If you have any issue, please contact our customer support.

Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q169-Q174):

NEW QUESTION # 169

A nonprofit wants its supporters to send advocacy messages to elected officials and then record which supporters sent the

messages.

Which two solutions should the consultant recommend to meet the requirement?

Choose 2 answers

- A. Use an online advocacy platform from the AppExchange that syncs to Salesforce.
- **B. Configure Marketing Cloud to send advocacy messages from the supporters.**
- C. Organize advocacy messages into Campaigns and add the Contacts who take action as Campaign Members.
- **D. Set a new NPSP Engagement Level on a Contact every time a Contact sends an advocacy message.**

Answer: B,D

NEW QUESTION # 170

A nonprofit wants to convert from Legacy Recurring Donations to Enhanced Recurring Donations. What are two considerations the nonprofit should take into account before making the switch? (Choose 2)

- A. Data Loader is required to revert to Legacy Recurring Donations.
- B. Enhanced Recurring Donations introduces a new custom object.
- **C. Reverting to Legacy Recurring Donations is unsupported.**
- **D. All existing integrations should be reviewed for compatibility.**

Answer: C,D

Explanation:

The move from Legacy Recurring Donations to Enhanced Recurring Donations (ERD) is a significant architectural upgrade in NPSP. While ERD offers better performance and more flexible scheduling, it changes how data is processed and stored.

Key Considerations:

* Integration Compatibility (A): Enhanced Recurring Donations changes the underlying logic of how installments (Opportunities) are created and managed. If the nonprofit uses third-party apps (like an external payment gateway or a custom web form) that rely on the legacy npe03__Recurring_Donation__c fields or the old "Monthly" vs. "Custom" picklist values, those integrations may break. A consultant must perform a thorough audit of all APIs and managed packages before the conversion.

* No Revert Path (D): This is a "one-way door." Salesforce documentation explicitly states that reverting to Legacy Recurring Donations is unsupported once the upgrade process has been completed. The conversion process modifies the database schema and migrates records in a way that cannot be easily undone. Therefore, testing in a full sandbox is a non-negotiable prerequisite.

Clarifying Other Points:

* New Custom Object (Option B): This is incorrect. Enhanced Recurring Donations actually uses the same custom object as the legacy version (npe03__Recurring_Donation__c), but it utilizes new fields, new page layouts, and a completely different set of Apex triggers and batch jobs.

* Data Loader (Option C): Since the process is unsupported, Data Loader is not a viable or recommended way to "revert" the complex architectural changes.

NEW QUESTION # 171

A nonprofit wants to send an event cancellation notice to 150 Salesforce contacts without a separate email service provider. It wants to manage bounces, resend the notice as needed, and view the send history on the Contact record. Which option should a consultant recommend to meet the requirements?

- **A. Send List Email**
- B. Account Engagement
- C. Email-to-Case
- D. Elevate

Answer: A

NEW QUESTION # 172

A nonprofit is rolling out a new implementation of Salesforce and NPSP containing custom code. The project go-live date is a few days before a Salesforce release. The project team has proposed developing in a sandbox on a preview instance to review new features and then deploy to production prior to the release date.

Which important consideration should the consultant discuss with the project team?

- A. The API version in the preview sandbox differs from Production.
- B. A support case is required to request a preview sandbox.
- C. A preview sandbox has limited metadata storage.
- D. A preview sandbox is only available in the Unlimited Edition.

Answer: A

NEW QUESTION # 173

How should a consultant install NPSP in an existing Salesforce org?

- A. Install using the NPSP Conversion Utility tool.
- B. Install each NPSP component from the Trailblazer Community.
- C. Install each NPSP component from the AppExchange.
- D. Install from the NPSP Installer page.

Answer: D

Explanation:

<https://powerofus.force.com/s/article/NPSP-Install>

The recommended method to install NPSP in an existing Salesforce org is to use the NPSP Installer page.

This installer simplifies the process by guiding users through the necessary steps and ensuring that all components are correctly installed.

Steps:

- * Navigate to the NPSP Installer page on Salesforce.org.
- * Click the "Install NPSP" button to start the installation process.
- * Follow the prompts to authenticate and select the Salesforce org where NPSP will be installed.
- * The installer will automatically download and configure all required NPSP components.
- * Verify the installation by checking the NPSP settings and ensuring all components are functional.
