### **DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q39-Q44):**

#### **NEW QUESTION # 39**

Privacy enhancing tools aim to allow users to take one or more of the following actions related to their personal data that is sent to, and used by online service providers, merchants or other users:

- I) Increase control over their personal data
- II) Choose whether to use services anonymously or not
- III) Obtain informed consent about sharing their personal data
- IV) Opt-out of behavioral advertising or any other use of data

- A. Only I
- B. Only II
- C. Only I and II
- D. I, II, III and IV

**Answer: D**

#### **NEW QUESTION # 40**

Which among the following would not be characteristic of a good privacy notice?

- A. Easy to understand
- B. Clear and concise
- C. Multi-lingual
- D. Comprehensive - explaining all the possible scenarios and processing details making the notice lengthy

**Answer: D**

#### **NEW QUESTION # 41**

What are the two phases of DSCI Privacy Third Party Assessment?

- A. Initial and Final
- B. Initial and Detailed
- C. None of the above
- D. Primary and Secondary

**Answer: B**

Explanation:

The DSCI Assessment Framework for Privacy (DAF#P) outlines that the Privacy Third Party Assessment is conducted in two phases:

- \* Initial Assessment - High-level review of privacy practices and process readiness
- \* Detailed Assessment - In-depth evaluation of privacy implementation and evidence review This phased approach allows assessors to identify maturity gaps early and gather comprehensive evidence in the second phase.

## NEW QUESTION # 42

PPP

Based on the visibility exercise, the consultants created a single privacy policy applicable to all the client relationships and business functions. The policy detailed out what PI company deals with, how it is used, what security measures are deployed for protection, to whom it is shared, etc. Given the need to address all the client relationships and business functions, through a single policy, the privacy policy became very lengthy and complex. The privacy policy was published on company's intranet and also circulated to heads of all the relationships and functions. W.r.t some client relationships, there was also confusion whether the privacy policy should be notified to the end customers of the clients as the company was directly collecting PI as part of the delivery of BPM services. The heads found it difficult to understand the policy (as they could not directly relate to it) and what actions they need to perform. To assuage their concerns, a training workshop was conducted for 1 day. All the relationship and function heads attended the training. However, the training could not be completed in the given time, as there were numerous questions from the audiences and it took lot of time to clarify.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance and Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too, has attracted company's attention given the phenomenal increase in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

What are key issues in the policy design process? (upto 250 words)

**Answer:**

Explanation:

See the answer in explanation below.

Explanation:

The PI policy (or for that matter any policy) needs to be purpose driven, clear, concise, easily accessible to be effective. Ideally the PI policy controls needs to be implemented as a part of the overall operations process so that the implementation of this policy is automatic. In this case, the issues with the policy design process was

1. the policy was a generic and common policy for all the business functions/unit. Such policies become lengthy, complex and deters the policy subjects from adopting it.
2. All the client relationships and business functions are unique. They differ in their purpose, objectives, process and hence also in the type of the information then collect and process. The policy should be easy and customized for each department.
3. The policy is published on the intranet portal. There is no guarantee that the policy is read and consumed by all desired stakeholder. As opposed to this, this policy matter should be made relevant and customized for the stakeholders and be PUSHED to them against them PULLING it at their discretion.
4. The roles and responsibilities, accountability and penalty for each stakeholders should be defined clearly so there is no confusion in the adherence to the policy.
5. The training workshop was generic and was short. It was not completed in time. The training program should be customized and contextual to the department people that are being trained. The program should be conducted in a very professional environment and method.

6. Since the policy, purpose, roles and responsibilities were not clear, the training program did not go well.

### NEW QUESTION # 43

From the following list, identify the technology aspects that are specially designed for upholding privacy:

- I) Data minimization
- II) Intrusion prevention system
- III) Data scrambling
- IV) Data loss prevention
- V) Data portability
- VI) Data obfuscation
- VII) Data encryption
- VIII) Data mirroring

- A. Only I, III, IV, VI and VII
- B. Only I, III, V, VII and VIII
- C. Only II, V, VI, VII and VIII
- D. Only I, II, III, VII and VIII

#### Answer: A

Explanation:

Privacy-enhancing technologies (PETs) are critical for operationalizing privacy principles. According to the DPF:

- \* Data minimization (I): Collect only necessary data
- \* Data scrambling (III), Obfuscation (VI), and Encryption (VII): Techniques to protect identity and data content
- \* Data loss prevention (IV): Prevent unauthorized sharing or leakage

Data mirroring and intrusion prevention systems are primarily security mechanisms and not specifically privacy-focused. Data portability, while a right, is not a technology per se for "upholding" privacy but for enabling user control.

Thus, C includes the most appropriate privacy technologies.

### NEW QUESTION # 44

.....

You can change the time and type of questions of the DSCI DCPLA exam dumps. DSCI Certified Privacy Lead Assessor DCPLA certification practice questions improve your confidence and ability to complete the exam timely. The DSCI DCPLA real questions are an advanced strategy to prepare you according to the test service.
