Effective Reliable NCP-MCA Dumps Ppt & Leader in Qualification Exams & High-quality Valid NCP-MCA Practice Questions

Through the good reputation of word of mouth, more and more people choose to use NCP-MCA study torrent to prepare for the NCP-MCA exam, which makes us very gratified. One of the reason for this popularity is our study material are accompanied by high quality and efficient services so that they can solve all your problems. We guarantee that after purchasing our NCP-MCA Test Prep, we will deliver the product to you as soon as possible about 5-10 minutes. So you don't need to wait for a long time or worry about the delivery time has any delay.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q30-Q35):

NEW QUESTION # 30
A developer has been asked to update the existing blueprint with an additional option of scaling it both out and in.
Where in the Blueprint Editor should the developer make the relevant changes?

* A. Application Profile, Actions
* B. Environment, Actions
* C. Blueprint, Configuration
* D. Configuration, Settings

Answer: A

Explanation:
To enable scaling for a blueprint, the developer needs to add scaling actions to the application profile. Scaling actions are scripts that define how to scale out (add more instances) or scale in (remove instances) of an application tier. The developer can also specify the minimum and maximum number of instances allowed for each tier, and the scaling policy (manual or automatic) based on metrics or schedules. The developer can access the application profile from the Blueprint Editor by clicking on the application name and then selecting the Actions tab. Reference: Nutanix Multicloud Automation Administration (NMCAA) course, Nutanix Certified Professional - Multicloud Automation (NCP-MCA) 6.5 Exam Guide, [Nutanix Calm User Guide]

NEW QUESTION # 31
What are the proper steps to create a Playbook?

* A. 1. Access Intelligent Operations
  2. Create the playbook
  3. Select the playbook action
  4. Select the playbook trigger(s)
  5. Save & Close
* B. 1. Access Intelligent Operations
  2. Create the playbook
  3. Select the playbook trigger
  4. Select the playbook action(s)
  5. Save & Close
* C. 1. Access Self Service
  2. Create the playbook
  3. Select the playbook action
  4. Select the playbook trigger(s)
  5. Save & Close
* D. 1. Access Self Service
  2. Create the playbook
  3. Select the playbook trigger
  4. Select the playbook action(s)
  5. Save & Close

Answer: B

Explanation:
Playbooks are a feature of Intelligent Operations (formerly Prism Pro or X-Play), not Nutanix Self-Service (formerly Calm).
Therefore, the first step is always to access the Intelligent Operations console in Prism Central.
The logical flow for defining an automation routine in a Playbook is Trigger first, then Action.
* Select Trigger:The administrator must first define when the playbook runs (e.g., on an Alert, an Event, or Manually).
* Add Actions:Once the trigger is established, the administrator defines what happens (e.g., Power off VM, Send Email, Slack

Notification).
The correct order found in the Nutanix Intelligent Operations Guide is: Access Intelligent Operations > Create Playbook > Select Trigger > Add Actions > Save.

NEW QUESTION # 32

An administrator needs to restore a snapshot from a VM running in AWS that was created with a single VM blueprint Within. which Calm tab should the administrator perform this task?

- A. Manage
- B. Snapshots
- C. Recovery

Answer: B

Explanation:
According to the Nutanix Calm documentation1, the Snapshots tab allows the administrator to view, create, and restore snapshots of the VMs that are part of a blueprint. The Manage tab only shows the status and actions of the blueprint, and the Recovery tab is used for disaster recovery operations2. References:
* 1 Nutanix Calm: Introducing Snapshot and Restore Actions3
* 2 Nutanix Calm User Guide: Blueprint Operations

NEW QUESTION # 33

An administrator has been tasked with integrating Playbooks with notifications through a collaboration and communication platform. How would the administrator integrate notifications into their Playbooks?

- A. Navigate to Settings and add an Operation Policy for the specific collaboration platform.
- B. Add Webhook Action with External System Type and External System IP for the specific collaboration platform.
- C. Add platform specific pre-built Action to Playbooks for the specific collaboration platform.
- D. Navigate to Sharing Playbook and share with the specific collaboration tool.

Answer: C

Explanation:
Nutanix Intelligent Operations (X-Play) allows administrators to create custom automation playbooks by defining triggers and associated actions. The system provides a library of pre-built actions to simplify integration.
To integrate notifications with standard collaboration platforms, the administrator should select the Action specific to that platform.
For example, the Slack and Microsoft Teams actions are natively available in the Action Gallery.
* Slack Action: Requires entering a Slack Token and Channel Name.
* Microsoft Teams Action: Requires entering a Webhook URL from the Teams instance.
Using these pre-built actions is the direct and recommended method for supported platforms, as opposed to configuring a generic Webhook manually (Option D) or modifying global settings (Option B).

NEW QUESTION # 34

Which Prism Central setting must first be configured in order to add users to a Project?

- A. Pulse
- B. Authentication Directory
- C. HTTP Proxy
- D. Local User Role Mapping

Answer: C

NEW QUESTION # 35

......

With the help of the NCP-MCA practice exam questions and preparation material offered by RealVCE, you can pass any NCP-

MCA certifications exam in the first attempt. You don't have to face any trouble, and you can simply choose to do a selective NCP-MCA brain dumps to pass the exam. We offer guaranteed success with NCP-MCA Questions on the first attempt, and you will be able to pass the NCP-MCA exam in short time. You can always consult our NCP-MCA certified professional support if you are facing any problems.
