

# HPE7-A03 Latest Exam Camp - Test HPE7-A03 Cram Review

BONUS!!! Download part of DumpsQuestion HPE7-A03 dumps for free: <https://drive.google.com/open?id=19UMv7G18nQKjys900K0Bk3qDQ9f6Ei86>

Belive it or not, our efficient and authoritative HPE7-A03 exam materials are always here waiting for you to provide you with the best help of HPE7-A03 exam preparation. Maybe you just need a HPE7-A03 exam certification to realize your dream of promotion. We know that impulse spending will make you regret, so we suggest that you first download our free demo to check before purchasing. You can easily download our free demo of HPE7-A03 Exam; come on and try it.

We hold on to inflexible will power to offer help both providing the high-rank HPE7-A03 exam guide as well as considerate after-seals services. With our HPE7-A03 study tools' help, passing the exam will be a matter of course. It is our abiding belief to support your preparation of the HPE7-A03 study tools with enthusiastic attitude towards our jobs. And all efforts are paid off. The passing rate of exam candidates who chose our HPE7-A03 Exam Torrent is over 98 percent. All the knowledge is based on the real exam without the chance of failure. So we are never shirking duties and are totally trust-able. So please have a look of our HPE7-A03 exam torrent' traits and keep faithful to our HPE7-A03 exam guide.

## Pass Guaranteed Quiz Latest HP - HPE7-A03 Latest Exam Camp

HPE7-A03 study material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction. Experts hired by HPE7-A03 exam questions not only conducted in-depth research on the prediction of test questions, but also made great breakthroughs in learning methods. With HPE7-A03 training materials, you can easily memorize all important points of knowledge without rigid endorsements. With HPE7-A03 Exam Torrent, you no longer need to spend money to hire a dedicated tutor to explain it to you, even if you are a rookie of the industry, you can understand everything in the materials without any obstacles. With HPE7-A03 exam questions, your teacher is no longer one person, but a large team of experts who can help you solve all the problems you have encountered in the learning process.

### HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.</li> </ul>

## HP Aruba Certified Campus Access Architect Exam Sample Questions (Q29-Q34):

### NEW QUESTION # 29

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City

- Dila Health Center is located in City A

- Mount Health Center is located in City B

- Rock Health Center is located in City C

- Branch clinics are located at different locations across the United States

Requirements:

- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.

- Seamless integration across wired, wireless, WAN, SD-Branch, IoT

- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.

- All-access points must support the following features and specifications: 802.11.ax (Wi-Fi 6E Certified)

- Security options including WPA2/WPA3, 802.1X with Radius secure authentication

- Identify and authenticate every wireless and wired device

- End-to-end role-based security

- Seamless mobility across the hospital for medical teams, patients, and visitors

- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site

- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs

- Fully redundant branch solution with dynamic path selection to the hospital. The customer states that the hospital has approximately 35,000 devices connected to its network.

Unfortunately, they do not have a tool to accurately determine the device count.

Select the best option to obtain an accurate device count.

- A. NetEdit
- **B. HPE Aruba Networking ClearPass Profiler**
- C. AirWave
- D. HPE Aruba Networking Central

**Answer: B**

Explanation:

ClearPass Profiler accurately identifies and counts all devices on the network by analyzing DHCP, RADIUS, HTTP, MAC OUI, and traffic fingerprints. This provides a reliable, automated inventory of all connected endpoints, making it the best option for determining the true device count.

### NEW QUESTION # 30

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems. Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless I ANs. and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time Insight. troubleshooting tools, and Service Level performance reporting
- Seamless integration across wired, wireless. WAN. SD-Branch. IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11ax (Wi-Fi 6E Certified)
- Security options including WPA2/WPA3. 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical learns, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital The customer states that the hospital has approximately 35.000 devices connected to its network.

Unfortunately, they do not have a tool to accurately determine the device count.

Select the best option to obtain an accurate device count

- A. Airwave
- B. NetEdit
- C. HPE Aruba Networking ClearPass Profiler
- D. HPE Aruba Networking Central

**Answer: C**

### NEW QUESTION # 31

Which is true when it comes to HPE Aruba Networking Central licensing for gateways? (Select two.)

- A. WLAN Gateway licenses allow normal SD-Branch features within a campus.
- B. SD-Branch Gateway licenses allow normal WLAN Gateway features within a campus..
- C. Gateway normal licensing is subdivided into three categories: Foundation, Advanced, and Foundation Base.
- D. SD-WAN Gateway functionality requires security licensing.

**Answer: B,D**

Explanation:

In the context of Aruba Central licensing for gateways, it is true that SD-WAN Gateway functionality requires a specific security licensing (Option B), which is essential for enabling advanced security features and capabilities in an SD-WAN deployment. This includes functionalities like firewall, threat management, and secure VPN connections. Additionally, Aruba SD-Branch Gateway licenses allow for the use of standard WLAN Gateway features within a campus environment (Option C). This means that with an SD-Branch Gateway license, the gateway can handle traditional WLAN management and security tasks, in addition to its SD-WAN capabilities, providing a unified solution for both branch and campus deployments.

### NEW QUESTION # 32

A global cruise line company needs to refresh its current fleet. They will refresh the insides' of the ship to be cost-effective and

increase their sustain ability. They Mill replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh Us current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests Each ship has a LAN infrastructure consisting of two core switches, up to

10 redundant distribution switches, and up to 500 access switches (400 cabins. 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDF's of the ship. Each cabin and technical room gets one single access switch. The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF. of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF. the maximum length is 60 meters (200 ft).

Each technical room is connected by a single OM2 pail to the IDF. with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbEto handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running instantOS (less than 300 APs). the customer has no change in WLAN requirements. The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed. The week after the presentation of your design to the CIO of the cruise line company, the CIO calls you to discuss increasing trie security of the wired network Infrastructure. Since one of their competitors had one of their cruise ships cyber hacked, the CSO of the cruise line has mandated increased security on the wired network. They nave heard about dynamic segmentation and central and decentral overlay networks.

What would you advise as the most cost-efficient solution?

- A. Standardize on Aruba 6300 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.
- B. Standardize on Aruba 6000 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.
- C. Standardize on Aruba 6100 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.
- D. Standardize on Aruba 6200 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.

**Answer: A**

Explanation:

For a global cruise line company looking to refresh its fleet with a focus on sustainability and cost- effectiveness, while not changing its current security requirements, the most suitable option would be to standardize on Aruba 6300 switches for the access layer. The Aruba 6300 switches offer advanced security features and scalability, which is crucial for the dynamic and demanding environment of a cruise ship. Additionally, implementing a cluster of 9240 Gateways and central overlay networks based on User-Based Tunneling (UBT) will enhance the security of the wired network infrastructure. This approach aligns with the Aruba ESP (Edge Services Platform) architecture, providing a unified infrastructure that integrates security, AI-powered operations, and cloud-native agility. The central overlay networks will enable the cruise line to segment network traffic, apply consistent policies, and provide secure access across the fleet, meeting the increased security demands without compromising on performance or sustainability.

### NEW QUESTION # 33

Which documentation resources can be used for finding validated information on HPE Aruba Networking products that assist the architect in building the solution design? (Choose three.)

- A. competitive documentation
- B. configuration guides
- C. data sheets
- D. Gartner annual reports
- E. validated Solution Guide
- F. product reviews (CNET, Network World)

**Answer: B,C,E**

#### Explanation:

To ensure a high-performing and resilient network design, architects must rely on official, verified technical documentation provided by the manufacturer. The following resources are recognized as the primary

"validated" sources for solution design:

\* Data Sheets: These provide the official hardware and software specifications, including throughput, port density, and feature support, which are critical for selecting the correct products during the "Select Products" phase of the design process.

\* Validated Solution Guides (VSG): These are the most critical architectural resources. They contain cross-portfolio designs that have been rigorously tested and validated by Aruba's Technical Marketing Engineering (TME) and Quality Assurance teams.

Following a VSG ensures the design is based on proven methodologies and recommended best practices rather than "corner cases".

\* Configuration Guides: While often used during implementation, configuration guides are essential for architects to understand the detailed integration requirements and optimization settings needed to ensure that the proposed architecture is technically viable.

In contrast, resources like competitive documentation, Gartner reports, and external product reviews are considered subjective or external and do not provide the validated technical specifications required to build a manufacturer-backed solution design.

#### NEW QUESTION # 34

.....

Our HPE7-A03 exam cram has been revised for lots of times to ensure all candidates can easily understand all knowledge parts. In the meantime, the learning process is recorded clearly in the system, which helps you adjust your learning plan. On the one hand, our company has benefited a lot from renovation. Customers are more likely to choose our products. On the other hand, the money we have invested is meaningful, which helps to renovate new learning style of the HPE7-A03 Exam. So, why not buy our HPE7-A03 test guide?
