Latest Test 3V0-24.25 Simulations, 3V0-24.25 Test Engine

Are you still worried about not passing the 3V0-24.25 exam? Do you want to give up because of difficulties and pressure when reviewing? You may have experienced a lot of difficulties in preparing for the exam, but fortunately, you saw this message today because our well-developed 3V0-24.25 Exam Questions will help you tide over all the difficulties. As a multinational company, our 3V0-24.25 training quiz serves candidates from all over the world.

You can become more competitive force in the job hunting market and you can also improve your ability in the process of getting a certificate. 3V0-24.25 study materials of us will help you get the certificate successfully. With experienced experts to compile 3V0-24.25 study materials, they are high-quality and accuracy, and you can pass the exam just one time. Moreover, we offer you free demo, and you can have a try before buying 3V0-24.25 Exam Dumps, so that you can have a better understanding of what you are going to buy.

>> Latest Test 3V0-24.25 Simulations <<

Trustable Latest Test 3V0-24.25 Simulations, Ensure to pass the 3V0-24.25 Exam

If you ask how we can be so confident with our 3V0-24.25 exam software, we will tell you that first our Exam4Free is an experienced IT software team; second we have more customers who have pass 3V0-24.25 exam with the help of our products. 3V0-24.25 Exam Certification is international recognized, and do you want this authority certificate? Then, you will easily get the certification with the help of our 3V0-24.25 exam software.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q67-Q72):

NEW QUESTION # 67

A Cloud Administrator needs to resolve a "Condition: False" error on a Supervisor Cluster related to network connectivity. The Supervisor cannot reach the external image registry to pull system images.

Review the following log snippet from the Supervisor's WCP service:

E1121 10:05:01.442 controller.go:120] Failed to pull image 'projects.registry.vmware.com/tkg/tanzu- kubernetes-grid-service-v2.0.0':

rpc error: code = Unknown desc = Error response from daemon: Get

https://projects.registry.vmware.com/v2/: dial tcp 10.128.0.45:443: i/o timeout The administrator verifies that the firewall rules allow traffic from the Supervisor Management Network IP range to the internet.

What configuration on the Supervisor is most likely missing or incorrect, preventing this connection?

(Select all that apply.)

- A. The Image Registry Service has not been enabled on the Supervisor.
- B. The Supervisor's Management Network Gateway is configured incorrectly.
- C. The Proxy Settings (HTTP/HTTPS Proxy) have not been configured or are incorrect on the Supervisor, preventing it from routing internet-bound traffic through the corporate gateway.
- D. The DNS Server settings on the Supervisor are incorrect, causing name resolution to fail.
- E. The Egress CIDR for the Namespaces is exhausted.

Answer: B,C

NEW QUESTION # 68

A Platform Engineer is designing a multi-zone Supervisor architecture to support a high-availability requirement for a critical financial application. The design involves three vSphere Zones: Zone-A, Zone- B, and Zone-C.

The engineer needs to create a vSphere Namespace fin-app-ns that can tolerate the failure of any single zone.

Review the following proposed configuration snippet for the Namespace creation:

Proposed Namespace Configuration Logic

Name: fin-app-ns

Placement:

Zones:

- Zone-A

- Zone-B

Storage Policies:

- gold-storage-policy (assigned to all zones)

Why is this proposed configuration insufficient to meet the "tolerate failure of any single zone" requirement for the Supervisor Control Plane and the workloads within this namespace? (Choose 2.)

- A. Kubernetes control planes typically require an odd number of members (e.g., 3) distributed across failure domains to maintain quorum (etcd) during a partition. Using only 2 zones risks split-brain scenarios.
- B. A 3-zone Supervisor deployment is required to support the Supervisor Control Plane's high availability; restricting the Namespace to only two zones (A and B) prevents the Supervisor from placing control plane VMs in the third zone if one fails.
- C. The configuration is actually valid; vSphere HA will handle the failover between Zone A and Zone
- D. The storage policy must be different for each zone to ensure replication.
- E. vSphere Namespaces do not support multi-zone placement; they must be pinned to a single cluster.

Answer: A,B

NEW QUESTION # 69

A VKS Administrator attempts to delete a testing namespace test-ns-01 via the vSphere Client, but the deletion hangs in the "Removing" state.

Investigating via kubectl get namespace test-ns-01 -o yaml, the administrator sees the following:

metadata:

name: test-ns-01

deletionTimestamp: "2023-11-16T10:00:00Z"

finalizers:

- "kubernetes"
status:
phase: Terminating
Further investigation reveals a TanzuKubernetesCluster inside the namespace is also stuck in deletion.
What is the most likely reason for this "stuck" state, and what is the appropriate CLI intervention?
(Choose 2.)

- A. The Supervisor Cluster is disconnected from vCenter Server.
- B. The TKG cluster has "orphan" resources (like a Persistent Volume or Load Balancer Service) that the cloud provider failed to de-provision, causing the finalizer to block deletion.
- C. The administrator must use kubectl patch tanzukubernetescluster -n test-ns-01 -p '{"metadata":{"finalizers":[]}}' --type=merge to forcibly remove the finalizer and allow deletion to proceed (after verifying resources are cleaned up).
- D. The Namespace quota has been exceeded.
- E. The administrator should restart the ESXi hosts.

Answer: B,C

NEW QUESTION # 70
A Cloud Administrator is optimizing the Supervisor configuration. They initially deployed the Supervisor with the NSX Advanced Load Balancer (Avi). However, users are reporting certificate warning errors when accessing the Supervisor Control Plane API endpoint.
Review the current status:
Status: Running
Config Status: Certificate Untrusted
[Certificate Details]
Subject: CN=192.168.10.50
Issuer: CN=192.168.10.50
Type: Self-signed
To resolve this and ensure compliance, the administrator needs to replace the machine SSL certificate.
Which specific actions are part of the correct procedure to replace the Supervisor certificate? (Choose 2.)

- A. Replace the certificate directly inside the Supervisor Control Plane VM using SSH and openssl commands.
- B. Generate a new CSR (Certificate Signing Request) from the vSphere Client under "Workload Management" > "Supervisor" > "Configure" > "Certificates".
- C. Upload the signed certificate chain and private key to the Supervisor configuration in the vSphere Client.
- D. Re-run the "Enable Workload Management" wizard to inject the new certificate.
- E. Replace the machine SSL certificate on the vCenter Server system; the Supervisor inherits this trust automatically.

Answer: B,C

NEW QUESTION # 71
A Platform Engineer is troubleshooting a Pending PersistentVolumeClaim (PVC) in a Zonal Supervisor environment. The pod requesting the volume is scheduled in Zone-A.
Review the kubectl describe pvc data-vol output:
Name: data-vol
Namespace: zonal-app
Status: Pending
Volume:
StorageClass: zone-a-policy
Events:
Type Reason Age From Message
---- ------ ---- ---- -------
Warning ProvisioningFailed 15s (x9 over 2m) csi.vsphere.vmware.com failed to provision volume with StorageClass "zone-a-policy":
No compatible datastore found in topology
"topology.kubernetes.io/zone=zone-a".

The vSphere Administrator confirms that zone-a-policy exists and is assigned to the namespace.
What is the most likely configuration error causing this failure? (Choose 2.)

- A. The storage policy zone-a-policy includes tag-based rules that are not satisfied by any datastore currently available in Zone-A.
- B. The vSphere CSI driver has crashed on the ESXi hosts.
- C. The PVC request is missing the accessModes field.
- D. The zone-a-policy is configured to force provisioning in Zone-B only, creating a topology mismatch with the pod's location.
- E. The datastores in Zone-A are compatible with the policy but have insufficient free space to satisfy the requested PVC size.

Answer: A,D

NEW QUESTION # 72
......

In fact, the overload of learning seems not to be a good method, once you are weary of such a studying mode, it's difficult for you to regain interests and energy. Therefore, we should formulate a set of high efficient study plan to make the 3V0-24.25 exam dumps easier to operate. Here our products strive for providing you a comfortable study platform and continuously upgrade 3V0-24.25 Test Prep to meet every customer's requirements. Under the guidance of our 3V0-24.25 test braindumps, 20-30 hours' preparation is enough to help you obtain the VMware certification, which means you can have more time to do your own business as well as keep a balance between a rest and taking exams.

3V0-24.25 Test Engine: https://www.exam4free.com/3V0-24.25-valid-dumps.html

Similarly, We also provide free updates up to 365 days after purchasing 3V0-24.25 Test Engine - Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service dumps questions, so that you always get the latest VMware 3V0-24.25 Test Engine dumps, Our 3V0-24.25 study materials are recognized as the standard and authorized study materials and are widely commended at home and abroad, The dumps contain all the relevant information of Professional Level Exams 3V0-24.25 exam that is necessary for your success.

Much more accurate estimates of file copying time, Professional Level Exams for Career in Professional Level Exams, Latest Test 3V0-24.25 Simulations Similarly, We also provide free updates up to 365 days after purchasing Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service dumps questions, so that you always get the latest VMware dumps.

Free PDF Quiz VMware 3V0-24.25 Marvelous Latest Test Simulations

Our 3V0-24.25 Study Materials are recognized as the standard and authorized study materials and are widely commended at home and abroad, The dumps contain all the relevant information of Professional Level Exams 3V0-24.25 exam that is necessary for your success.

Exam4Free is engaged in studying valid exam simulation files with high passing rate many years, As the talent competition increases in the labor market, it has become an accepted fact that the 3V0-24.25 certification has become an essential part for a lot of people, especial these people who are 3V0-24.25 looking for a good job, because the certification can help more and more people receive the renewed attention from the leader of many big companies.
