Topic 3	<ul style="list-style-type: none"><li>• Protect devices: In this topic, aspiring administrators get knowledge about configuration of endpoint security and management of device updates by using Intune.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Prepare infrastructure for devices: This topic focuses on adding devices to Microsoft Entra ID and enrolling devices to Microsoft Intune.</li></ul>

## Microsoft Endpoint Administrator Sample Questions (Q141-Q146):

### NEW QUESTION # 141

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. You configure Intune to send log data to Log Analytics. You need to review events involving devices that fail to enroll in Intune. What should you monitor?

- **A. the Intune Device log**
- B. operational logs
- C. device compliance organizational logs
- D. audit logs

**Answer: A**

### NEW QUESTION # 142

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

□ AH devices contain an app named App1 and are enrolled in Microsoft Intune.

You need to prevent users from copying data from App1 and pasting the data into other apps.

Which type of policy and how many policies should you create in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

□ Policy type: App protection policy Minimum number of policies: 1 Comprehensive Explanation of Correct Answer Only: The correct answer is app protection policy because it allows you to customize the settings of apps for iOS/iPadOS or Android devices1. One of the settings you can configure is Restrict cut, copy, and paste between other apps, which lets you prevent users from copying data from App1 and pasting the data into other apps2. You only need one policy to apply this setting to all devices that have App1 installed1.

References: 1: App configuration policies for Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Troubleshoot restricting cut, copy, and paste between applications -

Intune | Microsoft Learn <https://learn.microsoft.com/en-us/troubleshoot/mem/intune/app-protection-policies/troubleshoot-cut-copy-paste>

### NEW QUESTION # 143

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

On Computer1, you need to run the Invoke-Command cmdlet to execute several PowerShell commands on Computer2.

What should you do first?

- **A. On Computer2, run the Enable-PSRemoting cmdlet.**
- B. On Computer1, run the New-PSSession cmdlet.
- C. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2.
- D. On Computer2, add Computer1 to the Remote Management Users group.

**Answer: A**

Explanation:

"PowerShell remoting is enabled by default on Windows Server platforms. You can use Enable-PSRemoting to enable PowerShell remoting on other supported versions of Windows and to re-enable remoting if it becomes disabled."

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-6>

### NEW QUESTION # 144

You have an Azure subscription.  
 You have an on-premises Windows 11 device named Device 1.  
 You plan to monitor Device 1 by using Azure Monitor.  
 You create a data collection rule (DCR) named DCR1 in the subscription.  
 To what should you associate DCR1 ?

- A. a Monitored Object
- B. Azure Network Watcher
- **C. Device1**
- D. a Log Analytics workspace

**Answer: C**

Explanation:

To monitor Device 1 by using Azure Monitor, you should associate DCR1 with Device 1. A data collection rule (DCR) defines the data collection process in Azure Monitor, such as what data to collect, how to transform it, and where to send it. A DCR can be associated with multiple virtual machines and specify different data sources, such as Azure Monitor Agent, custom logs, or Azure Event Hubs<sup>1</sup>. To associate a DCR with a virtual machine, you need to install the Azure Monitor Agent on the machine and then select the DCR from the list of available rules<sup>2</sup>. You can also use Azure Policy to automatically install the agent and associate a DCR with any virtual machines or virtual machine scale sets as they are created in your subscription<sup>3</sup>.

The other options are not correct for this scenario because:

Azure Network Watcher is a service that provides network performance monitoring and diagnostics for Azure resources. It is not related to data collection rules or Azure Monitor<sup>4</sup>.

A Log Analytics workspace is a destination where you can send the data collected by a data collection rule. It is not an entity that you can associate a DCR with<sup>5</sup>.

A Monitored Object is not a valid term in the context of Azure Monitor or data collection rules.

#### NEW QUESTION # 145

Your company has a computer named Computer1 that runs Windows 10.  
 Computer1 was used by a user who left the company.  
 You plan to repurpose Computer1 and assign the computer to a new user.  
 You need to redeploy Computer1 by using Windows Autopilot.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

□ Explanation:

#### NEW QUESTION # 146

.....

With a vast knowledge in the field, SureTorrent is always striving hard to provide actual, authentic Microsoft Exam Questions so that the candidates can pass their Endpoint Administrator (MD-102) exam in less time. SureTorrent tries hard to provide the best Endpoint Administrator (MD-102) dumps to reduce your chances of failure in the Endpoint Administrator (MD-102) exam. SureTorrent provides an exam scenario with its Microsoft MD-102 practice test (desktop and web-based) so the preparation of the Endpoint Administrator (MD-102) exam questions becomes quite easier.
