トピック 4	<ul style="list-style-type: none"> TOGAF ビジネス シナリオ メソッド: この OGBA-101 試験トピックの焦点は、TOGAF ビジネス シナリオ メソッドの適用です。

The Open Group TOGAF Business Architecture Foundation Exam 認定 OGBA-101 試験問題 (Q41-Q46):

質問 # 41

Which of the following best describes information mapping?

- A. A technique to create a maturity model for information management.
- **B. A technique to represent business information assets in use, or planned by the enterprise.**
- C. A technique to construct a high level description of the informational requirements of a business.
- D. A technique to construct a baseline description of the structure and interaction of information assets that support key business functions.

正解: B

解説:

Information mapping in TOGAF is a technique used to represent business information assets that are either currently in use or planned for future use by the enterprise. Here's a detailed explanation:

Purpose of Information Mapping:

Information mapping provides a clear visualization of how information flows within the enterprise, highlighting the information assets and their interactions. This is crucial for understanding the current state and planning the future state of information management.

TOGAF Framework:

Phase C: Information Systems Architectures: Within this phase, information mapping is used to develop the Data Architecture, which outlines the structure of an organization's logical and physical data assets and data management resources.

Supporting Analysis: Information mapping supports various analyses, including gap analysis, impact analysis, and the identification of information dependencies and redundancies.

Benefits:

Clear Representation: It provides a clear and structured representation of business information assets, aiding in the understanding and management of information flows.

Alignment with Business Processes: Helps ensure that information assets are aligned with business processes and objectives, enhancing the efficiency and effectiveness of information usage.

Components:

Current Information Assets: Information mapping identifies and catalogs the information assets currently in use within the enterprise.

Planned Information Assets: It also includes planned information assets that will be needed to support future business processes and strategies.

In summary, information mapping is a technique to represent business information assets in use or planned by the enterprise, providing a structured view of information flows and supporting effective information management.

質問 # 42

Which of the following best describes a benefit of business models?

- A. They can be used to calculate detailed cost estimates.
- B. They highlight what the business does without the need to explain why.
- **C. They provide a different viewpoint to cross-check assumptions.**
- D. They can be used to resolve conflicts amongst different stakeholders.

正解: C

解説:

Business models are essential tools within TOGAF for providing different perspectives on the business operations, strategies, and value propositions. Here's a detailed explanation:

* Purpose of Business Models:

* Business models are designed to represent various aspects of the business, such as value creation, delivery, and capture mechanisms. They provide a structured way to analyze and understand the business.

* Different Viewpoint:

* Cross-Check Assumptions: Business models offer a different viewpoint that helps in validating and cross-checking assumptions made about the business. By presenting a visual and structured representation of the business, these models enable stakeholders to identify gaps, inconsistencies, and areas that need further analysis.

* Holistic Understanding: They help in gaining a holistic understanding of how different components of the business interact, which is crucial for ensuring that the enterprise architecture aligns with the business strategy and goals.

* TOGAF References:

* Phase A: Architecture Vision: During this phase, business models are used to articulate the vision and scope of the architecture effort. They help in ensuring that all assumptions are validated and that the architecture aligns with business objectives.

* Phase B: Business Architecture: Business models are also utilized in this phase to analyze business capabilities, processes, and value streams. They provide a different viewpoint that aids in identifying areas for improvement and ensuring alignment with the strategic intent.

In summary, business models provide a different viewpoint that helps cross-check assumptions, ensuring that the enterprise architecture is aligned with the business strategy and objectives.

質問 # 43

Which statement best describes iteration and the ADM?

- A. The level of detail is defined once and applies to all iterations.
- B. The ADM is sequential. Iteration is applied within phases.
- C. The ADM is iterative between phases B to D, and between Phases E and F.
- **D. The ADM is iterative, over the whole process, between phases, and within phases.**

正解: D

解説:

TOGAF's ADM (Architecture Development Method) is designed to be iterative at multiple levels: over the whole process, between phases, and within phases. This iterative approach allows for continuous refinement and improvement of the architecture, ensuring it remains aligned with changing business needs and technological advancements. Iteration helps in managing complexity and facilitates incremental development, enabling architects to revisit and adjust their work as new information and insights emerge.

質問 # 44

Which of the following is a benefit of organization mapping?

- A. An organization map can be reused for training and employee development.
- B. An organization map highlights inefficiencies and reduces operational costs.
- C. An organization map improves the ability to consume, process, and deliver information.
- **D. An organization map improves strategic planning.**

正解: D

解説:

Organization mapping is a technique used to represent the structure and relationships within an organization.

Here's a detailed explanation of its benefits, particularly for strategic planning:

* Organization Mapping:

* Organization maps visually represent the hierarchical structure of an organization, including departments, teams, and reporting relationships. They provide insights into how the organization is structured and how different parts interact.

* Benefits for Strategic Planning:

* Alignment with Strategy: An organization map helps in aligning organizational structure with strategic goals. By understanding how the organization is structured, leaders can ensure that resources are allocated efficiently and that the organizational design supports the strategic objectives.

* Identifying Gaps and Overlaps: Organization maps highlight areas where there might be gaps or overlaps in roles and responsibilities. This information is crucial for making strategic decisions about restructuring or reallocating resources.

* Improving Communication: By clearly depicting the organizational structure, these maps improve communication and collaboration

within the organization. This is particularly important for strategic planning, as it ensures that all parts of the organization are aligned and working towards the same goals.

* TOGAF References:

* Phase B: Business Architecture: Organization mapping is a key activity in this phase, where the current organizational structure is analyzed to ensure it supports the business strategy and architecture vision.

* Strategic Planning: TOGAF emphasizes the importance of aligning the business architecture with strategic planning. Organization maps are tools that facilitate this alignment by providing a clear representation of the organizational structure.

In summary, organization mapping improves strategic planning by providing a clear, visual representation of the organizational structure, helping to align resources and design with strategic goals.

質問 # 45

Which of the following is a derived relationship in an organization map?

- A. Location
- B. Capability
- C. Scope of enterprise
- D. Value flow

正解: D

解説:

According to the TOGAF Series Guide: Organization Mapping, one of the derived relationships in an organization map is value flow. A value flow is a relationship that shows how value is exchanged between business units or other entities in an organization map. A value flow can be expressed as a verb phrase that indicates what type of value is transferred or shared between entities. For example, in an organization map for an online retailer, a possible value flow could be "Delivers products" between the Warehouse business unit and the Customer entity.
