EMC Dell Information Storage and Management Foundations v2 Exam Sample Questions (Q57-Q62):

NEW QUESTION # 57

Question:

A company needs to ensure high availability for its applications and minimize downtime in case of a disk failure. The current storage configuration is a RAID 0 array with SSDs. Which RAID level is most cost effective and would provide the necessary data protection without significant performance degradation?

- A. Maintain the existing RAID 0 configuration with SSDs
- B. Implement a RAID 1 array with SSDs for disk mirroring
- C. Upgrade to a RAID 6 array with SSDs for dual parity protection
- **D. Migrate to a RAID 5 array with SSDs for parity-based protection**

Answer: D

NEW QUESTION # 58

Question:

What is the maximum number of VLANs that can be supported with one VLAN tag field?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

In Ethernet networking, VLANs (Virtual Local Area Networks) are identified using a 12-bit VLAN ID field in the IEEE 802.1Q standard. Since 12 bits can represent $2^{12} = 4096$ unique values, the maximum number of VLANs that can be supported is 4096.

* 1024 and 2048: These values are less than the maximum and represent subsets of possible VLANs.

* 8192: This exceeds the 12-bit limit and is not supported by the standard.

NEW QUESTION # 59

Question:

A company is looking for a continuous data protection solution that can provide any point-in-time recovery. Which Dell solution is most suitable for this requirement?

- A. Dell Cloud Tier
- **B. Dell RecoverPoint**
- C. Dell TimeFinder SnapVX
- D. Dell SRDF

Answer: B

Explanation:

Dell RecoverPoint is a continuous data protection (CDP) solution that uses journaling to provide any point-in-time recovery of data. It continuously captures and replicates data changes, storing them in a journal to enable precise recovery to any required point in the past.

* Dell SRDF (Symmetrix Remote Data Facility): Provides synchronous/asynchronous replication, not CDP.

* Dell TimeFinder SnapVX: Creates point-in-time snapshots but doesn't offer continuous journaling.

* Dell Cloud Tier: Used for archiving older data to the cloud.

NEW QUESTION # 60

Question:

A company is implementing a new information security policy. They want to ensure that the policy aligns with its risk appetite, internal policies, and external regulations. Which framework can help the company achieve this goal?

- A. COBIT
- B. ITIL
- C. GDPR
- **D. GRC**

Answer: D

Explanation:

GRC stands for Governance, Risk, and Compliance. It's a comprehensive framework that helps organizations align their IT operations with business objectives, manage risks effectively, and ensure compliance with internal and external regulations.

* GDPR: A specific regulation focusing on data protection and privacy in the EU.

* COBIT: A framework for IT governance and management, but not as comprehensive in risk and compliance aspects.

* ITIL: Focuses on IT service management, not directly on governance or compliance.

NEW QUESTION # 61

Question:

A company needs to ensure high availability for its applications and minimize downtime in case of a disk failure. The current storage configuration is a RAID 0 array with SSDs. Which RAID level is most cost effective and would provide the necessary data protection without significant performance degradation?

- A. Maintain the existing RAID 0 configuration with SSDs
- B. Implement a RAID 1 array with SSDs for disk mirroring
- C. Upgrade to a RAID 6 array with SSDs for dual parity protection
- D. Migrate to a RAID 5 array with SSDs for parity-based protection

Answer: D

Explanation:

RAID 5 provides a cost-effective balance between:

Data protection (single parity, can tolerate one disk failure).

Performance (especially read-heavy environments).

Cost (uses fewer drives than RAID 1 or 6 for the same capacity).

* RAID 1 (B): Best for read-heavy workloads but doubles the storage needed (mirroring).

* RAID 0 (C): No protection against disk failure.

* RAID 6 (D): More protection (dual parity), but more write penalty and more disks needed.
