## Practice 1Y0-205 Online, Examcollection 1Y0-205 Vce

All questions in our Citrix 1Y0-205 pass guide are at here to help you prepare for the certification exam. We have developed our learning materials with accurate Citrix 1Y0-205 exam answers and detailed explanations to ensure you pass test in your first try. Our PDF files are printable that you can share your Citrix 1Y0-205 free demo with your friends and classmates.

## Citrix Virtual Apps and Desktops Administration Sample Questions (Q21-Q26):

### NEW QUESTION # 21

Scenario: A StoreFront store supports 150 users who have full access to all enterprise resources.

A Citrix Administrator needs to create a new StoreFront store for contractors who will work onsite for two months. The contractors need access to specific resources but will NOT be Active Directory users.

Which option should the administrator select while creating the store for contractors?

- A. HTTP Basic
- B. Pass-through
- **C. Unauthenticated**
- D. Smart card

**Answer: C**

### NEW QUESTION # 22

A user complains to a Citrix Administrator that application load time is long when they log on at the beginning of the work day.

Which feature can the administrator enable to reduce the perceived start time of the user's application?

- A. Application Lingering

- B. Application Limits
- C. Application Keyword
- **D. Application Prelaunch**

**Answer: D**

Explanation:

Application Prelaunch starts an application session in the background before the user explicitly launches it. This reduces perceived application load time, especially at the beginning of the work day, by keeping sessions ready for faster access.

#### **NEW QUESTION # 23**

Which command must a Citrix Administrator run on the Citrix Director machine to integrate the NetScaler Console appliance with Citrix Director?

- **A. DirectorConfig.exe /confignetscaler**
- B. Set-LogSite
- C. DirectorConfig.exe /configscom
- D. Set-MonitorConfiguration

**Answer: A**

Explanation:

To integrate the NetScaler (Citrix ADC) Console with Citrix Director, the administrator must run the command DirectorConfig.exe /confignetscaler on the Director machine. This enables Director to display NetScaler Gateway and HDX Insight data.

#### **NEW QUESTION # 24**

What are three valid ways to configure Virtual Delivery Agent (VDA) registration? (Choose three.)

- **A. DHCP Options**
- **B. Group Policy Object (GPO)**
- **C. CONFIG.XML file**
- D. MCS-based PERSONALITY.INI
- E. Organizational Unit (OU) based Controller discovery

**Answer: A,B,C**

Explanation:

DHCP Options can be used to provide Delivery Controller addresses dynamically.

CONFIG.XML file (created during VDA installation) can contain Controller information for registration.

Group Policy Object (GPO) can centrally define and manage Controller discovery settings.

#### **NEW QUESTION # 25**

Scenario: A Citrix Administrator needs to power-manage a group of Server OS Virtual Delivery Agent (VDA) machines that are all in the same Delivery Group. The administrator needs all the machines to be restarted once a week during the weekend. Additionally, a subset of the machines should be restarted every day during non-peak hours. Which feature must the administrator change from the default values in order to fulfill the requirements?

- A. Restart duration
- **B. Tag restrictions**
- C. Peak and non-peak hours
- D. Weekday and weekend hours

**Answer: B**

Explanation:

Tag restrictions allow administrators to apply different power management schedules to subsets of machines within the same Delivery Group. By tagging certain Server OS VDAs, the administrator can configure weekly restarts for all machines and daily restarts for only the tagged subset during non-peak hours.
