It is never too late to try new things no matter how old you are. Someone always give up their dream because of their ages, someone give up trying to overcome NS0-528 exam because it was difficult for them. Now, no matter what the reason you didn't pass the exam, our study materials will try our best to help you. If you are not sure what kinds of NS0-528 Exam Question is appropriate for you, you can try our free demo of the PDF version. For instance, our NS0-528 practice torrent is the most suitable learning product for you to complete your targets.

## Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.</li></ul>

The NS0-528 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. Our Implementation Engineer - Data Protection Exam study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit NS0-528 Exam Questions. It points to the exam heart to solve your difficulty.

### Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q13-Q18):

#### NEW QUESTION # 13

A customer wants to create a new SnapMirror relationship to provide only disaster recovery for their organization. Which relationship type and policy type should they specify in this scenario?

- A. DP and MirrorAndVault
- **B. XDP and MirrorAllSnapshots**
- C. DP and XDPEndpoint
- D. XDP and XDPEndpoint

**Answer: B**

#### NEW QUESTION # 14

Using ONTAP System Manager, you are asked to replicate all the volumes contained in a Storage VM to a remote ONTAP 9.7 system for quick disaster recovery.

Which two steps need to be completed to accomplish this task? (Choose two.)

- A. Create an SVM-DR relationship.
- **B. Create an SVM peering relationship.**
- **C. Create a cluster peering relationship.**
- D. Create a SnapMirror relationship for each volume.

**Answer: B,C**

#### NEW QUESTION # 15

Which two NetApp supported products can be used to protect Kubernetes workloads? (Choose two.)

- A. Active IQ Unified Manager
- **B. BlueXP backup and recovery**
- **C. Astra Control**
- D. SnapCenter

**Answer: B,C**

Explanation:

BlueXP backup and recovery provides Kubernetes-aware backup and recovery capabilities.

Astra Control is a NetApp product specifically designed to manage and protect Kubernetes workloads by providing application-aware backup, snapshot, and replication features.

#### NEW QUESTION # 16

An administrator wants to automatically prevent volumes that are used in a SnapMirror relationship from running out of space.

Which of the following volume snapshot autodelete modify parameters would ensure that this goal can be accomplished?

- A. -commitment disrupt
- B. -defer-delete scheduled
- C. -commitment try
- D. -defer-delete user\_created

**Answer: C**

Explanation:

Setting -commitment try on the volume snapshot autodelete modify command allows ONTAP to automatically delete eligible Snapshot copies when a volume is running low on space, but only if it can do so without violating SnapMirror or retention policies. This ensures volumes in SnapMirror relationships stay healthy and do not run out of space unexpectedly.

#### NEW QUESTION # 17

You have deployed a 4-node fabric MetroCluster configuration for cross-site disaster-recovery protection. In this scenario, which two statements are correct for an automatic unplanned switchover (AUSO) operation? (Choose two.)

- A. AUSO is triggered in the event of a site-wide controller failure to provide nondisruptive operations.
- B. AUSO is enabled by default on a MetroCluster cluster.
- C. AUSO is triggered in the event of a site-wide switch failure to provide nondisruptive operations.
- D. AUSO is triggered in the event of a complete site-wide failure to provide nondisruptive operations.

**Answer: A,B**

#### NEW QUESTION # 18
