Our HCSA-Presales-Storage V4.0 (H19-308_V4.0) exam questions are being offered in three easy-to-use and compatible formats. These Huawei H19-308_V4.0 exam dumps formats offer a user-friendly interface and are compatible with all devices, operating systems, and browsers. The HCSA-Presales-Storage V4.0 (H19-308_V4.0) PDF questions file contains real and Valid H19-308_V4.0 Exam Questions that assist you in H19-308_V4.0 exam dumps preparation and boost the candidate's confidence to pass the challenging HCSA-Presales-Storage V4.0 (H19-308_V4.0) exam easily. The HCSA-Presales-Storage V4.0 (H19-308_V4.0) PDF dumps file work with all devices and operating system.

Dear, when you find Huawei H19-308_V4.0 practice training, please assess it with careful analysis and do not miss it any more. The H19-308_V4.0 free demo is available and accessible for download. You can have a try and do your decision. In addition, it is very easy to make an order with our streamline process. Then you can get the H19-308_V4.0 Test Dumps in about 5-10 mins after payment and instant download it, and start study. 100% is the guarantee of us, so please test assured to purchase H19-308_V4.0 practice torrent.

H19-308_V4.0 Exam Vce Free, New H19-308_V4.0 Test Format

We all know that the major problem in the IT industry is a lack of quality and practicality. iPassleader Huawei H19-308_V4.0 questions and answers to prepare for your exam training materials you need. Like actual certification exams, multiple-choice questions (multiple-choice questions) to help you pass the exam. The our iPassleader Huawei H19-308_V4.0 Exam Training materials, the verified exam, these questions and answers reflect the professional and practical experience of iPassleader.

Huawei H19-308_V4.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • OceanStor Pacific: OceanStor Pacific is Huawei's distributed storage for massive-scale data management and cloud-native applications. It provides scalability, resilience, and performance for big data, AI workloads, and large-scale storage.
Topic 2	<ul style="list-style-type: none"> • Object Storage Basis: Object storage manages data as discrete units with metadata and unique identifiers for efficient retrieval. This scalable architecture suits unstructured data, cloud applications, and big data analytics requiring massive capacity.
Topic 3	<ul style="list-style-type: none"> • OceanStor New Hybrid Flash Storage: OceanStor Hybrid Flash combines flash and disk storage to balance performance and cost-effectiveness. This architecture optimizes resources by placing performance-sensitive data on flash and capacity-oriented data on disk.
Topic 4	<ul style="list-style-type: none"> • OceanStor Dorado: OceanStor Dorado is Huawei's all-flash storage solution for mission-critical applications demanding ultra-low latency. This platform leverages NVMe technology and intelligent management to accelerate digital transformation.
Topic 5	<ul style="list-style-type: none"> • SAN Storage Basis: Storage Area Networks provide high-speed, block-level storage over dedicated networks for enterprise applications requiring low latency. SAN enables multiple servers to share storage resources while supporting advanced features like snapshots and replication.
Topic 6	<ul style="list-style-type: none"> • OceanProtect Backup Storage: OceanProtect offers comprehensive data protection with efficient backup, recovery, and retention features. This solution ensures security through encryption and deduplication while reducing storage costs.
Topic 7	<ul style="list-style-type: none"> • NAS Storage Basis: Network-Attached Storage delivers file-level storage over standard networks, accessible to multiple users simultaneously. NAS systems offer cost-effective solutions for file sharing, collaboration, and centralized data management.
Topic 8	<ul style="list-style-type: none"> • Data Storage Basis: Data storage is the foundation of IT infrastructure, enabling efficient storage, management, and retrieval of digital information. Understanding storage fundamentals is essential for selecting solutions that meet business performance, capacity, and reliability requirements.

Huawei HCSA-Presales-Storage V4.0 Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which statements about high performance guarantee of OceanStor Dorado are correct? (Choose all that apply.)

- A. The FlashLink intelligent algorithm is used, enabling disk-controller collaboration to improve data read/write and reconstruction efficiency.
- B. File systems and LUNs are fully balanced. A single LUN or file system maximizes performance of all controllers.
- C. With the native all-flash architecture, performance does not deteriorate much when deduplication, compression, and snapshot functions are enabled.
- D. The end-to-end NVMe architecture enables direct connection between SSDs and CPUs, greatly improving read and write efficiency.

Answer: A,B,C,D

Explanation:

OceanStor Dorado ensures high performance through the FlashLink intelligent algorithm for disk-controller collaboration, balanced file systems and LUNs for optimal controller usage, native all-flash architecture that maintains performance even with advanced

features enabled, and an end- to-end NVMe architecture that enables direct, efficient SSD-to-CPU connectivity.

NEW QUESTION # 49

What protocols does the DAS interface support? (Choose all that apply.)

- A. SAS
- B. Fibre Channel
- C. InfiniBand
- D. iSCSI

Answer: A,B

Explanation:

Fibre Channel and SAS are protocols commonly supported by DAS (Direct-Attached Storage) interfaces. Fibre Channel provides high-speed connectivity, and SAS (Serial Attached SCSI) is widely used for connecting servers to directly attached storage devices. DAS does not typically support InfiniBand or iSCSI, as these are more associated with SAN or high-performance computing environments.

NEW QUESTION # 50

What is the major difference between OceanStor 6800 V5 and OceanStor 6800 V3?

- A. Back-end full interconnection
- B. Number of supported disks
- C. Number of scalable controllers

Answer: A

NEW QUESTION # 51

Which are the SAN types classified by architecture? (Select all that apply)

- A. IP SAN
- B. FC SAN
- C. Centralized SAN
- D. Distributed SAN

Answer: C,D

Explanation:

When classifying storage by its underlying architecture rather than its transmission protocol, Huawei distinguishes between two main structures. Centralized SAN (Option D) refers to the traditional controller-based array, such as the OceanStor Dorado or OceanStor Hybrid series. In this architecture, all storage resources are managed by a centralized pair or cluster of controllers within a single enclosure system. This provides high stability and specialized data services but has physical limits on the number of controllers and disks it can scale to.

Distributed SAN (Option B), such as the OceanStor Pacific (formerly FusionStorage), utilizes a scale-out architecture. It aggregates the local storage of multiple standard x86 or ARM servers into a massive, unified virtual storage pool. This architecture eliminates the bottlenecks of centralized controllers, allowing for near-infinite scalability in both performance and capacity by simply adding more nodes. While IP SAN and FC SAN are valid terms, they classify storage by the network protocol used (Ethernet/IP vs. Fibre Channel) rather than the organizational architecture of the storage system itself.

NEW QUESTION # 52

Which are NAS quota technologies in the industry?

- A. Limit
- B. Soft
- C. Advisory
- D. Hard
