Axis ANVE certification is highly valued by organizations that require network video surveillance solutions. It demonstrates that the certified professional has the necessary skills and knowledge to design, install, and maintain robust and reliable video surveillance systems. Axis Network Video Exam certification also provides a platform for networking with other professionals in the industry and staying up-to-date with the latest developments in network video technology.

Axis ANVE (Axis Network Video) Exam is a certification program that validates an individual's expertise in network video solutions. Axis Network Video Exam certification is designed for professionals who work with Axis network video products and solutions. It covers a range of topics including network video technologies, product features, system design, and troubleshooting.

Axis Network Video Exam Sample Questions (Q64-Q69):

NEW QUESTION # 64

An installer needs to integrate a camera inside a vending machine. Which of the following camera types is the most appropriate?

- A. Bullet camera

- B. PTZ camera
- C. Box camera
- D. Modular camera

Answer: D

Explanation:

"Modular cameras (also called sensor units) are ideal for discreet and flexible installations in tight or unconventional spaces, such as ATMs, vending machines, and door intercoms, because the sensor and main unit can be separated and mounted independently."

- Axis Communications Academy, Network Video Fundamentals, 2022

"Axis modular cameras are specifically designed for integration into machines, kiosks, and other compact environments where space is limited."

NEW QUESTION # 66

Which security features are provided through a managed switch?

- A. HTTPS encryption and IP subnets
- B. IEEE 802.1 X port-based authentication and VLANs
- C. IP subnets and VLANs
- D. IEEE 802.1 X port-based authentication and HTTPS encryption

Answer: D

Explanation:

Managed switches offer a variety of security features essential for maintaining the integrity and confidentiality of network data. IEEE 802.1X port-based authentication ensures that only authorized devices can connect to the network by requiring each device to authenticate itself before gaining access. HTTPS encryption provides secure communication over the network by encrypting the data being transmitted, protecting it from interception and tampering. These two features are critical for securing network traffic and preventing unauthorized access. Axis Network Video documentation highlights the importance of these features in maintaining a secure video surveillance network.

NEW QUESTION # 67

When using an external IR illuminator, what can happen if the beam angle is significantly narrower than the field of view?

- A. The exposure may be uneven
- B. Heat can distort the image

- C. The backlight can increase
- D. Focus must be set manually

Answer: A

Explanation:

When using an external IR illuminator with a beam angle significantly narrower than the field of view, the exposure may be uneven. This can result in parts of the image being overexposed (too bright) while other parts remain underexposed (too dark). Ensuring that the beam angle of the IR illuminator matches the field of view of the camera is essential for achieving uniform illumination across the entire surveillance area.

NEW QUESTION # 68

The Axis pixel counter allows a user to

- A. Determine the file size for each video frame.
- B. Specify different exposure zones in a scene.
- C. Convert pixels to actual distances.
- D. **Verify that the resolution requirements for a scene are met.**

Answer: D

Explanation:

The Axis pixel counter is a tool that allows users to verify that the camera's resolution meets the requirements for a specific scene. This is particularly useful in ensuring that critical areas are captured with sufficient detail for identification and analysis. The pixel counter helps in confirming that the pixel density is adequate for the intended surveillance purposes. Detailed explanations can be found in Axis Communications' camera setup and configuration documentation.
