ISO-45001-Lead-Auditor Reliable Test Book, ISO-45001-Lead-Auditor Exam Voucher

Success in the test of the PECB Certified ISO 45001 Lead Auditor Exam (ISO-45001-Lead-Auditor) certification proves your technical knowledge and skills. The ISO-45001-Lead-Auditor exam credential paves the way toward landing high-paying jobs or promotions in your organization. Many people who attempt the PECB Certified ISO 45001 Lead Auditor Exam (ISO-45001-Lead-Auditor) exam questions don't find updated practice questions. Due to this they don't prepare as per the current ISO-45001-Lead-Auditor examination content and fail the final test.

PECB Certified ISO 45001 Lead Auditor Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

An auditor of a manufacturer of plastic packaging products for the food industry found a nonconformity in an internal audit report raised against section 10.2 of ISO 45001 in Report IA202. The nonconformity (NC3) stated: "The level of reported health and safety incidents has increased by 9.7% over the last 12 months. This included an increase in reported accidents." Against this background, the third-party audit team found more than twenty minor nonconformities during the audit, which they agreed should be combined into one major nonconformity against clause 4.4 of ISO 45001. "The organisation has failed to demonstrate that it is maintaining and continually improving a health and safety management system" Select two options which would represent acceptable corrective actions for the nonconformity.

- A. Union representatives of the workers were invited to attend the OH&S management meetings.
- B. Staff from departments with nonconformities were given regular OH&S safety training sessions during their daily toolbox talks.
- C. **Top management initiated a comprehensive review of the internal and external issues to decide on actions that could lead to improving the performance of the OHSMS.**
- D. OH&S champions were appointed in each department to report near misses and incidents in the OHSMS.
- E. External consultants were appointed to conduct a gap analysis of the OHSMS and report on the gaps found.
- F. **Top Management developed and is leading a programme to promote an effective culture of support for the OHSMS.**

Answer: C,F

Explanation:

Clause 4.4 of ISO 45001 requires organizations to establish, implement, maintain, and continually improve an OH&S management system. The corrective actions must address systemic issues, involve leadership commitment, and aim to foster a strong safety culture.

Analysis of Options:

A . Top management initiated a comprehensive review of internal and external issues:

Correct. A review of internal and external issues aligns with Clause 4.1 and demonstrates leadership commitment.

B . Union representatives were invited to attend OH&S management meetings:

Incorrect. While participation is valuable, it is not a systemic corrective action.

C . Top management developed and is leading a programme to promote an effective culture of support:

Correct. Promoting a safety culture is a proactive measure and aligns with Clause 5.1 (Leadership).

D . Staff from departments with nonconformities received regular safety training during toolbox talks:

Incorrect. While training addresses specific gaps, it does not address systemic issues.

E . External consultants conducted a gap analysis of the OHSMS:

Incorrect. While helpful, this action does not demonstrate leadership or address systemic improvement.

F . OH&S champions were appointed in each department to report near misses and incidents:

Incorrect. This is a good practice but does not directly address Clause 4.4's requirement for systemic improvement.

ISO Reference:

Clause 4.4: Maintaining and improving the OH&S management system.

Clause 5.1: Leadership and commitment.

Clause 10.3: Continual improvement.

NEW QUESTION # 12

ISO 45001 requires the organisation to maintain and retain documented OH&SMS information.

Check each statement and determine which two are true:

- A. Documented information to be retained includes material safety data sheets.
- B. A documented plan for achieving occupational health and safety objectives should be maintained.
- C. The results of emergency drills should be kept.
- D. The occupational health and safety policy is an example of a document to be kept.
- E. Industry-specific standards provided by the client should be maintained.
- F. The terms "maintain" and "retain" can be used interchangeably."

Answer: B,D

NEW QUESTION # 13

What is the definition of the term 'audit' as per clause 3.32 of ISO 45001:2018?

- A. A systematic process to assess the risks in a workplace
- B. A document that outlines safety procedures and guidelines
- C. An evaluation of the effectiveness of health and safety measures
- D. A legal requirement to comply with health and safety standards

Answer: C

Explanation:

According to Clause 3.32 of ISO 45001:2018, an audit is defined as a systematic, independent, and documented process for obtaining objective evidence and evaluating it to determine the extent to which audit criteria are fulfilled.

This involves assessing the effectiveness of health and safety measures implemented in the organization's OH&S management system.

Analysis of Options:

A . A systematic process to assess the risks in a workplace:

Incorrect. While audits may include risk assessments, the purpose is broader and involves evaluating the entire OH&S management system

B . An evaluation of the effectiveness of health and safety measures:

Correct. This aligns with the definition of an audit as per ISO 45001:2018.

C . A legal requirement to comply with health and safety standards:

Incorrect. An audit is not necessarily a legal requirement but a process to assess conformity.

D . A document that outlines safety procedures and guidelines:

Incorrect. An audit is a process, not a document.

ISO Reference:

Clause 3.32: Audit definition.

NEW QUESTION # 14

Select two options that are corrections.

- A. Using OHSMS induction training to address an identified lack OHSMS awareness among workers.
- B. Changing the name of a tutor that did not deliver a course to the name of the tutor that did.

- C. Adding a missing signature to a corrective action record.
- D. Reviewing workers training records.
- E. Changing a process to reduce its inherent risk.
- F. Updating the emergency preparedness plan as a result of carrying out a practical test.

Answer: B,C

Explanation:

Comprehensive Detailed Explanation along with All ISO 45001 Audit Reference Corrections address immediate issues, such as errors or omissions, without addressing root causes. Clause 10.2 of ISO 45001:2018 allows for corrections alongside corrective actions.

Analysis of Options:

A . Adding a missing signature to a corrective action record:

Correct. This is a correction addressing an administrative oversight.

B . Changing a process to reduce its inherent risk:

Incorrect. This is a corrective action aimed at addressing root causes, not a correction.

C . Changing the name of a tutor that did not deliver a course to the name of the tutor that did:

Correct. This corrects an error in records without addressing systemic issues.

D . Reviewing workers' training records:

Incorrect. This is part of ongoing monitoring or auditing, not a correction.

E . Updating the emergency preparedness plan as a result of carrying out a practical test:

Incorrect. This is a corrective action resulting from performance evaluation, not a correction.

F . Using OHSMS induction training to address an identified lack of OHSMS awareness among workers:

Incorrect. This is a preventive or corrective action, not a correction.

ISO Reference:

Clause 10.2: Nonconformity and corrective action.

Clause 7.5: Control of documented information

NEW QUESTION # 15

You identify that the OSHMS manager conducts a safety inspection of the building each day before the museum opens to the public. You review your latest report and note that there seems to be some confusion between what constitutes a hazard and what constitutes a risk.

Which three of the following observations has the OHSMS manager correctly rated?

- A. The fire extinguishers in the Natural World area have not been serviced in the last five years [Risk]
- B. There Is a high possibility of unfit food being sold due to the failure of the oven temperature indicator In the visitors' restaurant (Hazard)
- C. The non-slip mats have been removed from the restaurant (Risk)
- D. Conference room emergency sign directs people to an exit that is no longer available for use (Hazard)
- E. The head of the dinosaur suspended over the main hall has become detached from the rest of the skeleton (Risk)
- F. There is a water leak next to the electric heater in the admissions area (Danger)
- G. The carpet on the main staircase is peeling off (Risk)
- H. The emergency light In the gift shop did not work when checked (Risk)

Answer: A,G,H

Explanation:

Comprehensive Detailed Explanation along with All ISO 45001 Audit References

* Hazard: A potential source of harm or adverse health effects.

* Risk: The likelihood of harm occurring as a result of the hazard.

* Danger: An immediate threat that requires urgent action.

Analysis of Options:

* A. Conference room emergency sign directs people to an exit that is no longer available for use (Hazard):Correctly identified as a hazard since it poses a potential risk during emergencies.

* B. The carpet on the main staircase is peeling off (Risk):This is a hazard, not a risk, as it represents a source of potential harm.

* C. The emergency light in the gift shop did not work when checked (Risk):This is a hazard because it is a condition that could lead to a risk during emergencies.

* D. The fire extinguishers in the Natural World area have not been serviced in the last five years (Risk):Correctly identified as a risk because the likelihood of fire-related harm increases without proper servicing.

* E. The head of the dinosaur suspended over the main hall has become detached from the rest of the skeleton (Risk):This is a

hazard, not a risk, as it represents a potential source of harm.

* F. The non-slip mats have been removed from the restaurant (Risk): This is a hazard, not a risk.

* G. There is a high possibility of unfit food being sold due to the failure of the oven temperature indicator in the visitors' restaurant (Hazard):This is a risk because it specifies the likelihood of harm occurring (selling unfit food).

* H. There is a water leak next to the electric heater in the admissions area (Danger):Correctly identified as a danger because it represents an immediate and critical threat.

ISO References:

* Clause 6.1.2: Hazard identification and assessment of risks and opportunities.
