NEW QUESTION # 207
An administrator is using Panorama and multiple Palo Alto Networks NGFWs. After upgrading all devices to the latest PAN-OS software, the administrator enables log forwarding from the firewalls to Panorama. Pre-existing logs from the firewalls are not appearing in PanoramA.
Which action would enable the firewalls to send their pre-existing logs to Panorama?

- A. Use the import option to pull logs.
- B. Export the log database
- C. Use the ACC to consolidate the logs
- D. Use the scp logdb export command

Answer: D

Explanation:
commands:
request logdb
migrate-to-panorama start end-timestart-timetype
https://docs.paloaltonetworks.com/panorama/9-0/panorama-admin/set-up-panorama/install-content-and-software-updates-for-panorama/migrate-panorama-logs-to-new-log-format

NEW QUESTION # 208
An engineer troubleshoots a Panorama-managed firewall that is unable to reach the DNS servers configured via a global template.
As a troubleshooting step, the engineer needs to configure a local DNS server in place of the template value.
Which two actions can be taken to ensure that only the specific firewall is affected during this process? (Choose two.)

- A. Configure a service route for DNS on a different interface.
- B. Configure the DNS server locally on the firewall.
- C. Change the DNS server on the global template.
- D. Override the DNS server on the template stack.

Answer: B,D

Explanation:
There are two ways to override values pushed from a template or template stack. The first is to define a value locally on the firewall to override a value pushed from a template or template stack.
The second is to define firewall-specific variables to override values pushed from a template or template stack.
