanation:

In this instance controllers exchange mobility control messages (over UDP port 16666) and the client database entry is moved from the original controller to the new controller.

#### NEW QUESTION # 154

How are mobility groups created, excluding mobility anchors?

- A. A mobility group does not require all WLCs in the group to use the same virtual IP address.
- B. If WLCs with HA SSO are deployed, each WLC in the WLC HA pair is considered separately as a mobility peer.
- C. The WLCs do not have to be of the same model or type to be a member of a mobility group, however each member should be running different software versions.
- D. Each WLC must use the same mobility domain name and be defined as a peer in each other's static mobility members list.

**Answer: D**

Explanation:

Mobility groups are created by configuring each Wireless LAN Controller (WLC) to use the same mobility domain name and defining each WLC as a peer in the static mobility members list of every other WLC in the group. This configuration allows WLCs to share information and support seamless roaming for wireless clients across different controllers within the same mobility group.

#### NEW QUESTION # 155

A customer has a Cisco wireless network that supports VoWLAN services. The customer wants supported voice clients to receive roaming recommendations and suggestions from APs. This functionality must not impact non-VoWLAN clients. What should be enabled on the VoWLAN SSID?

- A. 802.11k neighbor lists
- B. 802.11r Fast Transition
- C. CCKM with 802.1X
- D. 802.11v BSS Transition Management

**Answer: A**

Explanation:

To support VoWLAN services and provide roaming recommendations to supported voice clients without impacting non-VoWLAN clients, the feature that should be enabled on the VoWLAN SSID is 802.11k neighbor lists. This feature allows APs to provide

information about neighboring APs that are candidates for roaming, which helps clients make better decisions about when and where to roam. References := CCNP Enterprise Wireless Design ENWLSD 300-425 and Implementation ENWLSI 300-430 Official Cert Guide Premium Edition and Practice

### NEW QUESTION # 156

A customer has a single anchor WLC named Anchor A. Anchor A is in a DMZ and provides guest access. The customer wants to deploy an additional anchor controller named Anchor B to provide redundancy if Anchor A fails. Which design approach should be taken for the guest WLAN priority on the foreign WLC for each anchor WLC?

- A. Set Anchor A to priority 3 and Anchor B to priority 3.
- **B. Set Anchor A to priority 1 and Anchor B to priority 3.**
- C. Set Anchor A to priority 3 and Anchor B to priority 1.
- D. Set Anchor A to priority 1 and Anchor B to priority 1.

**Answer: B**

Explanation:

Priority values range from 1 (high) to 3 (low) or primary, secondary or tertiary and defined priority is displayed with guest anchor. [https://www.cisco.com/c/en/us/td/docs/wireless/controller/8-10/config-guide/b\\_cg810/configuring\\_auto\\_anchor\\_mobility.html](https://www.cisco.com/c/en/us/td/docs/wireless/controller/8-10/config-guide/b_cg810/configuring_auto_anchor_mobility.html)

### NEW QUESTION # 157

A network consultant is designing a wireless network for a government agency. The customer requires high security between any device communication. The design includes AireOS, Cisco IOS-XE controllers, and Cisco 4800 Series APs. Which requirement must be met to enhance the mobility group security?

- A. Use a complex group name for the mobility group.
- B. Use a different group name for each mobility member.
- **C. Enable Mobility Encryption on the network.**
- D. Enable MIC authentication between the mobility group members.

**Answer: C**

Explanation:

For a government agency requiring high security between device communications, enabling Mobility Encryption across the network is essential. Mobility Encryption enhances the security of the mobility group by encrypting the traffic exchanged between mobility peers, including AireOS, Cisco IOS-XE controllers, and Cisco 4800 Series APs. This encryption helps to protect against potential eavesdropping and unauthorized access, ensuring that sensitive government data remains confidential during wireless transmission.

### NEW QUESTION # 158

.....

Our 300-425 training guide always promise the best to service the clients. Carefully testing and producing to match the certified quality standards of 300-425 exam materials, we have made specific statistic researches on the 300-425 practice materials. And the operation system of our 300-425 practice materials can adapt to different consumer groups. Facts speak louder than words. Through years' efforts, our 300-425 exam preparation has received mass favorable reviews because the 99% pass rate is the powerful proof of trust of the public.
