You will have a sense of achievements when you finish learning our ISO-IEC-27001-Foundation study materials. During your practice of the ISO-IEC-27001-Foundation preparation guide, you will gradually change your passive outlook and become hopeful for life. We strongly advise you to have a brave attempt. You will never enjoy life if you always stay in your comfort zone. And our ISO-IEC-27001-Foundation Exam Questions will help you realize your dream and make it come true.

## APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.</li></ul>

## Practice ISO-IEC-27001-Foundation Exam - Latest ISO-IEC-27001-Foundation Real Test

Our company is a professional certificate exam materials provider. We have occupied in the field for years, therefore we have rich experiences. ISO-IEC-27001-Foundation learning materials of us are high-quality, and we receive many good feedbacks from our customers, and they think highly of the ISO-IEC-27001-Foundation Exam Dumps. In order to serve you better, we have online and offline chat service, you can ask any questions about the ISO-IEC-27001-Foundation learning materials. Besides, we provide you with free update for one year after purchasing.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q36-Q41):

#### NEW QUESTION # 36

Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- A. Third party information security awareness materials
- B. The budget assigned to operate the ISMS and its related allocations
- C. A statement of correspondence between other ISO standards and the ISMS
- D. **Records of management decisions related to continual improvement**

#### Answer: D

Explanation:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentation necessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third- party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includes records of management review decisions related to continual improvement, confirming answer: A.

#### NEW QUESTION # 37

Which statement about the conduct of audits is true?

- A. **One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- C. During Stage 1 of a certification audit, evidence is collected by observing activities
- D. Third party audits are conducted by a customer of the organization

#### Answer: A

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC 17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

#### NEW QUESTION # 38

Identify the missing word(s) in the following sentence.

"Information security, cybersecurity and privacy protection - [ ? ]" is the title of ISO/IEC 27005.

- A. Information security controls
- B. Information security management systems - Requirements
- **C. Guidance on managing information security risks**
- D. Guidelines for information security management systems auditing

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:

ISO/IEC 27005:2022 is titled:

"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).

Thus, the correct answer is C: Guidance on managing information security risks.

#### **NEW QUESTION # 39**

To whom does the scope of the Terms and conditions of employment control apply?

- A. Employees only
- B. Personnel and the organization
- **C. All employees, contractors and third-party users**
- D. Contractors only

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is C.

#### **NEW QUESTION # 40**

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Suitability
- **B. Importance**
- C. Adequacy
- D. Effectiveness

**Answer: B**

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

\* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

\* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

\* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and

actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, optionD: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

## NEW QUESTION # 41

People is faced with many unknown factors and is also surrounded by unknown temptations in the future. Therefore, we must lay a solid foundation for my own future when we are young. Are you ready? Pass4cram APMG-International ISO-IEC-27001-Foundation practice test is the best. Just for the exam simulations, you will find it will be useful to actual test. More information, please look up our APMG-International ISO-IEC-27001-Foundation free demo. After you purchase our products, we offer an excellent after-sales service.
