Our Fortinet FCP_FGT_AD-7.6 practice test software is the most distinguished source for the Fortinet FCP_FGT_AD-7.6 exam all over the world because it facilitates your practice in the practical form of the FCP_FGT_AD-7.6 Certification Exam. Moreover, you do not need an active internet connection to utilize FCP - FortiGate 7.6 Administrator practice exam software.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 2	VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.
Topic 3	Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Topic 4	Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.

Topic 5	• Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.

FCP_FGT_AD-7.6 Guide Covers 100% Composite Exams

Our Fortinet FCP_FGT_AD-7.6 preparation questions deserve you to have a try. As long as you free download the demos on our website, then you will love our FCP_FGT_AD-7.6 preparation braindumps for its high quality and efficiency. All you have learned on our FCP_FGT_AD-7.6 Study Materials will play an important role in your practice. We really want to help you solve all your troubles about learning the Fortinet FCP_FGT_AD-7.6 exam.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which three statements about SD-WAN performance SLAs are true? (Choose three.)

- A. They are applied in a SD-WAN rule lowest cost strategy.
- B. All the SLA targets can be configured.
- C. They monitor the state of the FortiGate device.
- D. They rely on session loss and jitter.
- E. They can be measured actively or passively.

Answer: B,D,E

Explanation:

SD-WAN SLAs monitor metrics like packet loss and jitter to evaluate link performance.

SLA measurements can be performed using active probing or passive monitoring.

Administrators can configure all SLA target parameters to define performance criteria.

NEW QUESTION # 68

You have created a web filter profile named restrict_media-profile with a daily category usage quota.

When you are adding the profile to the firewall policy, the restrict_media-profile is not listed in the available web profile drop down.

What could be the reason?

- A. The firewall policy is in no-inspection mode instead of deep-inspection.
- B. The web filter profile is already referenced in another firewall policy.
- C. The naming convention used in the web filter profile is restricting it in the firewall policy.
- D. The inspection mode in the firewall policy is not matching with web filter profile feature set.

Answer: D

Explanation:

Web filter profiles with category usage quotas require the firewall policy to be in proxy-based (deep) inspection mode; if the inspection mode does not match this requirement, the profile will not appear in the drop-down list.

NEW QUESTION # 69

Refer to the exhibit.

What would be the impact of these settings on the Server certificate SNI check configuration on FortiGate?

- A. FortiGate will accept the connection with a warning if the SNI does not match the CN or SAN fields.
- B. FortiGate will accept and use the CN in the server certificate for URL filtering if the SNI does not match the CN or SAN fields.
- C. FortiGate will close the connection if the SNI does not match the CN and SAN fields
- D. FortiGate will close the connection if the SNI does not match the CN or SAN fields.

Answer: C

Explanation:

With the Server certificate SNI check set to Strict, FortiGate enforces that the SNI must match either the Common Name (CN) or Subject Alternative Name (SAN) in the server certificate; otherwise, it closes the connection.

NEW QUESTION # 70

An administrator configures FortiGuard servers as DNS servers on FortiGate using default settings.

What is true about the DNS connection to a FortiGuard server?

- A. It uses DNS over HTTPS.
- B. It uses UDP 53.
- C. It uses UDP 8888.
- D. It uses DNS over TLS.

Answer: B

Explanation:

When FortiGuard servers are configured as DNS servers on FortiGate with default settings, the DNS queries are sent using the standard DNS protocol over UDP port 53.

NEW QUESTION # 71

Refer to the exhibits. An administrator creates a new address object on the root FortiGate (HQ- NGFW-1) in the Security Fabric. After synchronization, this object is not available on the downstream FortiGate (HQ-ISFW).

What must the administrator do to synchronize the address object?

Security Fabric physical topology view

New address object on HQ-NGFW-1

Edit Address

Name: Net_Add_1

Color: Change

Interface: ☐ any

Type: Subnet

IP/Netmask: 10.10.10.0 255.255.255.0

Fabric global object: ☒

Routing configuration: ☐

Comments: Write a comment... 0/255

Security Fabric configuration on HQ-NGFW-1

```
HQ-NGFW-1 # show full-configuration system csf
config system csf
    set status enable
    set uid "10e202dad887c02ac8bafa024228d86d"
    set upstream ' '
    set source-ip 0.0.0.0
    set upstream-interface-select-method auto
    set upstream-port 8013
    set-group-name "Fortinet"
    set group-password ENC M8h5eGm9sVzi555Pp5y
    set accept-auth-by-cert enable
    set log-unification enable
    set authorization-request-type serial
    set fabric-workers 2
    set downstream-access disable
    set configuration-sync default
    set fabric-object-unification local
    set saml-configuration-sync default
```

Security Fabric Configuration on HQ-ISFW

```
HQ-NGFW-1 # show full-configuration system csf
config system csf
    set status enable
    set uid "dd0263000fa8209fc0d99a40faf9c818"
    set upstream "10.0.11.254"
    set source-ip 0.0.0.0
    set upstream-interface-select-method auto
    set upstream-port 8013
    set-group-name ''
    set accept-auth-by-cert enable
    set log-unification enable
    set authorization-request-type serial
    set fabric-workers 2
    set downstream-access disable
    set configuration-sync default
    set saml-configuration-sync local
    set file-mgmt enable
    set file-quota 0
    set file-quota-warning 90
end
```

- A. Change the csfSetting on HQ-ISFW (downstream) to set configuration-sync local.
- B. Change the csfSetting on both devices to set downstream-access enable.
- C. Change the csfSetting on HQ-ISFW (downstream) to set saml-configuration-sync default.
- **D. Change the csfSetting on HQ-NGFW-1 (root) to set fabric-object-unification default.**

Answer: D

Explanation:

The CLI command fabric-object-unification is available only on the root FortiGate device. When set to local, global objects are not synchronized to downstream devices in the Security Fabric.

The default value is default.

NEW QUESTION # 72

.....

Today is the right time to advance your career. Yes, you can do this easily. Just need to pass the FCP_FGT_AD-7.6 certification exam. Are you ready for this? If yes then get registered in Fortinet FCP_FGT_AD-7.6 certification exam and start preparation with top-notch ActualVCE FCP_FGT_AD-7.6 Exam Practice questions today. These Fortinet FCP_FGT_AD-7.6 questions are available at ActualVCE with up to 1 year of free updates.
