Reliable Slack-Admn-201 Test Topics, Valid Slack-Admn-201 Test Cram

In today's fast-paced world, having access to Salesforce Certified Slack Administrator (Slack-Admn-201) study material on the go is important. PracticeMaterial Salesforce Certified Slack Administrator (Slack-Admn-201) PDF questions are compatible with all smart devices, allowing you to study and prepare for the Slack-Admn-201 Exam whenever and wherever you choose. Since you can access real Salesforce Slack-Admn-201 dumps in PDF from your smartphone or tablet, you can easily fit Slack-Admn-201 exam preparation into your busy schedule.

Salesforce Certified Slack Administrator Sample Questions (Q57-Q62):

NEW QUESTION # 57

Pawnee Technologies is a global cloud software company that uses Slack Enterprise Grid to communicate and collaborate. You're a Slack Workspace Admin for your company's External workspace where your team collaborates with external partners. Today you're onboarding a new team member who will need to log in and join your workspace. You receive a direct message (DM) from them reporting a problem. While they had no issues joining the Global and Social workspaces, they report that Slack isn't giving them an option to join the External workspace, even though it shows up when they search for it.

Why is the new hire unable to join your workspace?

(Select the best answer.)

- A. The workspace requires the new member to request to join.
- B. The workspace requires approval from the external partner for new members to join.
- **C. The workspace requires an invitation from the Workspace Admin to join.**
- D. The Workspace Admin must add the new hire as a Single Channel Guest to the workspace.

Answer: C

Explanation:

In Slack Enterprise Grid, for workspaces set to Invite Only (especially those involving external partners), users must be explicitly invited.

According to Slack documentation:

"Invite-only workspaces require an invitation from a Workspace Admin before members can join." Because the External workspace is likely Invite Only for security reasons, the new hire must be invited to join it. Searching and seeing the workspace does not bypass the requirement.

-

NEW QUESTION # 58

Your Slack Governance Support model includes a group of people designated as Workspace Admins to distribute the workload. What is a key benefit of setting up a user group for the Workspace Admins?

- A. Any @mention of the Workspace Admin user group will notify all of the group members, allowing any Slack member to send questions to the group.
- B. People that the team works with in Slack Connect can be added to the user group in order to work more closely with the Workspace Admins on certain issues.
- C. Any Enterprise Grid member can @mention the user group from any workspace within the Enterprise Grid org to send a notification to all of the user group members.
- D. Any Slack member by default can add themselves to the Workspace Admin user group to follow along with their activities.

Answer: A

Explanation:

Slack user group functionality explains:

"When a user group is @mentioned, all members of the user group are notified, making it easy for others to reach all members at once for questions or updates." Option A is misleading because visibility of user groups depends on workspace settings. B and C are inaccurate - external users cannot be added, and users cannot add themselves to user groups.

(Reference: Slack Administration Study Guide - Using User Groups)

NEW QUESTION # 59

You're an Org Admin at a security-conscious financial services company. You're rolling out Enterprise Mobility Management (EMM) across the organization.

Leadership asks if it is possible to require guests to use the Slack for EMM app.

How should you respond to this request?

(Select the best answer.)

- A. Guests can be required to use the Slack for EMM app.
- B. Guests can only login through the desktop app to access your workspaces.
- C. Guests are required to use the Slack for EMM app by default.
- D. It's not possible to require guests to use the Slack for EMM app.

Answer: D

Explanation:

Slack's documentation on EMM policies specifies:

"Enterprise Mobility Management (EMM) requirements apply only to full members of your Slack organization. Guest accounts (Single-Channel or Multi-Channel Guests) are not required to use the Slack for EMM app." Thus, guests are exempt from EMM enforcement. Options B and C incorrectly state guests can be controlled via EMM. D is unrelated.

(Reference: Slack Administration Study Guide - EMM and Guest Account Behavior)

NEW QUESTION # 60

You're a Workspace Admin at a real estate technology company. Your HR team asks you to simplify how new hires request access to the tools they need.

This onboarding step is currently done manually through emails. Employees are then required to follow up via email to IT support, causing delays.

Given all new hires have access to Slack pre-onboarding, which two Slack features would you recommend to improve these processes? (Select the TWO best answers.)

- A. Use Workflow Builder to automatically send instructions on how to request access to new tools when new employees join the default #general channel.
- B. Use Workflow Builder to automatically post instructions on how to request access to new tools in the default #general channel once per week.
- C. Use Workflow Builder to create a form for tool access requests, to simplify data collection and reduce wasted time going back and forth in email.
- D. Invite each new employee as a Single-Channel Guest before they join, to give them more advance time to submit tool access requests.

Answer: A,C

Explanation:

Slack recommends using Workflow Builder to:

"Trigger onboarding workflows automatically when employees join channels, and use custom forms to collect consistent information and reduce unnecessary communication." Inviting new hires as Single-Channel Guests (Option B) is not relevant because they are expected to have full access pre-onboarding.

(Reference: Slack Administration Study Guide - Automating Onboarding with Workflows)

-

NEW QUESTION # 61

Your organization enabled data residency and chose to host your organization's data in the Montreal, Canada region. Which specific data types will be uniquely stored in this geographic region? (Select the best answer.)

- A. Messages, files, data used for analytics, snippets and posts
- B. Messages, files, snippets, workspaces and channel membership information
- C. Messages, files, snippets, posts and member profiles
- D. Messages, files, snippets, posts and files

Answer: C

Explanation:

With Slack's data residency, the following data types are stored in the selected region:

"Messages, files, snippets, posts, and member profiles."

Data used for analytics and some metadata may still be processed globally, but the primary user-generated content is kept within the specified region.
