

2026 Juniper JN0-253–Efficient Test Price

P.S. Free 2026 Juniper JN0-253 dumps are available on Google Drive shared by Itcertmaster: <https://drive.google.com/open?id=1kF3hE01h9E63FB0mciZyZk0and0EDrdr>

Now you have all the necessary information about quick Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam questions preparation. Just take the best decision of your career and enroll in the Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam. Download the Itcertmaster Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam real dumps now and start this career advancement journey.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
Topic 2	<ul style="list-style-type: none">Juniper Mist Configuration Basics: This domain addresses initial setup including user accounts, device onboarding, organizational structures, subscription licensing, certificate management, and automated provisioning with labels and policies.
Topic 3	<ul style="list-style-type: none">Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.
Topic 4	<ul style="list-style-type: none">Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.

First-Grade Juniper JN0-253 Test Price With Interactive Test Engine & Useful Relevant JN0-253 Exam Dumps

For everyone, time is money and life. Are you still hesitant about selecting what kind of JN0-253 exam materials? We have a high reputation on the career to help our customers pass their exams and get their desired certifications. There is no exaggeration to say that you can pass the JN0-253 Exam with ease after studying with our JN0-253 practice guide for 20 to 30 hours. Numerous of the candidates have been benefited from our exam torrent and they obtained the achievements just as they wanted.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q30-Q35):

NEW QUESTION # 30

What are two guest portal authentication options in the UI? (Choose two.)

- A. SAML
- B. Authentication Code
- C. MAC Authentication
- D. Sponsored Guest

Answer: B,D

Explanation:

In Juniper Mist Cloud, guest access is managed through the Guest Portal feature, which allows administrators to configure secure and flexible authentication methods for temporary or visitor access. These options are designed to provide a balance between user convenience and network security.

According to the Juniper Mist Guest Access and Captive Portal Configuration Guide, the supported authentication options include: "Authentication Code (Self-registration) and Sponsored Guest workflows, among others, which provide different levels of administrative control and ease of use."

* Authentication Code (A): Visitors receive a temporary authentication code (PIN) via email or SMS that they use to log in. This method is ideal for self-service access while maintaining accountability.

* Sponsored Guest (C): In this mode, guests must be approved by a designated employee or sponsor before gaining access. This adds an extra layer of security by involving internal personnel validation.

MAC Authentication (B) and SAML (D) are not used for guest portals; they are designed for device-based authentication and enterprise-level identity federation, respectively.

NEW QUESTION # 31

What is responsible for Mist AI data collection and analysis across the wireless, wired, and WAN domains?

- A. Data Science
- B. Predictive Analytics and Correlation Engine (PACE)
- C. Marvis VNA
- D. Juniper Mist Full Stack

Answer: B

Explanation:

The Predictive Analytics and Correlation Engine (PACE) is the core AI and data analytics component of the Juniper Mist Cloud architecture. It collects, processes, and correlates telemetry data across all managed domains - Wireless, Wired, and WAN Assurance- to deliver proactive insights and predictive network intelligence.

According to the Juniper Mist AI Operations and Architecture Guide:

"The Predictive Analytics and Correlation Engine (PACE) serves as the foundation of Mist AI, using continuous telemetry ingestion and machine learning algorithms to understand, correlate, and predict network behaviors across the wireless, wired, and WAN environments." PACE enables Mist AI to:

* Detect anomalies in user experience and device performance.

* Predict failures before they affect users.

* Correlate events across network domains for root-cause analysis.

Therefore, the correct answer is A. Predictive Analytics and Correlation Engine (PACE).

NEW QUESTION # 32

You want to troubleshoot a wireless client that is no longer connected to a Mist AP.

Which area within the Mist GUI would you use?

- A. Monitor -> Service Levels -> Insights
- B. Organization -> Audit Logs
- C. Clients -> WiFi Clients
- D. Clients -> App Clients

Answer: C

Explanation:

To troubleshoot a wireless client that is no longer connected to a Mist AP, you would navigate to the "Clients" section within the Mist GUI and select "WIFI Clients." This area provides detailed information about all wireless clients that have connected to the Mist APs, including their connection history, performance metrics, and any issues encountered. By examining the data available in the WIFI Clients section, network administrators can identify the root cause of connectivity problems and take appropriate actions to resolve them.

NEW QUESTION # 33

Which statement is correct about the Super User account role?

- **A. You must use the Super User role to add administrators to an organization.**
- B. The Super User role is restricted to the specific sites that are defined when creating the user account.
- C. The Super User role has limited read/write capabilities.
- D. You must use the Super User role to claim an organization's new AP.

Answer: A

Explanation:

In the Juniper Mist Cloud platform, user roles define the scope of permissions that determine what administrative functions an individual can perform within an organization. The Super User role represents the highest level of administrative authority within a Juniper Mist organization and carries full control over both organization-wide and site-specific configurations.

According to the Juniper Mist Cloud Administration and User Management documentation, the Super User role is described as: "The Super User role provides full read and write access across the entire organization. Only Super Users can manage organization-level settings, add or remove other administrators, and assign privileges to users." This means that only a Super User can add new administrators, manage subscription entitlements, configure organization-level policies, and perform full lifecycle device management. Unlike site administrators, Super Users are not restricted to specific locations—they have unrestricted visibility and control across all sites within the organization.

Therefore, the correct answer is D, since the Super User role is explicitly required to add administrators to an organization and perform top-level management operations.

NEW QUESTION # 34

When a Juniper Mist managed switch is powered on, which event must be completed prior to the Zero-Touch Provisioning (ZTP) process moving forward?

- **A. A DHCP lease must be obtained by the switch.**
- B. All user accounts must be configured on the switch.
- C. The switch's clock must be synchronized with an NTP server.
- D. NETCONF must be configured on the switch.

Answer: A

Explanation:

A DHCP lease must be obtained by the switch before the ZTP process proceeds. Juniper documentation clarifies: "Ensure that a DHCP server is reachable. In addition to providing an IP address to the switch, your DHCP server must provide the following information: a default gateway, an NTP server, and a DNS server address..." The initial event in the ZTP workflow is the switch receiving a valid IP address via DHCP. Only after obtaining an address can the switch connect to the Mist cloud and proceed with zero-touch provisioning.

Other requirements, such as user account, NETCONF, or NTP sync, occur later or are handled automatically via cloud policy after onboarding.

NEW QUESTION # 35

.....

We have handled professional JN0-253 practice materials for over ten years. Our experts have many years' experience in this particular line of business, together with meticulous and professional attitude towards jobs. Their abilities are unquestionable, besides, JN0-253 practice materials are priced reasonably with three kinds. We also have free demo offering the latest catalogue and brief contents for your information, if you do not have thorough understanding of our materials. Many exam candidates build long-term relation with our company on the basis of our high quality JN0-253 practice materials.
