Latest Dynatrace-Associate Test Prep | New Dynatrace-Associate Exam Labs

Our Dynatrace-Associate preparation materials are willing to give you some help if you want to be better in your daily job and get a promotion on matter on the salary or on the position. Those who have used Dynatrace-Associate training engine have already obtained an international certificate and have performed even more prominently in their daily work. As it should be, they won the competition. So as they wrote to us that our Dynatrace-Associate Exam Questions had changed their life.

Dynatrace Associate Certification Exam Sample Questions (Q38-Q43):

NEW QUESTION # 38

I need to take my live environment offline while I perform an upgrade. However, the upgrade will overlap with scheduled Synthetic tests. What can I configure in Dynatrace to avoid false alerting?

- A. Maintenance Window
- B. Credential vault
- C. Synthetic On-demand execution
- D. Delete the Synthetic monitors

Answer: A

Explanation:

A Maintenance Window in Dynatrace allows you to suppress monitoring alerts during planned downtime or maintenance activities. When configured, it prevents problem detection and alerting for the specified entities and timeframe.

This ensures that:

- * Scheduled Synthetic failures during maintenance are not treated as real incidents
- * Alert noise is reduced
- * Teams can perform upgrades without triggering unnecessary alerts

Other options are not suitable:

- * Credential vault manages secrets
- * Synthetic on-demand execution manually triggers tests
- * Deleting monitors is not a practical or recommended solution

Reference: Based on official Dynatrace University training materials on maintenance windows and alert suppression.

NEW QUESTION # 39

Name the 3 pillars of observability?

- A. Metrics
- B. Traces
- C. Automation
- D. Dynatrace RUM
- E. Logs

Answer: A,B,E

Explanation:

The three pillars of observability are:

- * Metrics - numerical performance data
- * Logs - event-based records
- * Traces - end-to-end request tracking

These pillars provide the foundation for understanding system behavior.

Other options:

- * Automation is not a pillar
- * RUM is a capability built on top of these pillars

Reference: Based on standard observability principles covered in Dynatrace University.

NEW QUESTION # 40

I have a Smart IoT device which supports neither OneAgent nor Agentless RUM. What could I use to track User Sessions in Dynatrace?

- A. Dynatrace WebAgent
- B. Dynatrace OpenKit
- C. Dynatrace Extensions v2

Answer: B

Explanation:

OpenKit is used for custom instrumentation when standard agents are not supported.

It enables:

- * Tracking user sessions
- * Sending custom telemetry data
- * Monitoring IoT or unsupported environments

Reference: Based on official Dynatrace University training materials on OpenKit.

NEW QUESTION # 41

I want to reduce the mean-time-to-identify critical security vulnerabilities in my environment by sending a notification to the correct team's Slack channel when detected. How can I achieve this?

- A. Workflow with an Event Trigger, Ownership and Slack integration
- B. Manually check the Security Vulnerability page
- C. Manually check the Problems page
- D. Application Security app

Answer: A

Explanation:

Dynatrace enables automated response through Workflows :

- * Event triggers detect security issues
- * Ownership ensures the correct team is identified
- * Slack integration sends notifications automatically

This automation significantly reduces detection and response time.

Manual checking options do not meet the requirement for automation.

Reference: Based on official Dynatrace University training materials on workflows and automation.

NEW QUESTION # 42

A problem opened with the event category of "Slowdown". Assuming Dynatrace is using the default anomaly detection settings, what entity types can be the root cause of this problem? (Select all that apply)

- A. Processes
- B. Services
- C. Hosts
- D. Cloud Providers
- E. Applications

Answer: A,B,C

Explanation:

In Dynatrace, "Slowdown" problems are typically triggered by performance degradation detected through anomaly detection on monitored entities.

With default settings, the root cause of slowdown problems is usually identified at:

Services, where response time degradation is detected

Processes, where CPU, memory, or other resource bottlenecks occur

Hosts, where infrastructure-level issues impact performance

Applications are higher-level aggregations and are not typically identified as the root cause entity.

Cloud Providers are not treated as root cause entities in anomaly detection.

Dynatrace's AI (Davis) correlates these entities to pinpoint the most likely root cause in the topology.

Reference: Based on official Dynatrace University training materials covering problem detection and Davis AI root cause analysis.

NEW QUESTION # 43

.....

The product we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the Dynatrace-Associate study materials by the method which is convenient for you. They check the update every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the Dynatrace exam questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our exam materials and the professional personnel can help you solve your issue about using Dynatrace-Associate Study Materials.
