

# 312-85 Exam Registration, 312-85 Pass Guarantee

BONUS!!! Download part of Exams4Collection 312-85 dumps for free: [https://drive.google.com/open?id=1wrsMumlWimyDEdoq\\_vy2sq8t3mqOI5H2](https://drive.google.com/open?id=1wrsMumlWimyDEdoq_vy2sq8t3mqOI5H2)

All those versions are paramount versions. PDF version of 312-85 practice materials - it is legible to read and remember, and support customers' printing request, so you can have a print and practice in papers. Software version of 312-85 practice materials - It support simulation test system, and times of setup has no restriction. Remember this version support Windows system users only. App online version of 312-85 practice materials - Be suitable to all kinds of equipment or digital devices. Be supportive to offline exercise on the condition that you practice it without mobile data.

ECCouncil 312-85 certification is recognized globally and is highly valued by employers in the cybersecurity industry. Certified Threat Intelligence Analyst certification demonstrates that the holder has the skills and knowledge to identify and mitigate cyber threats, which is a critical skill in today's rapidly evolving cybersecurity landscape.

The 312-85 Exam is a vendor-neutral certification that is recognized globally, making it an attractive option for those looking to expand their career opportunities in the field of cybersecurity. It covers a wide range of topics, including threat intelligence fundamentals, threat modeling, data analysis, and cybersecurity frameworks.

## 100% Pass Quiz 2026 Efficient ECCouncil 312-85: Certified Threat Intelligence Analyst Exam Registration

The 312-85 practice questions that are best for you will definitely make you feel more effective in less time. The cost of 312-85 studying materials is really very high. Selecting our study materials is definitely your right decision. Of course, you can also make a decision after using the trial version. With our 312-85 Real Exam, we look forward to your joining. And our 312-85 exam braindumps will never let you down.

ECCouncil 312-85 (Certified Threat Intelligence Analyst) Certification Exam is ideal for individuals who work in the cybersecurity industry, including cybersecurity analysts, security engineers, network administrators, and IT professionals. Certified Threat Intelligence Analyst certification program is also suitable for law enforcement officers and military personnel who want to acquire skills in threat intelligence and analysis. Certified Threat Intelligence Analyst certification exam is based on industry best practices and standards, ensuring that individuals who earn this certification are equipped with the latest knowledge and skills required to identify and mitigate security threats. Overall, the ECCouncil 312-85 (Certified Threat Intelligence Analyst) Certification Exam is an excellent way for individuals to validate their expertise in the field of threat intelligence and analysis.

## ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q88-Q93):

### NEW QUESTION # 88

SecurityTech Inc. is developing a TI plan where it can drive more advantages in less funds. In the process of selecting a TI platform, it wants to incorporate a feature that ranks elements such as intelligence sources, threat actors, attacks, and digital assets of the organization, so that it can put in more funds toward the resources which are critical for the organization's security.

Which of the following key features should SecurityTech Inc. consider in their TI plan for selecting the TI platform?

- A. Search
- **B. Scoring**
- C. Workflow
- D. Open

**Answer: B**

#### **NEW QUESTION # 89**

H&P, Inc. is a small-scale organization that has decided to outsource the network security monitoring due to lack of resources in the organization. They are looking for the options where they can directly incorporate threat intelligence into their existing network defense solutions.

Which of the following is the most cost-effective methods the organization can employ?

- A. Recruit the right talent
- B. Recruit data management solution provider
- C. Look for an individual within the organization
- **D. Recruit managed security service providers (MSSP)**

**Answer: D**

Explanation:

For H&P, Inc., a small-scale organization looking to outsource network security monitoring and incorporate threat intelligence into their network defenses cost-effectively, recruiting a Managed Security Service Provider (MSSP) would be the most suitable option. MSSPs offer a range of services including network security monitoring, threat intelligence, incident response, and compliance management, often at a lower cost than maintaining an in-house security team. This allows organizations to benefit from expert services and advanced security technologies without the need for significant resource investment. References:

\* "The Benefits of Managed Security Services," by Gartner

\* "How to Choose a Managed Security Service Provider (MSSP)," by CSO Online

#### **NEW QUESTION # 90**

Organizations must choose the right threat intelligence platform to assess and leverage intelligence information, monitor multiple enforcement points, manage intelligence feeds, and select appropriate security for digital assets.

Which of the following key factors ensures that the threat intelligence platform offers a structured way to perform investigations on attacks by processing the threat intelligence and utilizing internal security controls to automate the detection process?

- **A. Workflow**
- B. Search
- C. Scoring
- D. Open

**Answer: A**

Explanation:

The key factor that enables a structured and automated process for investigating attacks, processing intelligence, and integrating it with internal controls is Workflow.

In a Threat Intelligence Platform (TIP), the workflow defines a structured sequence of steps or processes that analysts follow to collect, process, analyze, and act on intelligence data. It ensures that:

- \* Intelligence is processed consistently and efficiently.
- \* Alerts, investigations, and responses follow predefined automation rules.
- \* Internal controls are linked with threat feeds for faster detection and mitigation.

A well-designed workflow also supports investigation automation, report generation, and integration with other security systems such as SIEM, SOAR, and EDR tools.

Why the Other Options Are Incorrect:

- \* A. Scoring: Refers to prioritizing or rating intelligence based on risk or severity but does not automate investigations.
- \* B. Search: Involves querying the intelligence database for specific data but lacks structured investigation processes.
- \* D. Open: Indicates an open architecture or API support, not workflow automation or process structuring.

Conclusion:

The correct factor that ensures structured, automated investigations in a Threat Intelligence Platform is Workflow.

Final Answer: C. Workflow

Explanation Reference (Based on CTIA Study Concepts):

CTIA defines workflow as a key element in threat intelligence platforms that organizes and automates intelligence-driven investigations across multiple security controls.

### NEW QUESTION # 91

An organization suffered many major attacks and lost critical information, such as employee records, and financial information. Therefore, the management decides to hire a threat analyst to extract the strategic threat intelligence that provides high-level information regarding current cyber-security posture, threats, details on the financial impact of various cyber-activities, and so on.

Which of the following sources will help the analyst to collect the required intelligence?

- A. Active campaigns, attacks on other organizations, data feeds from external third parties
- B. Human, social media, chat rooms
- C. Campaign reports, malware, incident reports, attack group reports, human intelligence
- D. OSINT, CTI vendors, ISAO/ISACs

**Answer: D**

Explanation:

For gathering strategic threat intelligence that provides a high-level overview of the current cybersecurity posture, potential financial impacts of cyber activities, and overarching threats, sources such as Open Source Intelligence (OSINT), Cyber Threat Intelligence (CTI) vendors, and Information Sharing and Analysis Organizations (ISAOs)/Information Sharing and Analysis Centers (ISACs) are invaluable. OSINT involves collecting data from publicly available sources, CTI vendors specialize in providing detailed threat intelligence services, and ISAOs/ISACs facilitate the sharing of threat data within specific industries or communities. These sources can provide broad insights into threat landscapes, helping organizations understand how to align their cybersecurity strategies with current trends and threats.

### NEW QUESTION # 92

During the process of threat intelligence analysis, John, a threat analyst, successfully extracted an indication of adversary's information, such as Modus operandi, tools, communication channels, and forensics evasion strategies used by adversaries. Identify the type of threat intelligence analysis is performed by John.

- A. **Tactical threat intelligence analysis**
- B. Strategic threat intelligence analysis
- C. Technical threat intelligence analysis
- D. Operational threat intelligence analysis

**Answer: A**
