Palo Alto Networks PSE-Cortex Certification Exam is designed for IT professionals who have a deep understanding of the Cortex XDR platform and its capabilities. PSE-Cortex exam tests the knowledge of candidates in areas such as threat hunting, incident response, automation, and machine learning. By earning this certification, candidates can demonstrate their ability to deploy, configure, and troubleshoot the Cortex XDR platform to protect their organization against the most advanced cyber threats.

Palo Alto Networks System Engineer - Cortex Professional Sample Questions (Q122-Q127):

NEW QUESTION # 122

What is a key difference between audit users and full users in Cortex XSOAR?

- A. Full users can only view dashboards, while audit users can investigate incidents.
- B. Audit users can run scripts and playbooks, while full users can only view reports.
- **C. Audit users have read-only permission, while full users have read-write permission.**
- D. Audit users can only view incidents, while full users can edit system components.

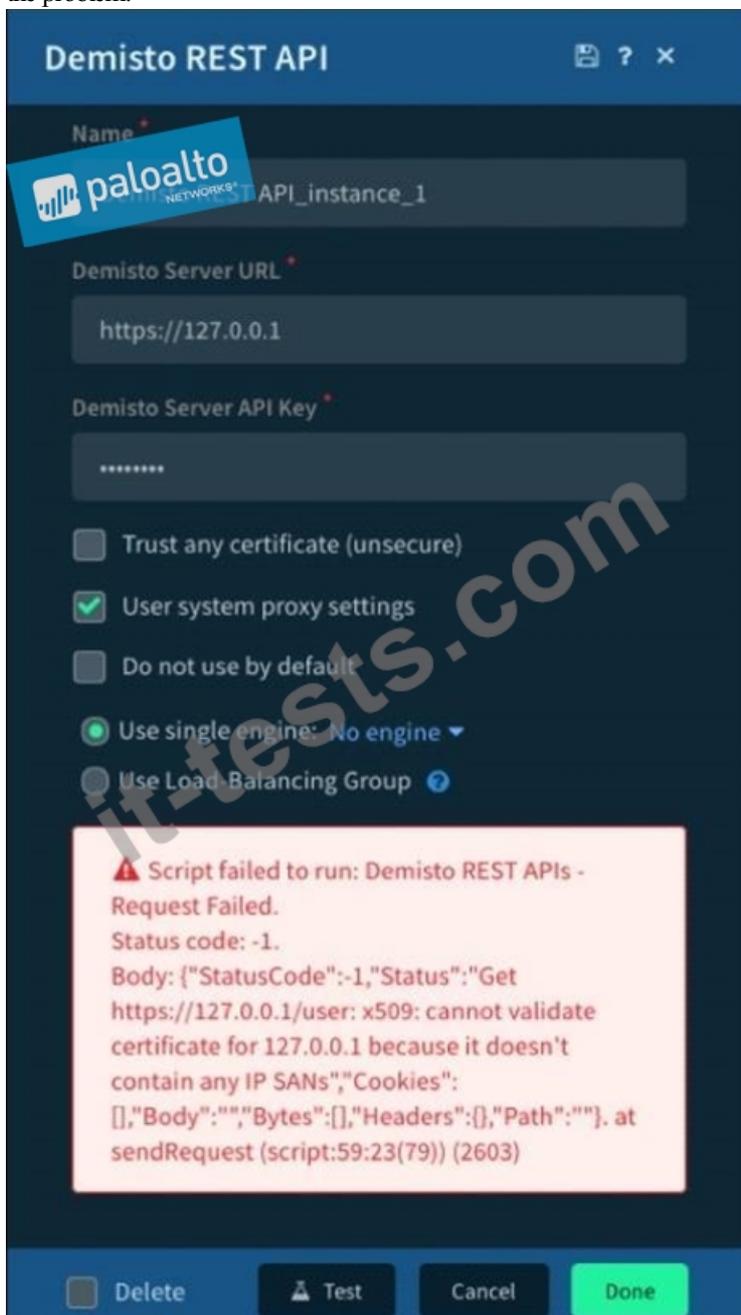

Answer: C

Explanation:

Audit users in Cortex XSOAR have limited, read-only access to the system, which allows them to view information without making any changes. Full users, on the other hand, have read-write access, meaning they can both view and modify incidents, configurations, and other system components.

NEW QUESTION # 123

Given the exception thrown in the accompanying image by the Demisto REST API integration, which action would most likely solve the problem?
