Salesforce Administer, Extend, and Automate Salesforce Sample Questions (Q201-Q206):

NEW QUESTION # 201

What type of data can be migrated between environments using change sets? Choose 2 answers

- A. Email templates
- B. Custom fields
- C. Account team roles
- D. Field type changes

Answer: A,B

NEW QUESTION # 202

An administrator created and activated several record-triggered flows that are configured to run before the record is saved on the same object.

What should the administrator consider about the order of execution for flows?

- A. The order of flow execution is unpredictable.
- B. The flow type will determine the order of execution.
- C. The flows will execute in alphabetical order based on their names.
- D. The last created date of the flow will determine the order.

Answer: A

Explanation:

When you have multiple record-triggered flows that are configured to run before the record is saved on the same object, the order of flow execution is unpredictable. This means that you cannot guarantee which flow will run first or last, or how they will affect each other's field updates. Therefore, you should avoid creating multiple before-save flows on the same object and instead consolidate them into one flow if possible. Reference: https://help.salesforce.com/s/articleView?id=sf.flow_considerations_recordtriggered_before.htm&type=5

NEW QUESTION # 203

What should an administrator use as an alternative to a Process Builder to expedite the time required to update the records?

- A. Workflow Rule Field Change
- B. Screen Row
- C. Before save How Trigger
- D. Batch Update

Answer: C

NEW QUESTION # 204

An administrator is creating a custom Opportunity record page for Sales users for new logo opportunities. They need to control what fields display on the record when a sales user is viewing the opportunity.

Where should the administrator edit what fields display in the details of the record page?

- A. Custom Lightning Component
- B. Record Detail Component
- C. Page Layout
- D. Record Types

Answer: C

Explanation:

The fields that display in the details of the record page are controlled by the page layout assigned to the user's profile and record type. The administrator can edit the page layout to add, remove, or reorder fields on the record page. Reference: https://help.salesforce.com/s/articleView?id=sf.customize_layouts.htm&type=5

NEW QUESTION # 205

An administrator at Cloud Kicks has been tasked by the compliance team to flag where sensitive information is stored in Salesforce. What feature should the administrator use to fulfill this requirement?

- A. Classic Encryption
- B. Schema Builder
- C. Field-Level Security
- D. Data Classification

Answer: D

Data Classification is the feature that the administrator should use to flag where sensitive information is stored in Salesforce. Data Classification is a feature that allows administrators to flag where sensitive information is stored in Salesforce by assigning sensitivity and classification levels to fields. Data Classification can help administrators comply with data privacy regulations and best practices by identifying and managing sensitive data in their orgs.
