

New Oracle 1Z0-1072-25 Exam Book & Test Certification 1Z0-1072-25 Cost

What's more, part of that Real4exams 1Z0-1072-25 dumps now are free: <https://drive.google.com/open?id=1L-PK2fRDRj2etN3ohGemj6LqsIqD3hR>

Web-based software works without installation. Oracle Cloud Infrastructure 2025 Architect Associate exam practice test software works on all well-known browsers, including Chrome, Firefox, Safari, and Opera. Trust Real4exams - Oracle 1Z0-1072-25 exam preparation products and be prepared for the Oracle Cloud Infrastructure 2025 Architect Associate at your home. Preparing and testing yourself, again and again, can be nerve-wracking, so in this scenario, we provide a Oracle 1Z0-1072-25 PDF for exam preparation.

The PDF version of our 1Z0-1072-25 guide exam is prepared for you to print it and read it everywhere. It is convenient for you to see the answers to the questions and remember them. After you buy the PDF version of our study material, you will get an E-mail form us in 5 to 10 minutes after payment. Then you can click the link in the E-mail and download your 1Z0-1072-25 study engine. You can download it as many times as you need.

Test Certification Oracle 1Z0-1072-25 Cost - Certification 1Z0-1072-25 Questions

We provide Oracle 1Z0-1072-25 web-based self-assessment practice software that will help you to prepare for the Oracle certification exam. Oracle 1Z0-1072-25 Web-based software offers computer-based assessment solutions to help you automate the entire Oracle Cloud Infrastructure 2025 Architect Associate testing procedure. The stylish and user-friendly interface works with all browsers, including Mozilla Firefox, Google Chrome, Opera, Safari, and Internet Explorer. It will make your certification exam preparation simple, quick, and smart. So, rest certain that you will discover all you need to study for and pass the Oracle 1Z0-1072-25 Exam on the first try.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which OCI feature should be used to ensure that communication between database servers and OCI Object Storage is secure?

- A. Use a NAT Gateway
- **B. Use a Service Gateway**
- C. Use a VPN Gateway
- D. Use a Local Peering Gateway

Answer: B

Explanation:

To ensure secure communication between database servers and OCI Object Storage, you should use a Service Gateway. A Service Gateway enables instances in your VCN to privately access OCI services like Object Storage without traversing the public internet. Security: The traffic between your database servers and Object Storage remains within the Oracle network, providing a secure and high-performance connection.

NEW QUESTION # 14

Which statement is true about File System Replication in Oracle Cloud Infrastructure (OCI)?

- **A. You can replicate the data in one file system to another file system in the same region or a different region.**
- B. You cannot specify a replication interval when you create the replication resource.
- C. Only a file system that has been exported can be used as a target file system.
- D. You can replicate the data in one file system to another file system only in the same region.

Answer: A

Explanation:

File System Replication in Oracle Cloud Infrastructure (OCI) allows you to replicate data from one file system to another either within the same region or across different regions. This capability is particularly useful for disaster recovery, data protection, and global data distribution scenarios.

Cross-Region Replication: The replication feature enables you to create a copy of your file system in a different region, ensuring that your data is available even in the event of a regional failure.

Same-Region Replication: You also have the option to replicate data within the same region, which can be useful for scenarios such as high availability and local backups.

NEW QUESTION # 15

Which TWO statements are true about performing a multipart upload using the Multipart Upload API?

- **A. Each part can be as large as 50 GiB.**
- B. You do not need to split the object into parts.
- **C. You can keep adding parts as long as the total number is less than 10,000.**
- D. You do not have to commit the upload after uploading all parts.

Answer: A,C

Explanation:

When performing a multipart upload using the Multipart Upload API in Oracle Cloud Infrastructure (OCI) Object Storage, the following points are true:

C . Each part can be as large as 50 GiB: OCI allows each part of a multipart upload to be up to 50 GiB in size. This enables the efficient uploading of large objects in smaller, manageable parts.

D . You can keep adding parts as long as the total number is less than 10,000: The Multipart Upload API supports up to 10,000 parts for a single object. This allows the upload of very large objects by dividing them into multiple parts.

Incorrect Statements:

A . After uploading all parts, you must commit the upload to finalize the multipart upload and combine all parts into a single object.

B . The object must be split into parts before uploading when using the Multipart Upload API.

Oracle Cloud Infrastructure Documentation: Multipart Uploads

NEW QUESTION # 16

Which statement is NOT correct regarding the Oracle Cloud Infrastructure (OCI) File System snapshots?

- A. Even if nothing has changed within the file system since the last snapshot was taken, a new snapshot consumes more storage.
- B. Snapshots are accessible under the root directory of the file system at .snapshot/name.
- C. Snapshots are a consistent, point-in-time view of your file systems.
- D. Before you can clone a file system, at least one snapshot must exist for the file system.

Answer: A

Explanation:

In OCI File Storage, snapshots are point-in-time, read-only copies of a file system that do not immediately consume additional storage beyond the space needed to track changes.

Incorrect Statement: The statement that a new snapshot consumes more storage even if nothing has changed is incorrect. Snapshots are space-efficient; they only consume additional storage as changes are made to the file system after the snapshot is taken. If no changes are made between snapshots, the storage consumption remains minimal.

Correct Statements:

- B . Before cloning a file system, at least one snapshot must exist, as the clone operation relies on this snapshot to create a copy.
- C . Snapshots are accessible under the .snapshot directory, allowing users to view and restore files from specific snapshots.
- D . Snapshots provide a consistent, point-in-time view of the file system, ensuring data integrity.

NEW QUESTION # 17

What happens to the performance level of a volume when it is detached from an instance?

- A. The performance level is adjusted to Lower Cost (0 VPU/GB).
- B. The performance level is adjusted to Balanced.
- C. The performance level remains unchanged.
- D. The performance level is adjusted to Higher Performance.

Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), when a block volume is detached from an instance, its performance level is automatically adjusted to the "Lower Cost" tier, which provides 0 VPUs (Volume Performance Units) per GB. This adjustment helps reduce costs when the block volume is not actively being used by a compute instance.

Key Points:

Volume Performance Levels: OCI offers various performance tiers for block volumes, including "Higher Performance," "Balanced," and "Lower Cost." These tiers determine the level of IOPS (Input/Output Operations Per Second) and throughput available to the volume.

Automatic Adjustment: When a block volume is detached from an instance, OCI automatically optimizes the cost by switching the volume to the "Lower Cost" performance tier. This tier offers minimal performance, suitable for data that is not actively accessed.

Cost Management: This automatic adjustment is beneficial for managing costs, as it prevents users from incurring unnecessary charges for higher performance levels when the volume is not in use.
