

Oracle - 1Z0-1163-1 - Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Newest Valid Exam Answers

BTW, DOWNLOAD part of VCEPrep 1Z0-1163-1 dumps from Cloud Storage: <https://drive.google.com/open?id=1ERk4BjJl03pobPhZstlMhRu9O5YkCBll>

There is no doubt that advanced technologies are playing an important role in boosting the growth of Oracle companies. This is the reason why the employees have now started upgrading their skillset with the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) certification exam because they want to work with those latest applications and save their jobs. They attempt the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam to validate their skills and try to get their dream job.

Most of the candidates who plan to take the 1Z0-1163-1 certification exam lack updated practice questions to ace it on the first attempt. Due to this, they fail the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) test, losing money and time. And in some cases, applicants fail on the second attempt as well because they don't prepare with 1Z0-1163-1 Actual Exam questions. This results in not only the loss of resources but also the motivation of the candidate.

1Z0-1163-1 Preparation - Actual 1Z0-1163-1 Test Pdf

The Oracle 1Z0-1163-1 certification exam is one of the best certification exams that offer a unique opportunity to advance beginners or experience a professional career. With the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 1Z0-1163-1 exam everyone can validate their skills and knowledge easily and quickly. There are other several benefits that you can gain with the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 1Z0-1163-1 Certification test. The prominent advantages of the 1Z0-1163-1 certification exam are more career opportunities, proven skills, chances of instant promotion, more job roles, and becoming a member of the 1Z0-1163-1 certification community.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q36-Q41):

NEW QUESTION # 36

What is the primary objective of the Order Promising process in Oracle Fusion Cloud SCM?

- A. It only manages orders for direct-to-customer deliveries.
- B. It guarantees same-day shipping for all orders.
- C. It provides accurate order commitment dates based on supply and demand availability.

Answer: C

Explanation:

The Order Promising process in Oracle Fusion Cloud SCM, specifically through the Global Order Promising (GOP) module, aims to provide accurate and reliable order commitment dates by analyzing real-time supply and demand data. This process evaluates factors such as current inventory levels, production schedules, supplier lead times, and transportation constraints to determine feasible delivery dates for customer orders. It ensures businesses can promise delivery dates that align with actual capabilities, enhancing customer satisfaction and operational reliability. Option A is incorrect because Order Promising is not limited to direct-to-customer deliveries-it applies to all order types, including B2B and internal transfers. Option B is also wrong as it overpromises "same-day shipping," which is not guaranteed by Oracle Fusion SCM; instead, the system focuses on realistic commitments based on constraints. For example, if a customer orders a product with limited stock and a two-day production lead time, Order Promising calculates the earliest possible delivery date rather than assuming immediate shipment. This precision reduces overpromising and underdelivering, a common issue in manual systems.

NEW QUESTION # 37

What is the function of Manufacturing Execution in Oracle Fusion Cloud SCM?

- A. It eliminates the need for supplier coordination in production planning.
- **B. It tracks and manages real-time production processes on the shop floor.**
- C. It focuses only on financial reporting for manufacturing expenses.

Answer: B

Explanation:

Manufacturing Execution in Oracle Fusion Cloud SCM is a critical function that tracks and manages real-time production processes on the shop floor, ensuring visibility and control over activities like work order execution, material consumption, and labor tracking. It captures data as production occurs-e.g., when a worker completes an assembly step or uses raw materials-allowing managers to monitor progress, identify bottlenecks, and ensure quality. Option A is incorrect because supplier coordination remains essential for raw material supply; Manufacturing Execution does not eliminate this need but integrates with it. Option C is wrong as financial reporting is handled by Cost Accounting, not Manufacturing Execution, though the latter provides data that feeds into cost calculations. For example, if a factory produces 100 units, Manufacturing Execution records the exact time, resources, and issues (e.g., machine downtime), enabling proactive adjustments. This real-time oversight improves efficiency, reduces waste, and ensures production aligns with planned schedules.

NEW QUESTION # 38

What is the primary purpose of the Production Order to Cost Update OMBP in Oracle Fusion Cloud SCM?

- A. It enhances customer relationship management.
- **B. It provides accurate cost calculations for better decision-making.**
- C. It automates the production process without human supervision.
- D. It ensures immediate financial benefits through real-time cost updates.

Answer: B

Explanation:

The Production Order to Cost Update OMBP (D) in Oracle Fusion Cloud SCM focuses on providing accurate cost calculations by capturing and updating costs associated with production orders-materials, labor, and overhead-enabling better decision-making. For instance, if producing 100 units costs \$1,000 (e.g., \$500 materials, \$300 labor, \$200 overhead), this process ensures the total is reflected accurately, allowing managers to adjust pricing or reduce costs. Option A is misleading-while cost updates occur, the primary purpose is accuracy, not immediate financial gains, which are an outcome. Option B is incorrect-customer relationship management is unrelated to production costing. Option C overstates automation; human oversight is still required, and the focus is on cost, not process automation. Accurate cost data supports profitability analysis, budgeting, and strategic planning, making it a critical link between manufacturing and financial management.

NEW QUESTION # 39

What is the primary function of the Available to Promise (ATP) process in Oracle Fusion Cloud SCM?

- A. It guarantees immediate shipment for all orders.
- B. It manages only supplier payments without impacting inventory levels.
- C. It eliminates the need for demand forecasting.

- **D. It ensures product availability commitments based on inventory and supply constraints.**

Answer: D

Explanation:

The Available to Promise (ATP) process (A) in Oracle Fusion Cloud SCM calculates the quantity of products available to commit to new customer orders by analyzing current inventory levels and supply constraints, such as production capacity, supplier lead times, and existing order commitments. For example, if a warehouse has 200 units of a product with 50 already promised, ATP indicates 150 units are available, ensuring accurate delivery promises. This real-time calculation prevents overpromising and aligns customer expectations with operational reality. Option B is incorrect-ATP does not guarantee immediate shipment but provides feasible timelines based on availability, not an unrealistic universal promise. Option C is false-demand forecasting complements ATP by informing supply planning; it doesn't eliminate it. Option D is irrelevant-supplier payments are managed by financial modules, not ATP, which focuses on inventory and supply. By ensuring reliable commitments, ATP enhances customer satisfaction, reduces order cancellations, and optimizes resource use across the supply chain.

NEW QUESTION # 40

What is the primary advantage of the Replenishment Planning process in Oracle Fusion Cloud SCM?

- **A. It ensures optimal inventory levels by predicting demand and adjusting supply plans.**
- B. It eliminates the need for demand forecasting.
- C. It guarantees inventory levels remain static regardless of demand fluctuations.
- D. It reduces supplier payment cycles.

Answer: A

Explanation:

The primary advantage of Replenishment Planning (A) is ensuring optimal inventory levels by predicting demand and adjusting supply plans accordingly. It uses demand signals-e.g., a forecast of 500 units for next month-to trigger timely replenishments, avoiding overstock (costly) or stockouts (lost sales). Option B is incorrect-static levels defy dynamic demand; Replenishment Planning adapts to fluctuations. Option C is false-demand forecasting is its foundation. Option D is unrelated-payment cycles are a financial process. For instance, if demand spikes unexpectedly, it recalibrates orders, saving costs and maintaining service levels, a key operational benefit.

NEW QUESTION # 41

.....

Oracle 1Z0-1163-1 is a certification exam to test IT professional knowledge. VCEPrep is a website which can help you quickly pass the Oracle certification 1Z0-1163-1 Exams. Before the exam, you use pertinence training and test exercises and answers that we provide, and in a short time you'll have a lot of harvest.

1Z0-1163-1 Preparation: <https://www.vceprep.com/1Z0-1163-1-latest-vce-prep.html>

You can download our 1Z0-1163-1 test engine and install it on your phone or other device, then if you are waiting for the bus or on the subway, you can take 1Z0-1163-1 exam dumps out for study, Online and offline service are available, and if you have any questions for 1Z0-1163-1 exam materials, you can contact us, and we will give you reply as quickly as we can, And our 1Z0-1163-1 exam questions can help you pass the 1Z0-1163-1 exam for sure.

Character string narrow characters) `i,d`, Why Locate at Switch, You can download our 1Z0-1163-1 test engine and install it on your phone or other device, then if you are waiting for the bus or on the subway, you can take 1Z0-1163-1 Exam Dumps out for study.

VCEPrep Oracle 1Z0-1163-1 Exam Real and Updated Dumps are Ready for Download

Online and offline service are available, and if you have any questions for 1Z0-1163-1 exam materials, you can contact us, and we will give you reply as quickly as we can.

And our 1Z0-1163-1 exam questions can help you pass the 1Z0-1163-1 exam for sure, Let alone passing guarantee, we also ensure you to obtain the highest score in certification exam.

For most office workers, it is really a tough work to getting 1Z0-1163-1 Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 certification in their spare time because preparing Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 actual exam dumps needs plenty time and energy.
