## Updated Palo Alto Networks PCNSE Exam Questions And Answer

In addition to the advantages of high quality, our PCNSE exam questions also provide various versions. In order to meet your personal habits, you can freely choose any version of our PCNSE study materials within PDF, APP or PC version. Among them, the PDF version is most suitable for candidates who prefer paper materials, because it supports printing. And our PDF version of the PCNSE training guide can be carried with you for it takes on place.

The PCNSE certification exam covers a wide range of topics, including firewall configuration, network security, threat prevention, VPN configuration, and management. PCNSE exam is designed to test the skills and knowledge of security professionals in managing and configuring Palo Alto Networks security solutions in complex network environments. The PCNSE certification exam is a vendor-neutral certification, which means that it is not tied to any specific vendor or product.

The PCNSE certification is intended for security professionals who work with Palo Alto Networks products and have a solid understanding of network security concepts, protocols, and technologies. Palo Alto Networks Certified Network Security Engineer Exam certification validates the skills required to design, implement, and manage Palo Alto Networks security solutions in a variety of environments, including enterprise, data center, and cloud. The PCNSE Certification is a prerequisite for several advanced Palo Alto Networks certifications, including the Palo Alto Networks Certified Network Security Engineer (PCNSA) and the Palo Alto Networks Certified Security Consultant (PCNSC).

## Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q154-Q159):

### NEW QUESTION # 154

Refer to the exhibit.

□

An administrator cannot see any of the Traffic logs from the Palo Alto Networks NGFW on Panorama

a. The configuration problem seems to be on the firewall side. Where is the best place on the Palo Alto Networks NGFW to check whether the configuration is correct?

- A)
- B)
- C)
- D)

- A. Option C
- B. Option D
- C. Option A
- D. Option B

**Answer: C**

Explanation:

<https://docs.paloaltonetworks.com/panorama/9-0/panorama-admin/manage-log-collection/configure-log-forwarding-to-panorama.html>

First of all you need to connect the Firewall to Panorama. Once that is done you configure your templates and device groups via Panorama and push that to the firewall. That includes policy and log forwarding. If you had misconfiguration on the firewall regarding logs that would be mitigated via Panorama push.

#### NEW QUESTION # 155

A bootstrap USB flash drive has been prepared using a Windows workstation to load the initial configuration of a Palo Alto Networks firewall that was previously being used in a lab. The USB flash drive was formatted using file system FAT32 and the initial configuration is stored in a file named init-cfg.txt. The firewall is currently running PAN-OS 10.0 and using a lab config. The contents of init-cfg.txt in the USB flash drive are as follows:

The USB flash drive has been inserted in the firewalls' USB port, and the firewall has been restarted using command > request resort system. Upon restart, the firewall fails to begin the bootstrapping process. The failure is caused because

- A. PANOS version must be 91.x at a minimum but the firewall is running 10.0.x
- B. The hostname is a required parameter, but it is missing in init-cfg.txt
- C. Firewall must be in factory default state or have all private data deleted for bootstrapping
- D. The bootstrap.xml file is a required file but it is missing
- E. The USB must be formatted using the ext3 file system, FAT32 is not supported

**Answer: C**

Explanation:

#### NEW QUESTION # 156

View the GlobalProtect configuration screen capture.

What is the purpose of this configuration?

- A. It forces an internal client to connect to an internal gateway at IP address 192.168.10.1.
- B. It configures the tunnel address of all internal clients to an IP address range starting at 192.168.10.1.
- C. It forces the firewall to perform a dynamic DNS update, which adds the internal gateway's hostname and IP address to the DNS server.
- D. It enables a client to perform a reverse DNS lookup on 192.168.10.1 to detect that it is an internal client.

**Answer: D**

Explanation:

### NEW QUESTION # 157

What are two common reasons to use a "No Decrypt" action to exclude traffic from SSL decryption? (Choose two.)

- A. the website matches a sensitive category
- B. the website matches a category that is not allowed for most users
- C. the website matches a high-risk category
- D. the web server requires mutual authentication

**Answer: A,B**

Explanation:

Explanation

<https://docs.paloaltonetworks.com/pan-os/10-1/pan-os-admin/decryption/decryption-exclusions/palo-alto-networ> The firewall provides a predefined SSL Decryption Exclusion list to exclude from decryption commonly used sites that break decryption because of technical reasons such as pinned certificates and mutual authentication.

### NEW QUESTION # 158

An administrator has created an SSL Decryption policy rule that decrypts SSL sessions on any port. Which log entry can the administrator use to verify that sessions are being decrypted?

- A. Decryption log
- B. Data Filtering log
- C. In the details of the Threat log entries
- D. In the details of the Traffic log entries

**Answer: D**
