Answer: A,C,E

NEW QUESTION # 27

Universal Containers (UC) has a strict requirement to authenticate users to Salesforce using their mainframe credentials. The mainframe user store cannot be accessed from a SAML provider. UC would also like to have users in Salesforce created on the fly if they provide accurate mainframe credentials.

How can the Architect meet these requirements?

- A. Implement Just-In-Time Provisioning on the mainframe to create the user on the fly.
- B. Implement OAuth User-Agent Flow on the mainframe; use a Registration Handler to create the user on the fly.
- C. Use the SOAP API to create the user when created on the mainframe; implement Delegated Authentication.
- D. Use a Salesforce Login Flow to call out to a web service and create the user on the fly.

Answer: A

NEW QUESTION # 28

The CIO of universal containers(UC) wants to start taking advantage of the refresh token capability for the UC applications that utilize OAuth 2.0. UC has listed an architect to analyze all of the applications that use OAuth flows to. See where refresh Tokens can be applied. Which two OAuth flows should the architect consider in their evaluation? Choose 2 answers

- A. Web server
- B. Username-password
- C. Jwt bearer token
- D. User-Agent

Answer: A,D

NEW QUESTION # 29

Northern Trail Outfitters (NTO) uses Salesforce Experience Cloud sites (previously known as Customer Community) to provide a digital portal where customers can login using their Google account.

NTO would like to automatically create a case record for first time users logging into Salesforce Experience Cloud.

What should an Identity architect do to fulfill the requirement?

- A. Implement a login flow with a record create component for Case.
- B. Implement a Just-in-Time handler class that has logic to create cases upon first login.
- C. Create an authentication provider for Social Login using Google and leverage standard registration handler.
- D. Configure an authentication provider for Social Login using Google and a custom registration handler.

Answer: A
