

ADA-C01 Online Bootcamps & Original ADA-C01 Questions

BONUS!!! Download part of ExamcollectionPass ADA-C01 dumps for free: <https://drive.google.com/open?id=198KYBxxsVdNiwdIkve-21v-ELbRcnGbi>

Just like the saying goes, it is good to learn at another man's cost. In the process of learning, it is more important for all people to have a good command of the method from other people. The SnowPro Advanced Administrator exam questions from our company will help you find the good study method from other people. Using the ADA-C01 Test Guide from our company, you can not only pass your exam, but also you will have the chance to learn about the different and suitable study skills. We believe these skills will be very useful for you near life.

ExamcollectionPass is famous for its high-quality in this field especially for ADA-C01 certification exams. It has been accepted by thousands of candidates who practice our ADA-C01 study materials for their exam. In this major environment, people are facing more job pressure. So they want to get a ADA-C01 Certification rise above the common herd. How to choose valid and efficient guide torrent should be the key topic most candidates may concern. And with our ADA-C01 exam questions, you will pass the ADA-C01 exam without question.

Excellent ADA-C01 Online Bootcamps | 100% Free Original ADA-C01 Questions

Firstly, we have free trials of the ADA-C01 exam study materials to help you know our products. Once you find it unsuitable for you, you can choose other types of the study materials. You will never be forced to purchase our ADA-C01 test answers. Just make your own decisions. We can satisfy all your demands and deal with all your problems. Our online test engine and windows software of the ADA-C01 Test Answers will let your experience the flexible learning style. Apart from basic knowledge, we have made use of the newest technology to enrich your study of the ADA-C01 exam study materials. Online learning platform is different from traditional learning methods. One of the great advantages is that you will

Snowflake ADA-C01 Exam Syllabus Topics:

Topic	Details
Topic 1	- Given a scenario, create and manage access control - Given a scenario, implement resource monitors
Topic 2	- Given a scenario, configure access controls - Set up and manage security administration and authorization
Topic 3	- Manage and implement data sharing - Given a set of business requirements, establish access control architecture

Topic 4	• Interpret and make recommendations for data clustering • Manage DML locking and concurrency in Snowflake
---------	---

Snowflake SnowPro Advanced Administrator Sample Questions (Q19-Q24):

NEW QUESTION # 19

A Snowflake Administrator wants to create a virtual warehouse that supports several dashboards, issuing various queries on the same database.

For this warehouse, why should the Administrator consider setting AUTO_SUSPEND to 0 or NULL?

- A. To save costs by running the warehouse as little as possible
- B. To keep the query result cache warm for good performance on repeated queries
- C. To save costs on warehouse shutdowns and startups for different queries
- **D. To keep the data cache warm to support good performance of similar queries**

Answer: D

Explanation:

According to the Snowflake documentation¹, the AUTO_SUSPEND property specifies the number of seconds of inactivity after which a warehouse is automatically suspended. If the property is set to 0 or NULL, the warehouse never suspends automatically. For a warehouse that supports several dashboards, issuing various queries on the same database, setting AUTO_SUSPEND to 0 or NULL can help to keep the data cache warm, which means that the data used by the queries is already loaded into the warehouse memory and does not need to be fetched from the storage layer. This can improve the performance of similar queries that access the same data. Option A is incorrect because setting AUTO_SUSPEND to 0 or NULL does not save costs on warehouse shutdowns and startups, but rather increases the costs by keeping the warehouse running continuously. Option B is incorrect because setting AUTO_SUSPEND to 0 or NULL does not run the warehouse as little as possible, but rather runs the warehouse as much as possible. Option D is incorrect because setting AUTO_SUSPEND to 0 or NULL does not affect the query result cache, which is a separate cache that stores the results of previous queries for a period of time. The query result cache is not dependent on the warehouse state, but on the query criteria².

NEW QUESTION # 20

A user has enrolled in Multi-factor Authentication (MFA) for connecting to Snowflake. The user informs the Snowflake Administrator that they lost their mobile phone the previous evening.

Which step should the Administrator take to allow the user to log in to the system, without revoking their MFA enrollment?

- A. Instruct the user to connect to Snowflake using SnowSQL, which does not support MFA authentication.
- **B. Alter the user and set MINS_TO_BYPASS_MFA to a value that will disable MFA long enough for the user to log in.**
- C. Instruct the user to append the normal URL with `?mode=mfa_bypass&code=` to log on.
- D. Alter the user and set DISABLE_MFA to true, which will suspend the MFA requirement for 24 hours.

Answer: B

Explanation:

The MINS_TO_BYPASS_MFA property allows the account administrator to temporarily disable MFA for a user who has lost their phone or changed their phone number¹. The user can log in without MFA for the specified number of minutes, and then re-enroll in MFA using their new phone¹. This does not revoke their MFA enrollment, unlike the DISABLE_MFA property, which cancels their enrollment and requires them to re-enroll from scratch¹. The other options are not valid ways to bypass MFA, as SnowSQL does support MFA authentication², and there is no such URL parameter as `?mode=mfa_bypass&code=` for Snowflake³.

NEW QUESTION # 21

What roles or security privileges will allow a consumer account to request and get data from the Data Exchange? (Select TWO).

- **A. ACCOUNTADMIN**
- B. SYSADMIN
- C. SECURITYADMIN
- D. IMPORT PRIVILEGES and SHARED DATABASE

- **E. IMPORT SHARE and CREATE DATABASE**

Answer: A,E

Explanation:

Explanation

According to the Accessing a Data Exchange documentation, a consumer account can request and get data from the Data Exchange using either the ACCOUNTADMIN role or a role with the IMPORT SHARE and CREATE DATABASE privileges. The ACCOUNTADMIN role is the top-level role that has all privileges on all objects in the account, including the ability to request and get data from the Data Exchange. A role with the IMPORT SHARE and CREATE DATABASE privileges can also request and get data from the Data Exchange, as these are the minimum privileges required to create a database from a share. The other options are incorrect because:

*A. The SYSADMIN role does not have the privilege to request and get data from the Data Exchange, unless it is also granted the IMPORT SHARE and CREATE DATABASE privileges. The SYSADMIN role is a pre-defined role that has all privileges on all objects in the account, except for the privileges reserved for the ACCOUNTADMIN role, such as managing users, roles, and shares.

*B. The SECURITYADMIN role does not have the privilege to request and get data from the Data Exchange, unless it is also granted the IMPORT SHARE and CREATE DATABASE privileges. The SECURITYADMIN role is a pre-defined role that has the privilege to manage security objects in the account, such as network policies, encryption keys, and security integrations, but not data objects, such as databases, schemas, and tables.

*E. The IMPORT PRIVILEGES and SHARED DATABASE are not valid privileges in Snowflake. The correct privilege names are IMPORT SHARE and CREATE DATABASE, as explained above.

NEW QUESTION # 22

A team of developers created a new schema for a new project. The developers are assigned the role DEV_TEAM which was set up using the following statements:

```
USE ROLE SECURITYADMIN;
```

```
CREATE ROLE DEV_TEAM;
```

```
GRANT USAGE, CREATE SCHEMA ON DATABASE DEV_DB01 TO ROLE DEV_TEAM;
```

```
GRANT USAGE ON WAREHOUSE DEV_WH TO ROLE DEV_TEAM;
```

Each team member's access is set up using the following statements:

```
USE ROLE SECURITYADMIN;
```

```
CREATE ROLE JDOE_PROFILE;
```

```
CREATE USER JDOE LOGIN NAME = 'JDOE' DEFAULT_ROLE='JDOE_PROFILE';
```

```
GRANT ROLE JDOE_PROFILE TO USER JDOE;
```

```
GRANT ROLE DEV_TEAM TO ROLE JDOE_PROFILE;
```

New tables created by any of the developers are not accessible by the team as a whole.

How can an Administrator address this problem?

- A. Set up the new schema as a managed-access schema.
- **B. Set up future grants on the newly-created schemas.**
- C. Assign ownership privilege to DEV_TEAM on the newly-created schema.
- D. Assign usage privilege on the virtual warehouse DEV_WH to the role JDOE_PROFILE.

Answer: B

Explanation:

According to the Snowflake documentation¹, future grants are a way to automatically grant privileges on future objects of a specific type that are created in a database or schema. By setting up future grants on the newly-created schemas, the administrator can ensure that any tables created by the developers in those schemas will be accessible by the DEV_TEAM role, without having to grant privileges on each table individually. Option A is incorrect because assigning ownership privilege to DEV_TEAM on the newly-created schema does not grant privileges on the tables in the schema, only on the schema itself. Option B is incorrect because assigning usage privilege on the virtual warehouse DEV_WH to the role JDOE_PROFILE does not affect the access to the tables in the schemas, only the ability to use the warehouse. Option D is incorrect because setting up the new schema as a managed-access schema does not grant privileges on the tables in the schema, but rather requires explicit grants for each table.

NEW QUESTION # 23

An Administrator needs to implement an access control mechanism across an organization. The organization users access sensitive customer data that comes from different regions and needs to be accessible for Analysts who work in these regions. Some Analysts

need very specific access control depending on their functional roles in the organization. Following Snowflake recommended practice, how should these requirements be met? (Select TWO).

- **A. Implement views on top of base tables that exclude or mask sensitive data.**
- B. Use zero-copy cloning to replicate the database schema and provide access as needed.
- C. Include masking rules as part of data ingestion and transformation pipelines.
- D. Use a third-party tool to share the data.
- **E. Implement row access policies and Dynamic Data Masking policies.**

Answer: A,E

NEW QUESTION # 24

.....

With applying the international recognition third party for the payment, if you buying ADA-C01 exam braindumps from us, and we can ensure the safety of your money and account. There is no necessary for you to worry about the security of your money if you choose us. In addition, ADA-C01 test materials are high-quality, since we have a professional team to edit and verify them, therefore they can help you pass the exam just one time. And you can try free demo before purchasing ADA-C01 Exam Dumps, so that you can have a deeper understanding of what you are going to buy.
