NEW QUESTION # 185

What happens to the default host firmware policy after a Cisco UCS Manager upgrade?

- A. It is set to match the host firmware policy.
- B. It is replaced by a new default policy without any firmware entries.
- C. It is updated to contain the firmware entries of all the components.
- D. It is assigned to all the service profiles that include a host firmware policy.

Answer: B

Explanation:

After you upgrade Cisco UCS Manager, a new host firmware policy named "default" is created, and is assigned to all service profiles that did not already include a host firmware policy. The default host firmware policy is blank. It does not contain any firmware entries for any components.

This default policy is also configured for an immediate reboot rather than waiting for user acknowledgment before rebooting the servers.
