

CDCP Official Practice Test & New CDCP Test Pdf

BONUS!!! Download part of Actualtests4sure CDCP dumps for free: <https://drive.google.com/open?id=1ws0c5suMDJoaDznLVfQrW6KPtU9OFOzd>

Just as I have just mentioned, almost all of our customers have passed the exam as well as getting the related certification easily with the help of our CDCP exam torrent, we strongly believe that it is impossible for you to be the exception. So choosing our Certified Data Centre Professional (CDCP) exam question actually means that you will have more opportunities to get promotion in the near future, at the same time, needless to say that you will get a raise in pay accompanied with the promotion. What's more, when you have shown your talent with Certified Data Centre Professional (CDCP) certification in relating field, naturally, you will have the chance to enlarge your friends circle with a lot of distinguished persons who may influence you career life profoundly. So why are you still hesitating for purchasing our CDCP Guide Torrent? Your bright future is starting from here!

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 2	• Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 3	• Raised Floor • Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 4	• Fire Safety • Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 5	• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 6	• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).

New CDCP Test Pdf - CDCP Instant Discount

Living in such a world where competitiveness is a necessity that can distinguish you from others, every one of us is trying our best to

improve ourselves in every way. It has been widely recognized that the CDCP Exam can better equip us with a newly gained personal skill, which is crucial to individual self-improvement in today's computer era. With the certified advantage admitted by the test EXIN certification, you will have the competitive edge to get a favorable job in the global market.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q71-Q76):

NEW QUESTION # 71

What should be taken into consideration when using patch cables?

- A. Patch cables can only be used in combination with angled patch panels.
- **B. The patch cable should always be the same or a higher class the structured cable.**
- C. Patch cables can only be used in combination with flat patch panels.
- D. The patch cable should always be the same of a lower class the structured cable.

Answer: B

Explanation:

Patch cables of a lower class than the structured cabling can degrade the overall link performance, so it is best practice to use the same or higher class.

NEW QUESTION # 72

is the ability of a system or component to perform its required functions under stated conditions for a specified period of time.

- A. Availability
- **B. Reliability**
- C. Scalability
- D. Agility

Answer: B

Explanation:

According to the IEEE definition, reliability is the ability of a system or component to perform its required functions under stated conditions for a specified period of time. Reliability is a measure of how often a system or component fails, and how long it takes to recover from a failure. Reliability is closely related to availability, which is the degree to which a system or component is operational and accessible when required for use.

Reliability and availability are both affected by factors such as design, maintenance, testing, and environmental conditions.

NEW QUESTION # 73

Which one of the following is an Audible Signaling and Notification Device?

- A. Alarms
- B. Clocks
- C. Strobes
- **D. Sirens**

Answer: D

Explanation:

According to the CDCP Preparation Guide, an audible signaling and notification device is a device that produces a sound to alert or notify the occupants of a data center of an event or condition. Sirens are examples of such devices, as they can emit loud and distinctive tones to warn of fire, emergency, or security incidents.

Strobes, on the other hand, are visual signaling and notification devices that produce flashes of light to attract attention or convey information. Alarms and clocks are not specific types of devices, but rather general terms that can refer to various audible or visual devices.

NEW QUESTION # 74

Which design consideration should be implemented with an Inergen-based fire suppression system?

- A. Install protective covers around the nozzles to avoid accidental gas dumps.
- **B. Pressure relief valves are required in the room that needs protection.**
- C. To use Inergen only for fires which are not related to electrical power.
- D. Install the gas containers (tanks) close to the data centre.

Answer: B

Explanation:

A design consideration that should be implemented with an Inergen-based fire suppression system is to install pressure relief valves in the room that needs protection. Inergen is a clean agent fire suppression system that uses a mixture of inert gases (nitrogen, argon, and carbon dioxide) to displace the oxygen in the room and extinguish the fire. However, when Inergen is released into the room, it creates a sudden increase in pressure, which can damage the walls, doors, windows, and ceilings of the room. To prevent this, pressure relief valves are required to vent the excess pressure to the outside and maintain a safe pressure level inside the room. Pressure relief valves should be designed and installed in accordance with the relevant standards and codes, such as NFPA 2001 and ISO 14520.

NEW QUESTION # 75

The temperature and humidity values indicated on the display of the Computer room air conditioner unit are the values measured at which point?

- **A. It is the value measured at the intake of the air conditioner.**
- B. It is the value measured at the exhaust (outlet) of the air conditioner.
- C. It is the average value between the intake and exhaust (outlet) of the air conditioner.
- D. It is the value measured at the front of the rack of the aisle the air conditioner is situated.

Answer: A

Explanation:

According to the IBM document on temperature and humidity design criteria1, the temperature and humidity values indicated on the display of the computer room air conditioner unit are the values measured at the intake of the air conditioner. This is because the intake is where the air conditioner draws the air from the computer room and cools and dehumidifies it before sending it back to the computer room. The display shows the current conditions of the computer room air, which are used to adjust the cooling and dehumidifying operations of the air conditioner. The values measured at the exhaust (outlet) of the air conditioner are not displayed, as they are not relevant for the computer room environment. The values measured at the front of the rack of the aisle the air conditioner is situated are also not displayed, as they may vary depending on the distance and location of the rack. The average value between the intake and exhaust (outlet) of the air conditioner is not displayed, as it does not reflect the actual conditions of the computer room air or the air conditioner performance.
