#### NEW QUESTION # 13

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site where mandatory profiles are being used for all users. Users need to maintain the different printer property settings that are available for their HDX sessions. The administrator has enabled the HDX Printer properties retention policy for the Site. Which setting could the administrator use for this environment?

- A. Retained in user profile only
- B. Do NOT retain printer properties
- C. Saved on the client device only
- D. Held in profile only if NOT saved on client

**Answer: C**

Explanation:

In environments using mandatory profiles, changes are discarded at logoff. To preserve user- specific printer property settings, the HDX Printer properties retention policy must be set to "Saved on the client device only", ensuring the settings persist across sessions.

#### NEW QUESTION # 14

Which step can a Citrix Administrator take in order to use the default compression policies?

- A. Select the compression algorithm (gzip/deflate/identity).
- B. Enable compression on the associated bound services.
- C. Bind the default compression policies to the virtual server.
- D. Disable the Citrix ADC Compression feature at a global level.

**Answer: C**

#### **NEW QUESTION # 15**

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- B. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- **C. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.**
- D. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.

**Answer: C**

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

#### **NEW QUESTION # 16**

A Citrix Administrator is concerned about the TCP overhead associated with Citrix HDX connections. There are concerns about latency and TCP overhead associated with setting up a connection to Virtual Delivery Agent (VDA) resources. What technology should be deployed to move connections to UDP and improve the quality of the user experience?

- A. Citrix Optimizer
- B. Browser Content Redirection
- C. Microsoft Teams Optimization
- **D. HDX Adaptive Transport**

**Answer: D**

Explanation:

HDX Adaptive Transport uses Citrix's Enlightened Data Transport (EDT) protocol, which runs over UDP instead of TCP. This reduces latency, minimizes TCP overhead, and improves the quality and responsiveness of HDX sessions, especially in high-latency or lossy network conditions.
