If there is an update system, it will be automatically sent to you. The Advanced-Administrator learning prep you use is definitely the latest information on the market without doubt. And you can enjoy free updates for one year after purchase.

Salesforce Advanced-Administrator Certification Exam covers a wide range of topics such as data management, process automation, security concerns, and user interface enhancements. Advanced-Administrator exam consists of 60 multiple-choice questions, which must be completed within 105 minutes. To pass the exam, candidates must score at least 65% or 39 correct answers out of 60.

Passing the Salesforce Advanced-Administrator certification exam demonstrates a candidate's expertise in managing and configuring advanced Salesforce features and functionalities. It is a valuable credential for professionals who want to advance their careers in Salesforce administration and management.

Salesforce is a popular customer relationship management (CRM) software used by businesses worldwide. It is a cloud-based platform that provides a range of services, including sales, marketing, customer service, and analytics. To become proficient in using Salesforce, one can pursue various certification programs offered by Salesforce. One such certification is the Salesforce Advanced-Administrator.

The client can try out our and download Advanced-Administrator Guide materials freely before the sale and if the client have problems about our Advanced-Administrator study materials after the sale they can contact our customer service at any time.

Salesforce Certified Advanced Administrator Sample Questions (Q48-Q53):

NEW QUESTION # 48

Universal Containers has three different profiles for the support desk. The VP of Support requests permission to only reassign profiles for support desk users.

How should this access be granted?

- A. Delegated administration access to the three profiles.
- B. A permission set with the manage users permission.
- C. The manage users permission to the profile.
- **D. The administrator profile.**

Answer: D

NEW QUESTION # 49

Cloud Kicks has a custom object called Membership Details that records information about customers' preferences for their memberships. Depending on the membership level, different data needs to be displayed.

- * when a running user has the Market profile, all data should be visible.
- * When the running user has the Support profile, only the Support preference fields should be visible.
- * Both Marketing and Support users should be able to report on all data.

How should the administrator deliver this solution?

- A. Create two record types and two page layouts.
- **B. Set up Dynamic forms to conditionally show data.**
- C. Use Field-Level Security to control data access.
- D. Make a permission set with a Muting permission.

Answer: B

Explanation:

Use Field-Level Security to control data access is how the administrator should deliver this solution. Field-Level Security is a way to restrict users' access to view or edit specific fields on an object based on their profile or permission set. Field-Level Security can be used to make fields visible or hidden, and editable or read-only for different users. By using Field-Level Security, the administrator can ensure that only Marketing users can see all data on the Membership Details object, while Support users can only see the Support preference fields.

NEW QUESTION # 50

Cloud Kicks has an export of Order and Order Item data from an enterprise resource planning (ERP) system.

The data must be imported into the Salesforce Order and Order Product objects, while maintaining the relationships in the data.

What are two ways the administrator should load the data?

Choose 2 answers

- A. Use an Upsert operation to load data.
- **B. Use an Insert operation to load data.**
- C. Replace the Salesforce record ID with the External ID.
- **D. Map an External ID data value to the object.**

Answer: B,D

Explanation:

Use an Insert operation to load data because the data is not already in Salesforce and does not need to be updated or deleted³.

Map an External ID data value to the object because External IDs are used to create relationships between records that are being imported and records that already exist in Salesforce⁴.

NEW QUESTION # 51

Ursa Major Solar's administrator has configured multiple record-triggered flows to run before or after the record is saved on the Account object.

What should the administrator consider when a record-triggered flow executes first?

- A. The flow with the shortest execution time will execute first.
- B. The flow with the longest execution time will execute first.
- **C. The order in which those flows are executed is not guaranteed.**
- D. Assign the highest priority to the record-triggered flow which should execute first.

Answer: C

Explanation:

The order in which record-triggered flows are executed is not guaranteed. If there are multiple record-triggered flows on the same object and trigger type, Salesforce does not guarantee which one runs first.

Therefore, the administrator should consider this when designing record-triggered flows that depend on each other's outcomes.

NEW QUESTION # 52

In Collaborative Forecasts, which permissions are required in order to upload quota data for all users? Choose 2.

- **A. View all Forecasts**
- B. Customize Quotas
- C. View all data.
- **D. Manage Quotas**
- E. Customize Forecasts
- F. Manage all data

Answer: A,D

NEW QUESTION # 53

.....
