

# ECCouncil - 312-85 Updated Exam Topics

P.S. Free & New 312-85 dumps are available on Google Drive shared by Actual4dump: [https://drive.google.com/open?id=1VRe7Lx\\_\\_1oJz-PvILdzhk6-1FDRtwCHI](https://drive.google.com/open?id=1VRe7Lx__1oJz-PvILdzhk6-1FDRtwCHI)

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The 312-85 test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of 312-85 quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of Certified Threat Intelligence Analyst exam dumps, better meet the needs of users of various kinds of cultural level. Expert team not only provides the high quality for the 312-85 Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of ECCouncil test material and no longer make the same mistake.

The ECCouncil 312-85 desktop practice exam software is customizable and suits the learning needs of candidates. A free demo of the Certified Threat Intelligence Analyst (312-85) desktop software is available for sampling purposes. You can change 312-85 Practice Exam's conditions such as duration and the number of questions. This simulator creates a ECCouncil 312-85 real exam environment that helps you to get familiar with the original test.

## 312-85 Test Vce - 312-85 Dumps Questions

Just the same as the free demo, we have provided three kinds of versions of our 312-85 preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based 312-85 Materials rather than learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our 312-85 study guide.

Taking and passing the CTIA certification exam demonstrates a high level of expertise in cybersecurity threat intelligence and validates the skills and knowledge required to identify and analyze potential cyber threats and vulnerabilities. It is an essential credential for professionals who are looking to enhance their career prospects and take their cybersecurity skills to the next level.

## ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q37-Q42):

### NEW QUESTION # 37

An organization suffered many major attacks and lost critical information, such as employee records, and financial information. Therefore, the management decides to hire a threat analyst to extract the strategic threat intelligence that provides high-level information regarding current cyber-security posture, threats, details on the financial impact of various cyber-activities, and so on. Which of the following sources will help the analyst to collect the required intelligence?

- A. Active campaigns, attacks on other organizations, data feeds from external third parties
- **B. OSINT, CTI vendors, ISAO/ISACs**
- C. Human, social media, chat rooms
- D. Campaign reports, malware, incident reports, attack group reports, human intelligence

**Answer: B**

Explanation:

For gathering strategic threat intelligence that provides a high-level overview of the current cybersecurity posture, potential financial impacts of cyber activities, and overarching threats, sources such as Open Source Intelligence (OSINT), Cyber Threat Intelligence (CTI) vendors, and Information Sharing and Analysis Organizations (ISAOs)/Information Sharing and Analysis Centers (ISACs) are invaluable. OSINT involves collecting data from publicly available sources, CTI vendors specialize in providing detailed threat intelligence services, and ISAOs/ISACs facilitate the sharing of threat data within specific industries or communities.

These sources can provide broad insights into threat landscapes, helping organizations understand how to align their cybersecurity strategies with current trends and threats. References:

\* "Cyber Threat Intelligence: Sources and Methods," by Max Kilger, Ph.D., SANS Institute Reading Room

\* "Open Source Intelligence (OSINT): An Introduction to the Basic Concepts and the Potential Benefits for Information Security," by Kevin Cardwell, IEEE Xplore

### NEW QUESTION # 38

Sarah is a security operations center (SOC) analyst working at JW Williams and Sons organization based in Chicago. As a part of security operations, she contacts information providers (sharing partners) for gathering information such as collections of validated and prioritized threat indicators along with a detailed technical analysis of malware samples, botnets, DDoS attack methods, and various other malicious tools. She further used the collected information at the tactical and operational levels.

Sarah obtained the required information from which of the following types of sharing partner?

- A. Providers of threat actors
- B. Providers of threat data feeds
- C. Providers of threat indicators
- **D. Providers of comprehensive cyber-threat intelligence**

**Answer: D**

Explanation:

The information Sarah is gathering, which includes collections of validated and prioritized threat indicators along with detailed technical analysis of malware samples, botnets, DDoS methods, and other malicious tools, indicates that she is obtaining this intelligence from providers of comprehensive cyber-threat intelligence.

These providers offer a holistic view of the threat landscape, combining tactical and operational threat data with in-depth analysis and context, enabling security teams to make informed decisions and strategically enhance their defenses. References:

\* "Cyber Threat Intelligence Providers: How to Choose the Right One for Your Organization," by CrowdStrike

\* "The Role of Comprehensive Cyber Threat Intelligence in Effective Cybersecurity Strategies," by FireEye

### NEW QUESTION # 39

In which of the following storage architecture is the data stored in a localized system, server, or storage hardware and capable of storing a limited amount of data in its database and locally available for data usage?

- **A. Centralized storage**
- B. Cloud storage
- C. Distributed storage
- D. Object-based storage

**Answer: A**

Explanation:

Centralized storage architecture refers to a system where data is stored in a localized system, server, or storage hardware. This type of storage is capable of holding a limited amount of data in its database and is locally available for data usage. Centralized storage is commonly used in smaller organizations or specific departments within larger organizations where the volume of data is manageable and does not require the scalability offered by distributed or cloud storage solutions. Centralized storage systems simplify data management and access but might present challenges in terms of scalability and data recovery.

"Data Storage Solutions for Your Business: Centralized vs. Decentralized," Techopedia

"The Basics of Centralized Data Storage," by Margaret Rouse, SearchStorage

#### NEW QUESTION # 40

John, a threat intelligence analyst in CyberTech Company, was asked to obtain information that provides greater insight into the current cyber risks. To gather such information, John needs to find the answers to the following questions:

- \* Why the organization might be attacked?
- \* How the organization might be attacked?
- \* Who might be the intruders? Identify the type of security testing John is going to perform.
  - A. White box testing
  - B. Black box testing
  - C. Intelligence-led security testing

**Answer: C**

Explanation:

The focus of John's testing is understanding the motives, methods, and identity of potential attackers. This type of approach aligns with Intelligence-Led Security Testing.

Intelligence-Led Security Testing uses real-world threat intelligence to simulate realistic cyberattack scenarios. It provides insight into adversary behavior, motivations, and techniques, helping organizations assess their resilience against targeted threats.

Such testing answers the why, how, and who questions of potential attacks and is used to validate security controls based on threat actor profiles and campaigns.

Why the Other Options Are Incorrect:

\* A. White box testing: The tester has full knowledge of systems and configurations; it focuses on internal vulnerabilities, not adversary motives.

\* B. Black box testing: The tester has no prior knowledge of the system; it focuses on external attacks, not on intelligence-driven insights about attackers.

Conclusion:

John is performing Intelligence-Led Security Testing, which combines threat intelligence with security assessment to evaluate real-world risks.

Final Answer: B. Intelligence-led security testing

Explanation Reference (Based on CTIA Study Concepts):

In CTIA, intelligence-led testing integrates threat intelligence with penetration testing to replicate realistic adversary scenarios.

#### NEW QUESTION # 41

Sam works as an analyst in an organization named InfoTech Security. He was asked to collect information from various threat intelligence sources. In meeting the deadline, he forgot to verify the threat intelligence sources and used data from an open-source data provider, who offered it at a very low cost. Through it was beneficial at the initial stage but relying on such data providers can produce unreliable data and noise putting the organization network into risk.

What mistake Sam did that led to this situation?

- A. Sam used data without context.
- B. Sam used unreliable intelligence sources.
- C. Sam did not use the proper technology to use or consume the information.
- D. Sam did not use the proper standardization formats for representing threat data.

**Answer: C**

#### NEW QUESTION # 42

.....

Achieving the ECCouncil 312-85 test certification can open up unlimited possibilities for your future career, if you are truly dedicated to jump out your career and willing to make additional learning and extra income. Actual4dump 312-85 exam dumps can help you to overcome the difficulty—from understanding the necessary and basic knowledge to passing the Certified Threat Intelligence Analyst Certified Threat Intelligence Analyst exam test. The goal of ECCouncil 312-85 is to help our customers optimize their IT

technology by providing convenient, high quality Certified Threat Intelligence Analyst exam prep training that they can rely on. ECCouncil 312-85 sure pass exam dumps empower the candidates to master their desired technologies for their own Certified Threat Intelligence Analyst exam test. Dear every one, passing the ECCouncil 312-85 actual test is an easy case for you.
