New SPLK-3002 Test Bootcamp - Reliable SPLK-3002 Exam Simulator

The SPLK-3002 exam questions formats are PDF dumps files, desktop practice test software, and web-based practice test software. All these SPLK-3002 exam questions format hold some common and unique features. Such as SPLK-3002 PDF dumps file is the PDF version of Splunk IT Service Intelligence Certified Admin exam dumps that works NewPassLeader all operating systems and devices. Whereas the other two SPLK-3002 Practice Test questions formats are concerned, both are the mock SPLK-3002 exam. Both will give you a real-time Splunk IT Service Intelligence Certified Admin exam preparation environment and

you get experience to attempt the SPLK-3002 exam preparation experience before the final exam.

The SPLK-3002 Exam is designed for IT professionals who are responsible for managing, configuring, and troubleshooting Splunk ITSI. It covers a range of topics, including ITSI architecture, data inputs, data models, service templates, KPIs, alerts, and dashboards. SPLK-3002 exam also tests candidates' knowledge of ITSI deployment, administration, and maintenance best practices. Successful candidates will demonstrate their ability to use Splunk ITSI to monitor and analyze IT services, detect anomalies and issues, and proactively take action to prevent service disruptions.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q65-Q70):

NEW QUESTION # 65

In maintenance mode, which features of KPIs still function?

- A. KPI calculations and threshold settings can be modified.
- B. KPI searches still run during maintenance mode, but results go to `itsi_maintenance_summary` index.
- **C. KPI searches will execute but will be buffered until the maintenance window is over.**
- D. New KPIs can be created, but existing KPIs are locked.

Answer: C

Explanation:

Explanation

It's a best practice to schedule maintenance windows with a 15- to 30-minute time buffer before and after you start and stop your maintenance work. This gives the system an opportunity to catch up with the maintenance state and reduces the chances of ITSI generating false positives during maintenance operations.

NEW QUESTION # 66

For which ITSI function is it a best practice to use a 15-30 minute time buffer?

- **A. Adaptive thresholding.**
- B. Maintenance windows
- C. Correlation searches.
- D. Anomaly detection.

Answer: A

Explanation:

B is the correct answer because adaptive thresholding is a feature of ITSI that allows you to dynamically adjust KPI thresholds based on historical patterns and trends. Adaptive thresholding requires a time buffer of at least 15 minutes to calculate the thresholds based on the previous data points. The time buffer ensures that there is enough data to perform the calculations and avoid false positives or negatives. References: Configure adaptive thresholding for a KPI in ITSI

NEW QUESTION # 67

Where are KPI search results stored?

- **A. The `itsi_summary` index.**
- B. Output to a CSV lookup.
- C. The default index.
- D. KV Store.

Answer: A

Explanation:

Search results are processed, created, and written to the `itsi_summary` index via an alert action.

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/BaseSearch> D is the correct answer because KPI search results are stored in the `itsi_summary` index in ITSI. This index is an events index that stores the results of scheduled KPI searches.

Summary indexing lets you run fast searches over large data sets by spreading out the cost of a computationally expensive report over time.

References: Overview of ITSI indexes

NEW QUESTION # 68

When in maintenance mode, which of the following is accurate?

- A. Service health scores and KPI events are deleted until the window is over.
- B. KPIs are shown in blue while in maintenance mode.
- C. Maintenance mode slots are scheduled on a per hour basis.
- D. Once the window is over, KPIs and notable events will begin to be generated again.

Answer: D

Explanation:

Reference:

A is the correct answer because when in maintenance mode, KPIs and notable events will begin to be generated again once the window is over. Maintenance mode is a feature of ITSI that allows you to temporarily suspend alerts and health score calculations for a service or an entity during planned maintenance or downtime. During maintenance mode, KPI searches still run, but the results are buffered until the window is over. Once the window is over, the buffered results are processed and alerts and health scores are generated if necessary. Reference: [Overview of maintenance windows in ITSI]

NEW QUESTION # 69

Which of the following applies when configuring time policies for KPI thresholds?

- A. A person can only configure 24 policies, one for each hour of the day.
- B. It is possible for multiple time policies to overlap.
- C. If a person expects a KPI to change significantly through a cycle on a daily basis, don't use it.
- D. They are great if you expect normal behavior at 1:00 to be different than normal behavior at 5:00

Answer: B

Explanation:

Explanation

If you're creating multiple time policies that require the same threshold values, you can save time by copying the threshold levels and their corresponding values from one policy to another.

NEW QUESTION # 70

.....

The NewPassLeader Splunk IT Service Intelligence Certified Admin (SPLK-3002) PDF dumps file work with all devices and operating system. You can easily install the SPLK-3002 exam questions file on your desktop computer, laptop, tabs, and smartphone devices and start Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam dumps preparation without wasting further time.
